

## Editor's Note: Growth Inhibitory and Antimetastatic Effect of Green Tea Polyphenols on Metastasis-Specific Mouse Mammary Carcinoma 4T1 Cells *In vitro* and *In vivo* Systems

Manjeshwar S. Baliga, Sreelatha Meleth, and Santosh K. Katiyar

The editors are publishing this note to alert readers to a concern about this article (1):  $\beta$ -actin loading controls presented in Figs. 2A and B and 3A–D appear to be identical, and the lanes in these figures appear to have been resized. The authors confirmed that presentation of the same  $\beta$ -actin blot in Figs. 2 and 3 is correct and not a misrepresentation; original data are not available for review.
