Erratum

Exposure of monocytes to heat shock does not increase class II expression but modulates antigen-dependent T cell responses

Ewa Mariéthoz, Fabienne Tacchini-Cottier, Muriel Jacquier-Sarlin, Fiona Sinclair and Barbara S. Polla

*International Immunology* 6:925

Figures 2 and 3 were inadvertently mixed up at the Publisher’s. The legends are correct but the images have been swapped around. The pages containing these figures, pages 927 and 928, are reproduced on the following pages in their corrected format.
