failed to add that the Mormon leader also
turned the brothers "over to the buffettins
of Satan."

From 1861 on, the Walkers were on
the side of the non-Mormons, supporting,
among others, the Godbeites, the Liberal
political party, and the Masons. Bliss notes
that the Walker Brothers' bank and the
Mormon-backed Deseret National building
stood at opposite ends of the block "like
book-ends bracketing all the banking and
business community of Salt Lake. Nothing
could have better symbolized their opposite
roles in the history of the society they
served. One represented the Mormon
Church, the other the non-Mormon move-
ment" (p. 212).

Such a position in the Mormon-
dominated community could have led to
financial disaster, but the Walkers were in
the right place at the right time. They not
only survived but prospered as a result of
the sale of Camp Floyd, the Civil War, and
their involvement in the mining boom in-
cluding developments in Utah's Park City,
Alta, and Ophir, Nevada's Virginia City,
and Butte.

Bliss is able to make even such things
as banking financial reports seem interest-
ing. He brings the four brothers — Sharp,
Rob, Fred, and Matt Walker — to life. And
although the biography was sponsored by
the Walker descendants, he doesn't cover
up their weaknesses. Sharp's drinking and
Fred's involvement in the occult and un-
fortunate second marriage are described in
detail. Although his reiterations of the
brothers' ability to anticipate the future are
probably exaggerated, the text contains its
own corrective by recanting their failure to
take advantage of Silver Reef and the in-
vitation to become partners in Marcus
Daly's Anaconda Copper empire.

Unfortunately, Bliss is not quite as good
a historian as he is a writer and is guilty
of several historical errors. Millard Fill-
more is listed as president in 1854 (p. 97)
and he has Colonel Steptoe leaving the ter-
ritory in 1865 (p. 98) instead of 1855. He
uses the term "Mormon Corridor" incor-
rectly (p. 99) and suggests that the Mor-
mons had a colony in Montana. He was
careless about the spelling of Albert Sidney
Johnston (p. 112, 130) and implied that
Brigham Young sent the Utah militia to
protect the overland telegraph without Lin-
coln's request that he do so (p. 142). His
description of Patrick Conner as a "shame-
less bigot and an unabashed murderer" is a
questionable assessment, probably the result
of projecting Conner's post-Utah career
backwards. Most of the errors seem to be
in the early period of Utah's history and
there is no reason to believe that the other
parts of the book are similarly plagued.

My interest in the story was sustained
as the author moved into the twentieth cen-
tury and dealt with the banking problems
caused by the Great Depression and the
solutions of the New Deal; as well as the
newer generations of the Walker Family.
I believe that every student of Utah's
history would profit from reading this ex-
cellent volume.

Another Attempt at Understanding

_The Principle_ by Kathryn Smoot Cald-
well (Salt Lake City: Randall Books)

_The Principle_, Kathryn Smoot Caldwell's
first novel, received the significant encour-
gement of first prize in Randall Book's
1983 LDS Novel Writing Contest — $500
plus a $1,000 advance on royalties. (Sec-
ond and third place winners Carol Lynn
Pearson and Marilyn M. Brown received
advances on royalties for _The Lasting Peace_
and _Goodbye, Hello_, respectively.) It is de-
vously to be hoped that this contest will
become an annual feature, as Randall Book
has, in the last few years, pursued an extensive and aggressive program of publishing short, popular fiction. As someone who likes both popular and serious fiction, I'm glad to see this evidence that the writer-publisher-reader circle is a flourishing one. Without a broad public base, any art form lacks the vitality to sustain itself long, and the virtual torrent of LDS publishing unleashed by Shirley Seeley less than ten years ago is refreshing compared to the grudging trickle of the previous forty years.

By coincidence, Kathryn Caldwell and I share a common ancestor — Samuel Rose Parkinson. As nearly as I can tell, it was in his generation that a strong matriarchal family structure began. It was also this generation that practiced "the Principle." My great-grandmother ran things. So did my grandmother. And my mother's three sisters. In the novel, men make the precipitating actions but women, through carrying them out day after day, really have final control of the success or failure of any given venture.

Whether this pattern was an artistic choice or simply reflected the author's family history is not important. This book does, however, treat plural marriage once again as a women's problem. Caldwell's stated goal, "to understand the character and strengths of those who managed to live The Principle successfully, with dignity" (p. 1), is unfortunately limited by her decision to examine only coping skills rather than reaching for an understanding of men-women dynamics, generational tensions, or even religious issues except in purely personal terms.

The story is set in a modern frame. Shelly has learned that the baby she carries is deformed, and she is under intense pressure from her nonmember husband to abort. Feeling depressed and uncertain, she goes through long-unopened trunks in her dead aunt's attic containing the personal effects of Pauline and Sarah, the two wives of Horace Carter, Sarah's daughter Caroline, and other women. "The evidences of each woman's life were tucked carefully into the cocoon of her trunk" (p. 6).

Shelly is particularly taken with a diary that Caroline (Carlie) began in 1889 when she was seven, living on the underground with her mother in Franklin, Idaho. The diary tells of her devastation at age five when "Aunt Jenny," hiding from federal marshalls, gave birth in the church steeple and died with the infant three days later. "Uncle Horace" is her father — another shock. At fourteen, Carlie and her mother move to Provo to share the palatial home of Aunt Polly, the first wife. Seventeen-year-old Sam, locked in conflict with his father, is immediately hostile. He turns out to be Carlie's full brother, left behind at two when the pregnant Sarah had to go on the underground. They become allies as Carlie smarts over the obvious inequities between her mother's difficult life in Franklin and her Aunt Polly's life of ease in Provo. Her pain is aggravated by towngirls who mock and ostracize her for being polygamous-born. Only Horace's sudden death from a heart attack resolves her resentment.

Carlie's questions about plural marriage continue to grow and, although she finds in Aunt Polly a sympathetic listener, her questions are never answered. She and Sam do, however, make peace with her life as she learns to forgive their mother by retracing the pilgrimage the pregnant young woman had made to the farmhouse where she had been a servant.

Despite these events, much of the action takes place in talking. I was somewhat taken aback to have the seven-year-old Carlie following her father's trial in the newspapers by herself and had to keep reminding myself that she was fourteen as she engaged in adult-level conversations for the rest of the book. Her communications with Sam seemed particularly unlikely for two teenagers. In each new relationship, she learns that she must choose between loving and hating, between resenting and accepting — certainly a valuable lesson for a teenager but somewhat unlikely to be so completely assimilated and so fully implemented at such an age.

Given polygamy as a set of conditions and skipping over the initial decisions of
what, why, and why me (all questions that also deserve to be treated in fiction), Caldwell's exploration of the question "how" is a valid one. Her answer is summed up by Shelly who discovers that the secret of her ancestors' strength is "their will. They chose to love when they could have hated. How very simple. How very hard" (p. 162). This answer is also a valid one. It has the kind of luminous simplicity that can strike one as either transcendent or as simple-minded.

Almost the novel persuades me that it is transcendent, but I draw back because of what seems an irredeemable flaw in the structure of the novel itself. The frame story simply does not work. Not only is it trite beyond belief — even though true — to have a descendant read through an ancestor's diary and come away fortified, inspired, and strengthened, but the rest of Shelly's life becomes simplicity itself after her experience with the journals.

She rejects the idea of an abortion. Her husband divorces her and gets custody of their three sons. Her handicapped daughter is born, she turns the family home into a private institution for handicapped children, her daughter dies, a professor she has met three paragraphs earlier marries her, and they have a normal but rebellious daughter named Caroline who is, as the novel closes, reading through her great-grandmother's diary.

All of this slick tidiness in five pages rather offensively reminds me of the closing verses of the book of Job where somehow getting double of everything, including children, is supposed to make us feel that we have experienced a happy ending; or even that happy endings are what it's all about. Despite my misgivings about Carlie, her discoveries were not of happy endings but of a way of coping with the ragged, jagged pieces of living. Caldwell should have quit while she was ahead.

"Strange Fever: " Women West

"This past winter there has been a strange fever raging here . . . . It seems to be contagious and it is raging terribly, nothing seems to stop it but to tear up and take a six months trip across the plains with ox teams to the Pacific Ocean" (p. 209). Keturah Belknap, the twenty-eight-year-old devout Methodist who made this entry in her "memorandum" early in the spring of 1847, caught the "strange fever" herself and shortly thereafter headed west. She and her family eventually settled in eastern Oregon. Her chronicle of that journey, a classic in its attention to the details of preparation, is one of several engrossing commentaries in this first book of a ten-volume compilation of diaries and letters of pioneer women.

The first volume, covering 1840-49, includes the contributions of thirteen women. Kenneth Holmes, the editor, has framed each section with a prologue and epilogue to establish each woman in her personal context. As Holmes suggests, these contexts are as important as the journals themselves.

The original criterion for inclusion in the series was that the journal not be readily available being either unpublished or published in very limited editions. However, the letters of Tamsen Donner and Virginia Reed of the Donner party have been included here apparently because they have never been published precisely as
