

## **Erratum: “Effect of Temperature and Strain Rate on Mechanical Properties of 63Sn/37Pb Solder Alloy”**

**[ASME J. Electron. Packag., 121, pp. 179–185]**

**X. Q. Shi, W. Zhou, H. L. J. Pang, and Z. P. Wang**

---

The authors mistakenly stated that the paper “On Constitutive Response of 63/37 Pn/Sb Eutectic Solder,” by A. F. Skipor et al., 1996, ASME J. Eng. Mater. Technol., **118**, No. 1, pp. 1–11, covered only the temperature effect in its study of the mechanical properties of 63Sn/37Pb solder, when actually the study by Skipor et al. also includes the effect of strain rate.
