Medication Questionnaire

The Department of Anesthesiology, Perioperative and Pain Medicine of the Brigham and Women's Hospital is interested in making your anesthetic experience safe and comfortable. Part of the safety factor is knowing what kinds of medications that you are on. While many people do not consider herbal and non prescription remedies to be medications, they sometimes affect the drugs that we use for anesthesia. Please fill out the following questionnaire, indicating the remedies that you have taken at any time during the last 3 months.
