Notes for Contributors

Authors are requested to submit their papers by e-mail to J. Delli Priscoli: Jerome.DelliPriscoli@WRC01.USACE.ARMY.MIL. Alternatively send a hard copy, accompanied by a disk, to J. Delli Priscoli, US Army Corps of Engineers, Institute for Water Resources, 7701 Telegraph Road, Alexandria, VA 22315-3868, USA. Manuscripts must be in English.

Submission of a paper implies that it has not been published previously, that it is not under consideration for publication elsewhere, and that if accepted it will not be published elsewhere in the same form (in English or in any other language) without the written consent of the publisher.

All contributions will be peer reviewed and the journal will accept full-length original research papers, editorials and short notes on work in progress. In addition, the Editors will facilitate active discussion of topics by accepting Letters to the Editor. Review articles and special issues on key topics are encouraged.

Review process: All manuscripts are sent to a minimum of two independent reviewers. The final decision on acceptance is made by the Editor-in-Chief. Manuscripts may be sent back to the authors for revision if necessary. Revised manuscript submissions should be made as soon as possible (within six weeks) after the receipt of the reviewers’ reports.

All authors are asked to submit full contact details of three potential reviewers of their manuscript. The Editors may utilize all of these reviewers, but typically will utilize one of these and two other independent reviewers.

Manuscript Preparation

General: Manuscripts must be typewritten, double-spaced with wide margins on one side of white paper. Good quality printouts with a font size of 12 or 10pt are required. The corresponding author must be identified (include a fax number and e-mail address). Full postal addresses must be given for all co-authors. Authors should consult a recent issue of the journal for style. An electronic copy of the paper must be sent to the Editors upon submission. The Editors reserve the right to adjust style to a uniform standard. Authors should retain a copy of their manuscript since the editors and publishers do not accept responsibility for damage or loss of papers. Original manuscripts are discarded one month after publication unless the Publisher is asked to return original material after use.

Abstract: The article must be preceded by an abstract of no more than 200 words, describing the entire paper, and a keyword list (5–10 words).

Text: Follow this order when typing manuscripts: Title (10 words is the desired maximum length), Authors, Affiliations, Abstract, Keywords, Main texts (Introduction to explain the background work, the practical applications and the nature and purpose of the paper; Body to contain the primary message, with clear lines of thought and validation of the techniques described; Conclusion to indicate the significant contribution of the manuscript with its limitations, advantages and applications), Acknowledgements, Appendix, References, Figure Captions and Tables. Do not import the Figures or Tables into your text. Footnotes (except for Table footnotes) should be identified with superscript Arabic numbers.

Units: The SI system should be used for all scientific and laboratory data; if it is necessary to quote other units, these should be added in parentheses. Temperature should be given in degrees Celsius. The unit ‘billion’ (10^9 in America, 10^12 in Europe) is ambiguous and must not be used.

References: All publications cited in the text should be presented in a list of references following the text of the manuscript. In the text refer to the author’s name (without initials) and year of publication (e.g. “Since Peterson (1993) has shown that…” or “This is in the agreement with results obtained later (Kramer, 1994)”). For publications by three to five authors, when the names are mentioned in the text, use Smith, Jones, White and Brown (1999); when the names are not mentioned use (Smith, Jones, White & Brown, 1999) for the first instance the reference is mentioned. For subsequent references use Smith et al. 1999. For publications by more than five authors, when the names are mentioned in the text, use Smith et al. (1999); when the names are not mentioned use (Smith et al., 1999). The list of references should be arranged alphabetically by authors’ names. The manuscript should be carefully checked to ensure that the spelling of authors’ names and dates is exactly the same in the text as in the reference list. References should be given in the following form:

Illustrations: All illustrations should be provided in camera-ready form, suitable for reproduction (which may include reduction) without retouching. Photographs, charts and diagrams are all to be referred to as Figures and should be numbered consecutively in the order to which they are referred. They should accompany the manuscript, but should not be included within the text. All illustrations must be clearly marked on the back with the figure number and the author’s name. All figures are to have a caption. Captions should be grouped together using a separate sheet.

Line drawings: Good quality printouts on white paper produced in black ink are required. All lettering, graph lines and points on graphs should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal. Dye-line prints or photocopies are not suitable for reproduction. Do not use any type of shading on computer-generated illustration.

Photographs: Original photographs must be supplied as they are to be reproduced, i.e. black and white or colour. If necessary, a scale should be marked on the photograph. Because figures may be resized in the course of production, scale bars, not magnification values, should be used where applicable. Photocopies of photographs are not acceptable.

Colours: Colour figures can be accommodated in the journal, but authors will be charged the full cost for their inclusion.

Tables: Tables should be numbered consecutively and given a suitable caption and each table typed on a separate sheet. Footnotes to tables should be typed below the table and should be referred to by superscript lowercase letters. No vertical rules should be used. Tables should not duplicate results presented elsewhere in the manuscript, e.g. in graphs.

Electronic Submission

Authors must submit an electronic copy of their paper, on disk or via e-mail. The electronic copy must match the hard copy exactly. If differences are found between the disk and hard copy, the hard copy will be considered as the definitive version. Always keep a backup copy of the electronic file for reference and safety.

Although we can cope with most electronic formats, the following basic instructions should be kept in mind.

Please label all disks with:
- the operating system;
- the word-processing package;
- the filename of the article;
- the short title of the article and the authors’ names.

Text files. We can accept any of the popular word-processing packages for PC and Apple Macintosh, e.g. Word, WordPerfect, etc. The main text should be typed flush left with no indents, double line spaced using the wrap-around feature. Insert one return between paragraphs, and a double return between paper title, authors’ names, and addresses on the first page.

Graphic files. We will accept any of the popular drawing packages for PC and Apple Macintosh. However, it is essential that an original hard copy print of each figure be included. Illustrations should be logically named and saved as individual files in e.g. .tif or .eps formats. They should not be embedded within the typescript, but their approximate position should be indicated at the appropriate position in the text.

Proofs

Proofs will be sent to the corresponding author and should be returned within 48 hours of receipt; the inclusion of late corrections cannot be guaranteed. Corrections should be restricted to typesetting errors; any others may be charged to the author. Any queries should be answered in full. Proofs are to be returned to Emma Gulseven at IWA Publishing in London.

Offprints

Twenty five offprints and a copy of the issue will be supplied free of charge. Additional offprints can be ordered at a specially reduced rate using the order form sent to the corresponding author with the proof.

Copyright

Upon acceptance of a paper, authors will be asked to sign a Transfer of Copyright Agreement releasing copyright of the paper to IWA Publishing. Provision is made on the form for work performed for the United States Government (which is not subject to copyright restriction) and some United Kingdom Government work (which may be Crown Copyright) and in other extenuating circumstances. Authors are responsible for obtaining from the copyright holder permission to reproduce any material for which copyright exists.
