## ADA DIRECTOR, SCIENTIFIC AND MEDICAL PROGRAMS

---

The American Diabetes Association is the rapidly growing, dynamic voluntary health agency devoted to the mission of finding a preventive or cure for diabetes and to increasing the well-being of persons with diabetes and their families. We are seeking a Director, Scientific and Medical Programs, to provide staff leadership for scientific and medical programs, policies, activities, and reports within the guidelines of the officers, Board of Directors, and Councils of the Professional Section.

Reporting to the Executive Vice President, the Director will supervise professional, scientific, and research programs, medical policy and planning, and medical liaison. Representing the ADA in contacts with the professional community, the successful candidate will prepare statements and help formulate policy regarding scientific and medical matters; develop and carry out national level programs of research and professional education; guide and consult with staff on matters of medical and patient service content; plan, conduct, and attend appropriate meetings; review and direct assemblage of appropriate scientific studies and data, and participate in budget preparation and planning meetings as a member of the senior executive staff.

Applicants must have an M.D. degree or the equivalent, with at least five years clinical or scientific experience including responsibility for fiscal operations and policy. We offer compensation commensurate with experience and a comprehensive benefits package.

For consideration, resumes must contain salary history and requirements, and should be sent by April 30, 1985 to Robert S. Bolan, Executive Vice President, American Diabetes Association, 2 Park Avenue, New York, New York 10016.

The American Diabetes Association is an equal opportunity employer. Male/Female.

---
