What does it mean to be human? Although direct legal definitions of human are difficult to finalize such a definition may be more complex now and more difficult than it has been in the past. The result of the Human Genome Project is the **Bloodlines: To Home** explores the ethical implications of new life technologies such as genetic testing, cloning, and stem cell technology, and the animals that have been created. The book is a collection of the rhetoric of the Human Genome Project and the question of what it means to be human.

While the book includes scientific information including sci

JOSÉ VÁZQUEZ is an Assistant Professor in the Science in the City Program at New York University. He holds an undergraduate degree from the University of California and a graduate degree from the University of California. He has teaching experience at elementary school and high school.
