

INDEX

A

Activity-based cost estimation 126
Additive form 130
Agent-based architectures 274
Aggregation 64, 125, 155, 157, 224
Akaike information criterion (AIC) 95
Allais paradox 17
All-in-one 206
Alternative 21, 51, 220
Alternative specific variables (ASV) 98
Analytical hierarchy process 224
Anchoring and adjustment 18
Animal model 318
Aristotle 303
Arrow's impossibility theorem 36, 45, 131, 135
Assessment 17
Attribute 21, 23, 90, 95, 126
Auctions 257
Axioms 15

B

Backward induction method 256
Bargaining 260
Barzilai's paradox 44
Bayesian analysis 31, 95, 254
Best of the best 36
Beta distribution 16
Biases 18, 63, 82
Boltzmann sigmoidal function 29
Borda count 36, 38, 40, 136
Borrowing rate 194
Business decisions 187

C

Capacity 194
Capital asset pricing model 193
Certainty equivalent 26
Characteristic matrix 288
Chi-square test 107
Choice strategies 233
Citizen's sovereignty 136
Class function 160

Cognitive psychology 316, 326
Collaborative design 243, 291
Collaborative optimization 176
Common-value auction 260
Common property resources 250
Communication tools 291
Completeness of complete order 15
Complete reversal 39
Composite decision 228
Compromise programming 158
Computational synthesis 62
Condorcet 37, 39–40, 137
Configuration 65
Conflicting design objectives 125
Consensus solutions 270
Constants-only model 97, 107
Constraint 28, 125–126, 156, 233, 295
Consumer preferences 188
Convergence 284, 287
Corporate average fuel economy 191
Corporate strategy 190
Cost models 110, 126, 194, 223
Cournot duopoly model 248
Creating design alternatives 57
Creative design 51
Cross-validation 102
Crossed array method 318
Customer-product-selection attributes 95, 205
Customer's purchasing choice 200
Customer values 51, 55, 57, 110

D

Data 39–40, 76
DCA 207
Decentralized design 243, 281–283
Decision analysis 10, 21, 135, 219
Decision-based design (DBD) 5, 22, 43, 67, 90, 135, 173, 203, 205–206
Decision-making 35, 135, 187–188, 228, 234–235
Decision-matrix 135
Decision production system 229, 238
Decision rule 35
Decision support 232, 325

Decision theory 135, 315–316, 326
 Decision tree 253
 Decision variables 125–126
 Decomposition 232, 240, 282
 Demand modeling 70, 73, 95, 189, 205, 207, 210
 Demographics 200
 Design 62, 135, 187, 292
 Design decisions 51, 126, 198, 231, 325–326
 Design for manufacturability 66
 Design freedom 70
 Design objectives 292, 294
 Design quality 52
 Design requirements 293
 Design structure matrix 217
 Design variables 155
 Desirable range 160
 Deviation variables 159, 163
 Differentiation 187
 Directed graph 252
 Disaggregate demand 76
 Disconnected feasible domains 208
 Discount rate 193
 Discrete choice analysis 91, 156, 223
 Dissertation 312
 Distributed design 243, 265, 293
 Divergence 284, 287
 Dominated design point 157
 Duopoly game 249
 Dutch auctions 259

E

Economic decisions 135, 187
 Einstein 304
 Elastic 188
 Elections 136
 Engineering decisions 37, 41
 Engineering design 187, 203, 205, 207, 228
 English auction 259
 Enterprise 171, 203
 Environmental impact 126
 Epistemic uncertainty 223
 Epistemology 303, 306, 317
 Equality constraint 156
 Equally likely model 96
 Excitve attributes 95
 Expectations 22
 Expected utility 16–17, 21, 208, 212
 Expected value 69, 316–317
 Experimental error 35, 319

F

Faulty data 36
 Feasible design 155
 Finance 187
 Firm 187–188
 First price auction 257

Force resolution 39
 Formulation 125
 Function 62
 Fuzzy front end 235

G

Game theory 10, 45, 243, 255, 283, 317
 Generating alternatives 135
 Globalization 109
 Goal programming 159
 Gödel 304
 Group design 131

H

Hard classes 160
 “Hard” partition 68
 Hegel 304
 Heuristic methods 18, 240, 316
 Hierarchical model 204, 207, 209, 319
 Highly desirable 164
 Highly undesirable range 160
 House of Quality 125, 141, 315, 325, 327, 329–330, 334
 Hypothetical equivalents 148

I

Ideal design 68
 Ideal range 160
 Implicit commitments 70
 Independence conditions 129
 Independence of irrelevant alternatives (IIA) principle 92, 136, 147, 208
 Independently and identically distributed (IID) 92
 Indifference point 148–149
 Individual private value auction 257
 Inelastic 188
 Inequality constraint 156
 Information 135, 235, 317
 Inheritance 317
 Innate and absolute truths 304
 Interaction matrix 269
 Interdisciplinary project teams 230
 Internal consistency of a design method 303
 Intransitive 146
 Investment decision 187, 193
 Irrational 130
 Iterative approach 36, 200

K

Kano method 94
 Kant 304
 Kuhn 304

L

Less-is-better 136
 Linear optimization 156

Linear physical programming 160
 Locke 303
 Logit model 92, 112, 211
 Lottery methods 17, 21

M

Macroeconomic conditions 200
 Management decisions 231
 Marketing research 118
 Market segmentation 190
 Material disclosure statements (MDS) 238
 Measurement 43, 45–46
 Median voter model 249
 Misconceptions 125, 128
 MNL model 208
 Modeling maintenance 30, 200, 235
 Monotonicity 15–16, 23–24
 More-is-better 136
 M.S. thesis 312
 Multi-agent design architecture (MADA) 274
 Multi-attribute decision-making 123, 145
 Multi-attribute utility analysis 22, 125–126, 130
 Multi-objective optimization 123, 155–156
 Multicriteria decision-making 10, 36, 123
 Multilevel optimization 206
 Multinomial analysis 91
 Multiplicative 127
 Must-be attributes 94

N

Nash equilibrium 247, 261, 283–284, 287
 Neoclassical economics 135
 Neutral setting 40
 No imposed orders 136
 Nominal-is-best 136
 Non-convex set 158
 Non-dominated points 157
 Non-hierarchical MDO 204
 Nonlinear optimization 156
 Nonlinear physical programming 163
 Non-nested test 107
 Normative decision analysis 13, 15, 22, 326
 Nuclear deterrence 256

O

Objective 21
 Objective function 126, 155
 Objective utility function 126
 One-factor-at-a-time 320
 One versus others (OVO) 161
 Online polling 8
 Opportunity cost of capital 193
 Optimal capacity 196
 Optimization 125–126, 155–156, 173, 187
 Optimization under uncertainty 174
 Options 22
 Organization 228

Organization chart 229
 Orthogonal arrays 317
 Overconfidence 18

P

Pace of innovation 110
 Pairwise comparison 135–137, 146
 Pareto optimality 125, 136, 157, 261
 Payoff 247
 Performance validation 306
 Phyrro 303
 Plato 303
 Positional rule 36, 41
 Positive response 136
 Positivism 303
 Posterior information 31
 Practical method 292
 Predictive models 30
 Preferences 15–16, 25, 29–30, 43–46, 127, 135, 150, 157, 159–160, 220, 224
 Preferential independence 129
 Price elasticity of demand 188
 Pricing 112
 Principle of reflection 44–46
 Prior information 31
 Probabilities 16
 Probability-density function 68
 Probit 77, 91
 Product architecture 222
 Product decisions 187
 Product development firm 189, 198, 227
 Product differentiation 199
 Production output 187–188
 Product market segment 191
 Product performance vector 126
 Product planning 109
 Product pricing 187–188
 Product valuation 187
 Profit 89, 187, 205, 212, 231
 Project evaluation and review technique (PERT) 16
 Prudential algebra 234
 Pseudo R-square values 107
 Pugh concept selection 135, 315, 322

Q

Qualitative 327, 334, 335
 Qualitative assessment 338
 Quality 126
 Quality function deployment (QFD) 10, 35, 325
 Quantitative 327, 334–335
 Quantitative assessment 338
 Quine, 304

R

Random process 2, 3, 330–332
 Ranges of desirability 160

Ranking disk 39
 Rank reversals 137
 Rationality 136, 233–234
 Rational reaction set (RRS) 284, 286
 Reductionism 304
 Representing decision-making systems 237
 Restricted-unrestricted relationship 107
 Revealed choice 93
 Reverse engineering 63–64
 Risk 24, 26, 135
 Robust 151
 Robust parameter design 315
 Robust topological preliminary design exploration method (RTPDEM) 307
 Rules-of-thumb 233

S

Satisficing 137
 Scaling 21, 43, 45–46, 127, 158
 Scientific knowledge 305
 Second price auction 251
 Selection criterion 91
 Sellars 304
 Sensitivity analysis 131
 Sequential decisions 252
 Sequential game 252
 Side constraint 156
 Signal-to-noise ratio 25, 320
 Single-attribute utility 22
 Single-objective 156
 Single-criterion 10
 Societal context 187
 Soft classes 69, 160
 Sparsity of effects 319
 Splines 164
 Stackelberg duopoly model 256
 Stated choice 93
 Stochastic 156
 Strategic form game 245, 247
 Strategy profile 247
 Strength of preference 146–147, 150
 Strictly dominant 246
 Subjective 130
 Subjective measurement 43, 45–46
 Substitution-independence 16
 Suh's independence axiom 129–130
 Suspension design 209
 Swimlane diagrams 237
 Symmetry cancellation 39
 Synthesis 132, 200

T

Tacit knowledge 316
 Taguchi methods 317, 322

Target cascading 206, 208
 Target-setting 71
 Task-level coordination 296
 Taste parameters 95
 Team design 132
 Theory of inventive problem solving 315
 Theory of the firm 227
 Tolerable range 160
 Top-level customer desires 92
 Toyota paradox 71
 Trade-offs 125, 130, 132, 187
 Transitivity 15
 Tree 253
 Turnbuckle 128

U

Unacceptable range 160
 Uncertainty 10, 16, 18, 67, 132, 135, 223
 Undesirable range 160
 Unrestricted axiom 136
 Usefulness 306
 Utility 13, 17, 21, 43–45, 70, 89, 129, 135, 316

V

Validation 193, 301, 303, 315, 327
 Validation criteria 325–326, 330, 333, 338
 Validation square 305, 316
 Value 21, 52, 292, 295
 Value aggregation 292, 295–296
 Value-focused thinking 293
 Value of a game 45
 Value of information 223
 Value shops 200
 Variation 223
 Verification 303
 Von neumann and Morgenstern 15
 Voting rules 35–36

W

Weak orders 136
 Weak scales 43–46
 Weighted average 127
 Weighted average cost of capital 194
 Weighted square sum 158
 Weighted sum method 157
 Wittgenstein 303–304
 Worst of the worst 36

Z

Zero-model 107
