HERBARIUMS

for Mounting, Analyzing, and Preserving Botanical Specimens

The Cameron Herbarium

is most up-to-date in nomenclature and classification. That it is popular and practical is proved by its continued use by those who used the original edition, as well as by the new and increasing list of users each season.

The National Herbarium

is arranged on the check plan. It presents a complete botanical outline—the student analyzes the different specimens by placing check marks in the proper spaces.
