

ANN HALEY MACKENZIE, I

MICROBIOLO

Louis Pasteur and the World of Microbes. By E. Robbins. 2001. University Press (ISBN 512227-5). 140 pp. Hardcover \$24.00.

How could the son of a town tanner change the views on the disease process? Louis Pasteur was the only a tanner and French hero from the Napoleonic Early in Pasteur's education "The laboratory became remained, Pasteur's greatest and his favorite place to investigated the stoichiometry crystals and found that the ities of living organisms responsible for producing crystalline products. Pasteur's next quest led him to an understanding of fermentation microbes which carried it spoiled the results. Through this experimentation how to keep wine and be

ANN HALEY MACKENZIE, Book Editor, is an Associate Professor at Miami University, Oxford, Ohio. She teaches classes in Inquiry Life and Methods Science for Adolescent and Middle Childhood Majors. She is involved in developing a Teaching, Ethics, and Society course that infuses film and popular culture into all of her classes. MacKenzie worked at the secondary level for years and was named Ohio Teacher of the Year. She has also consulted for National Geographic, PBS, Harvard-Smithsonian Center for Astrophysics and AAAS. Her current passion is how popular culture impacts the science knowledge of children. As a result, she developed a website linking science concepts to popular culture (www.flickclip.com). Her address is Teacher Education, Miami University, 301 McGuffey Hall, Oxford, Ohio. Her e-mail is mackenhah@muohio.edu.
