

Correction: LOXL2-Mediated Matrix Remodeling in Metastasis and Mammary Gland Involution

Holly E. Barker, Joan Chang, Thomas R. Cox, Georgina Lang, Demelza Bird, Monica Nicolau, Holly R. Evans, Alison Gartland, and Janine T. Erler

In the original version of this article (1), the same β -actin control was duplicated in Fig. 5B and Supplementary Fig. S6A. This duplication was intentional, as the data were derived from the same Western blot experiment. The legend of Fig. 5B has been corrected to state this in the latest online HTML and PDF versions of the article. The authors regret any misunderstanding this may have caused.
