This index includes everything published in The American Biology Teacher during 2002 (Volume 64) except filler material. Book reviews in the title index are listed with the names of the book author(s) in parentheses; classroom technology reviews list the name of the producer in parentheses. In both cases, the reviewers are listed in the author index. The index is alphabetical word-by-word. For example, "Educational" would follow "Education Theory." Page numbers indicate the first page of the article or department in which the entries appear. Entries are in three categories: Subject, Title and Author. All entries include one of the following key codes:

**Subjects**

Adaptive Landscape .................. 8:605H
Agriculture .......................... 7:521H
Anatomy & Physiology ................ 4:272H
Animal Behavior ..................... 8:636R
Animal Physiology ................... 7:546C
Antibiotics .......................... 3:184A
Anthrax ............................. 1:11A
Authentic Science Education ........ 9:659A
Bats .................................. 6:645A
Biodiversity ......................... 1:70R, 3:228R
Bioethics .......................... 7:552R
Bioinformatics ....................... 2:93A
Biological Warfare .................. 2:158R
Biological Weapons ................ 9:649A
Biomedical Science .................. 7:550R
Bioscope Initiative .................. 7:503A
Biotech Detection ................... 6:433H
Biotechnology ...................... 5:331A, 9:706R
Bioterrorism ....................... 9:649A
Birds .............................. 4:302B
Blood Group Analysis ............... 3:212H
Brine Shrimp ........................ 8:596H
Buffer Solutions ..................... 8:620H
Camera .............................. 2:100A
Cards ................................ 4:276H
Cell Biology ......................... 2:122H
Cell Structure & Function .......... 4:308C, 7:503A
Cellulase ........................... 3:202H
Cetaceae ............................ 1:77R
Chemistry in Nature ................ 7:551R
Children's Books ................... 2:159R, 7:553R
Chloroplasts ........................ 8:620H
Complex Systems .................... 8:605H
Consumption & the Environment ..... 6:470C
Cooperative Learning ............... 1:29A, 2:118A, 3:169A
Costa Rica ........................ 4:260A
Creationism ........................ 3:189A
Culinary History .................... 5:384R
Curriculum .......................... 3:166E
Daphnia ........................... 9:679H
Darwin Revisited ................... 4:310R
Darwin .............................. 5:341A
Denim .............................. 3:202H
Digestive Passage Rate .............. 1:52H
Digital Imaging ..................... 2:100A
Dinosaurs .......................... 6:471C
Diversity .......................... 3:176A
Dunn & Dunn Model of Learning Styles 6:423A
Earth .............................. 7:553R
Earthwatch .......................... 4:260A
Ecology ............................ 8:639R, 8:640R
Ecology Curriculum ................ 9:665A
Electrophoresis ...................... 5:358H
Entomology ........................ 1:77R, 2:136H
EnvironLand ......................... 8:589A
Environmental Problems .......... 7:551R
Environmental Science .............. 1:70C, 2:150C, 8:634C, 9:665A
Experimental Design ............... 7:512A
Field Biology ....................... 3:194H
Field Ecology ....................... 9:659A
Field Trips ........................ 1:45A, 3:194H
First Year Experience .............. 5:352A
Flowers ........................... 9:696B
Forensics .......................... 7:549R
Forensic Entomology ............... 2:136H
Frances Kelsey ..................... 7:495A

**2002 INDEX continued**
The Ideal Environmental Science Curriculum: History, Rationales, Misconceptions & Standards. Part I .......................... 9-665A
The Inquiry "I": A Tool for Learning Scientific Inquiry ......................................................... 7:512A
Inquiry Science: Case Study in Antibiotic Prospecting ......................................................... 3:184A
Integrating the Agents of Bioterrorism into the General Biology Curriculum. I. A Primer on Bioterrorism ................................................................. 9:649A
Introducing Bioinformatics Into the Biology Curriculum: Exploring the National Center for Biotechnology Information .................. 2:93A
Issue Oriented Biology: Merging Technical & Popular Science Writing in the Classroom .............................................................. 4:250A
Ocamm's Razor & The Nature of Scientific Theories ............................................................... 2:107A
Scientific Knowledge of the Past Is Possible: Confronting Myths About Evolution & Scientific Methods .................................................. 6:427A
Silence in Science: An Ode to the Code .............................................................. 6:423A
The Student Biotechnology Expo: A New Model for a Science Fair .................................. 5:331A
Using Digital Images in Classrooms & Outdoor Activities .................................................. 2:100A
Using Diversity Among Biomedical Scientists As a Teaching Tool: A Positive Effect of Role Modeling on Minority Students .......................... 3:176A

BIOLGY TODAY
The Attraction of Plants .......................................................... 7:540B
Birds: Old Questions & New .......................................................... 4:302B
Building Biology .......................................................... 1:64B
Do Plants Have to Be Intelligent? ......................... 8:628B
Flowers in Their Variety .......................................................... 9-696B
Insects: Beautiful & Useful .......................................................... 5-376B
Substitutes .......................................................... 3:220B
Wonderful & Excellent .......................................................... 2-144B

BOOK REVIEWS
Abraham Lincoln's DNA & Other Adventures Genetics (P.R. Reilly) ........................................ 7:552R
A Gathering of Wonders: Behind the Scenes at the American Museum of Natural History (J. Wallace) ................................................. 3:228R
A History of Molecular Biology (M. Morange). 4:312R
Altered Egos: How the Brain Creates the Self (T.E. Feinberg) ............................................ 5:385R
Ancient Forests (M. Anderson, N. Field & K. Stephenson) ............................................. 8-639R
The Ape & the Sushi Master ............................................. 8:636R
Aurelian Legacy - British Butterflies & Their Collectors (M.A. Salmon). .......................... 9:706R
Bathtub Science (S. Levine & L. Johnstone) .......... 2:159R
The Best American Science Writing 2000 (J. Gleick, ed.) ........................................ 2:157R
Biomes Series - Deserts (C. Steele) ........................................ 7:553R
Biomes Series - Forests (J. Nelson) ........................................ 7:553R
Biomes Series - Grasslands (M. Doeden) ........................................ 7:553R
Biomes Series - Oceans (C. Steele) ........................................ 7:553R
Biomes Series - Tundra (J. Nelson) ........................................ 7:553R
Body Bazaar: The Market for Human Tissue in the Biotechnology Age (L. Andrews & D. Nelkin) ................................................. 7:552R
Castles, Caves & Honeycombs (L. Ashman) .................. 2:160R
The Century of the Gene (E. Fox Keller) .................. 6:473R
The Cichlid Fishes: Nature's Grand Experiment in Evolution (G.W. Barlow) ........ 5:385R
Dark Remedy: The Impact of Thalidomide & Its Revival as a Vital Medicine (J. Goodman & V. Walsh) ........................................... 9-706R
Darwin's Ghost, The Origin of Species, Updated (S. Jones) ........................................... 4:310R
Dear Mr. Darwin, Letters on the Evolution of Life & Human Nature (G. Dover) ........ 4:310R
The Deep Time Diaries (G. Raham) ........................................ 1-79R
Discovering Endangered Species (N. Field & S. Machlis) ............................................. 8-640R
Discovering Marine Mammals A Nature Activity Book (N. Field & S. Machlis) ........ 8:640R
Discovery: Windows of the Life Sciences (R.A. Lewis) ................................................. 3-231R
Dispensing with the Truth (A. Mundy) .................. 8:638R
Dive to the Deep Ocean: Voyages of Exploration & Discovery (D. Kovalc) ............ 6:475R
Environmental Detectives (K. Beals & C. Willard) ....................................................... 4-313R
Every Contact Leaves a Trace: Scientific Detection in the Twentieth Century (Z. Erzinclioglu) ................................................. 7:549R
Evolution, The Triumph of an Idea (C. Zimmer) ............................................... 1:76R
Exploring the Biomedical Revolution: A Look at the Work of Frontline Scientists & How They Are Changing Medicine (M. Pines) ......... 7:550R
Fat: Fighting the Obesity Epidemic (R. Pool). 8:636R
First Fruit (B. Martineau). ........................................ 9-706R
From the Ground Up—The Story of a First Garden (A. Stewart) ................................. 4:312R
Growing Like Me (A. Rockwell). .................... 2:159R
Hair in Funny Places: A Book About Puberty (B. Cole). ............................................. 2:156R
Half a Brain Is Enough: The Story of Nico (A.M. Battro) ............................................. 5-384R
Insect Appreciation (T.Turpin) ........................................ 1:77R
Insect Lives (E. Hoyt & T. Schultz, eds.) ........................................ 1-78R
Interrupted Journey, Saving Endangered Sea Turtles (K. Lasky) ......................... 2:156R
The Invisible Enemy. A Natural History of Viruses (D.H. Crawford) ......................... 2:159R
Leap Froging Through Wetlands (M. Anderson, N. Field & K. Stephenson) .............. 8-639R
My Season With Penguins (S. Webb) ........................................ 5-387R
The Mysterious Ocean Highway: Benjamin Franklin & the Gulf Stream (D. Heiligman) ................................................. 6:475R
The Nature of Penguins (J. Chester). 5:387R
Nature Out of Place: Biological Invasions in the Global Age (J. VanDriesche & R. VanDriesche) ................................................. 7:551R
The New Biological Weapons, Threat, Proliferation & Control (M. Dando). ................... 2:158R
Our Earth (A. Rockwell) ........................................ 7:553R
Our Wild World Series (B.K. Harold, ed.) ........................................ 8:639R
Parasite Rex - Inside the Bizarre World of Nature's Most Dangerous Creatures (C. Zimmer) ................................................. 7-549R
Return of the Osprey: A Season of Flight & Wonder (D. Gessner) ................................. 5-386R
Sea Soup: Zooplankton (M.M. Cerullo) ........................................ 5-386R
Sparks of Life: Darwinism & the Victorian Debates Over Spontaneous Creation (J.E. Strick) ................................................. 6-474R
The Spark of Life: Darwin & The Primeval Soup (C. Wills & J. Bada) ..................... 6-474R
Spiders & Their Web Sites (M. Facklam) .................. 5-387R
The Story of Taxol: Nature & Politics in the Pursuit of Anti-Cancer (J. Goodman & V. Walsh) ................................................. 9-702R

NABT INDEX 717
EDITORIALS
The Benefits of a Review That Is Neither Categorically Negative Nor Uncritically Positive .............................................. 1.7E
The Conflict Between Science & Religion: Enough Already ................................................................. 5.327E
Credentials for All: Science Education, & the “Real World” ......................................................... 6.405E
The Dogma of “The” Scientific Method .............................................. 9.645E
“Intelligent Design” in Ohio? ................................................................. 8.567E
On The Need for a New Approach .................................................. 3.166E
Our Apartheid ........................................................................... 2.87E
A Proposal To Improve Science Education in Public Schools ............................................................ 4.247E
What Standards? ........................................................................ 7.483E

HOW-TO-DO-ITS
An Exercise to Demonstrate the Concept of an Adaptive Landscape & a Simulation of Complex Systems .............................................. 8.605H
An Introduction to Lipid Analysis in the Cell Biology Laboratory ......................................................... 2.122H
A Paternity Testing Laboratory Simulation Exercise ........................................................................... 3.212H
Canine Paternity Testing: Using Personal Experiences .................................................................................. 1.40H
Cold War: Flora’s Undercover Agents A Campus Winter Field Trip to Illustrate That Plants Do Indeed Thermoregulate .................................................................................. 1.45H
Cooperative Learning – Part 2: Cooperative Group Activities for the First Week of Class: Setting the Tone With Group Web Pages .............................................................................. 2.118A
Cooperative Learning – Part 4: Group Web Projects for Freshman Anatomy & Physiology Students .......................................................................................................................... 4.272H
Dendroedagogy: Teaching Botany, Ecology & Statistical Principles Through Tree-Ring Studies .......................................................................................................................... 9.689H
Do-It-Yourself Pipette Washer ........................................................................... 9.682H
Forensic Entomology for the Laboratory-Based Biology Classroom ........................................................................... 2.136H
Gel Separation of Isozymes to Study Relatedness of Common Bean Cultivars From Around the World .................................................................................................................. 5.358H
How-to-Learn Biology Via Roundhouse Diagrams ................................................................................ 7.525H
How to Produce & Characterize Transgenic Plants ........................................................................... 4.286H
Induced Pathogen Resistance in Bean Plants: A Model for Studying “Vaccination” in the Classroom .................................................................................................................. 1.58H
Investigating Polyploidy: Using Marigold Stomates & Finger nail Polish .................................................. 5.364H
Is TB in Your Curriculum? ........................................................................... 4.280H
It’s Laboratory Class Time. Do You Know What Your Buffer is Doing? .............................................. 8.620H
Learning About the Human Genome Project Via the Web: Internet Resources for Biology Students .................................................................................................................. 2.110H
Making Sense of Terpenes: An Exploration into Biological Chemistry .................................................. 3.208H
Melselson-Stahl Experimental Simulation Using Lego™ Building Blocks ........................................................................... 8.613H
Multiple Stages of Weekend Fieldtrips to Expose Students to Nature: Emphasis on Discovery & Awareness .................................................................................................................. 3.194H
Natural Selection Among Playing Cards ................................................................................ 4.276H
Out of this World Genetics: A Fun, Simple Assessment Method ........................................................................... 8.608H
Paramecium, an Excitable Cell with Great Potential ........................................................................ 5.369H
Plastinated Specimens Can Improve the Conceptual Quality of Biology Labs. ........................................ 2.130H
Production of Hoploid Tobacco Plants Using Another Culture ........................................................................... 6.443H
A Scenario-Based Seedling Anatomy Exercise for Middle School Students “What Caused the Cattle to Bleed to Death?” ................................................................................ 7.521H
A Simple Temperature Gradient Apparatus To Determine Thermal Preferences in Daphnia ........................................................................... 9.679H
Use of Brine Shrimp Assay to Study Herbal Teas in the Classroom ........................................................................... 8.596H
Using Gel Electrophoresis to Illustrate Protein Diversity & Isoelectric Point ........................................ 7.535H
Using a Guided-Inquiry Approach for Investigating Metabolic Rate in Mice ........................................................................... 6.449H
Using Magnetic Stir Bars to Determine Digestive Passage Rate in an Ectotherm, the Garter Snake .................................................................................................................. 1.52H
Variability & Drift in Natural Populations: From Mollusks to Trees ........................................................................... 6.455H
Way To Go Indigo: Using Cellulase to Soften & Lighten Denim ........................................................................... 3.202H
A Working Model of Protein Synthesis Using Lego™ Building Blocks ........................................................................... 9.673H
