

# Subject Index

---

- A**
- Abscesses, nonstaphylococcal, in diabetes (Letter), 317
  - Absorption,
    - continuous subcutaneous insulin infusion and, change in basal infusion rate, 561
    - dissociation of insulin, and blood flow during injection-site massage, 570
    - effects of mixing short- and intermediate-acting insulins and, 587
  - Accu-Chek, comparison of five glucose meters for self-monitoring (Technical Section), 70
  - Acute-phase response, continuous subcutaneous insulin infusion and provocation of, 50
  - Adherence, family effect on, 179
  - Adolescents, subjective symptoms, blood glucose estimation, and blood glucose concentrations in diabetes, 236
  - Age,
    - blood glucose estimation, subjective symptoms, and blood glucose concentrations in adolescents, 236
    - long-term insulinoma therapy with verapamil in 94-yr-old woman (Case Report), 186
    - prevalence of insulin deficiency in initially non-insulin-dependent middle-aged diabetic individuals, 228
    - risk factors in diabetic retinopathy, population-based study, 334
  - Allergy, generalized, due to zinc and protamine in insulin preparation (Letter), 552
  - Allergy, insulin (Letter), 99
  - Ambulation, telemetry device for glucose monitoring (Technical Section), 298
  - American Indians, diabetes and, a growing problem, 609
  - Anti-insulin antibodies, metabolic deterioration after continuous subcutaneous insulin infusion interruption (Letter), 673
  - Antiplatelet agents, effects after amputation for gangrene, 140
  - Antithrombin III activity, metabolic control effects on, 32
  - Apoproteins, comparison with plasma lipoproteins in non-insulin-dependent diabetic Chinese and American subjects, 395
  - Arterial disease, Doppler recognition of preclinical changes in arterial wall of diabetic subjects, 27
  - Aspirin, effects on atherosclerotic vascular disease rates after amputation for gangrene, 140
  - Atherosclerotic vascular disease, effects of antiplatelet agents after amputation for gangrene, 140
  - Authorship and academic advancement (Editorial), 308
  - Autoimmunity, South Indian patients with insulin-dependent diabetes mellitus and (Letter), 435
  - Autonomic nerve function, bacteriuria and, in diabetic women, 460
  - Autonomic neuropathy, insights and future prospects (Review), 648
- B**
- Bacteriuria,
    - asymptomatic, hemoglobin A<sub>1</sub> and, 518
    - autonomic nerve function and, in diabetic women, 460
  - Basal infusion rate, change in, and insulin absorption rate, 561
  - Bedside blood glucose monitoring (Position Statement), 89
  - Biostator-induced insulin aggregation, solution to problem of, 356
  - Birth, prognostic significance of birth size of maternal non-insulin-dependent diabetes mellitus prospective study, 359
  - Blood,
    - effects of sorbinil on erythrocytes and platelets in diabetes, 36
    - platelet  $\alpha$ -adrenergic binding sites, decrease in diabetes, 277
  - Blood glucose,
    - bedside-monitoring techniques, diabetic decompensation and (Technical Section), 77
    - body weight and, correlation with development of diabetic retinopathy (Letter), 104

- closed-loop intraperitoneal insulin in type I diabetes and, 124  
 comparison of five meters for self-monitoring (Technical Section), 70  
 estimation, subjective symptoms, and blood glucose concentrations in adolescents, 236  
 monitoring, bedside in hospitals (Position Statement), 89  
 perioperative control in diabetes patients, 40  
 precision index for evaluation of self-monitoring techniques (Letter), 319  
 self-monitoring, danger of techniques in hospital wards (Letter), 320  
 self-monitoring, behavioral skills in, relationship to accuracy, 330
- Bone age, glycemic control and, association with muscle capillary basement membrane width, in diabetic children after puberty, 453
- Breakfast, effect of exchange of ham for boiled egg on plasma glucose and insulin response in normal subjects, 46
- C**
- C-peptide concentrations,  
 and oral antidiabetic agents, secondary failure to treatment with, in non-insulin-dependent diabetes, 129  
 plasma glucose, and serum insulin responses to three isocaloric breakfasts in non-insulin-dependent diabetes subjects, 250
- C-reactive protein, continuous subcutaneous insulin infusion and acute-phase response, 50
- Calcium-channel blocking agents, in urticaria treatment (Letter), 215
- Carbohydrates,  
 glycemic effects of (Special Article), 641  
 metabolic effects of white beans processed into two physical forms, 260
- Cardiac adjustment, impaired, to pregnancy in type I diabetes, 377
- Cardiac autonomic neuropathy,  
 normalized with glycemic control (Letter), 311  
 decreased exercise heart rate and blood pressure in diabetic subjects with, 389
- Child abuse, insulin-dependent diabetes mellitus and (Special Article), 302
- Children,  
 abuse and insulin-dependent diabetes (Special Article), 302  
 psychological adjustment of, recently diagnosed with diabetes mellitus, 323  
 self-reports of psychologic adjustment during first year of IDDM, 472
- Choreoathetosis and uncontrolled diabetes mellitus, and basal ganglia calcification (Letter), 100
- Clinical Education Program, altering physicians' practice patterns, program evaluation (Special Article), 420
- Closed-loop intraperitoneal insulin, blood glucose and, 124
- Compliance, arterial wall, Doppler recognition of preclinical changes in diabetic subjects, 27
- Computers, effect of computer-based learning on diabetes knowledge and control, 504
- Computers,  
 meeting report of First International Symposium on Computer Systems for Insulin Adjustment in Diabetes Mellitus (Letter), 208  
 personal, programs for self-monitoring of blood glucose and self-adjustment of insulin dosage (Technical Section), 61
- Continuing medical education, assessment of diabetes, 11
- Continuous subcutaneous insulin infusion,  
 acute-phase response and, 50  
 hypoglycemia and counterregulation, comparison with conventional insulin injection therapy, 221  
 malfunction of, one-year prospective study, 351  
 basal infusion rate change and absorption rate, 561  
 overnight interruption of wearing insulin pump, substitution dose and injection site, 565  
 surveillance in Florida, use in cohort, 591  
 anti-insulin antibodies and metabolic deterioration after interruption of (Letter), 673
- Coronary heart disease, risk reduction of, in patients with non-insulin-dependent diabetes mellitus, 601
- Corticosteroid infusion, low-dose, insulin-pump use and (Letter), 318
- Cost-benefit, inaccuracies in (Letter), 553
- D**
- Deafness,  
 Wolfram syndrome and, case report and literature review, 405  
 Wolfram syndrome and, 521
- Depression, psychosocial context, the person and diabetes (Special Article), 194
- Diabetes Annual/1, The* (Book Review), 441
- Diabetes Family Behavior Checklist, family effect on adherence and metabolic control, 179
- Diabetes care,  
 high-tech, present and future (Editorial), 87  
 rural areas and, clinical and metabolic evaluation, 509
- Diabetes in America* (Book Review), 559
- Diabetes insipidus,  
 Wolfram syndrome and, case report and literature review, 405  
 Wolfram syndrome and, 521
- Diabetes mellitus,  
 Wolfram syndrome and, case report and literature review, 405  
 Wolfram syndrome and, 521  
 incidence, prevalence, and mortality, three-city study, 343  
 management of obesity, comparison of advice education with group management, 490  
 psychological adjustment of recently diagnosed children, 323

- Diabetes, gestational, longitudinal assessment of glycosylated blood protein concentrations in, 107
- Diabetic autonomic neuropathy, insights and future prospects (Review), 648
- Diabetic decompensation, bedside glucose-monitoring techniques (Technical Section), 77
- Diabetic parturient, stress-free labor and (Letter), 555
- Diet,  
 comparison of plasma glucose, serum insulin, and C-peptide responses to three isocaloric breakfasts in non-insulin-dependent diabetes mellitus subjects, 250  
 composition of mixed meals on insulin, glucagon, and somatostatin, 244  
 effect of exchange of ham for boiled egg on plasma glucose and insulin responses in normal subjects, 46  
 glycemic response to pasta, effect of surface area, degree of cooking, and protein enrichment, 401  
 induced essential fatty acid deficiency in ambulatory patient with type I diabetes (Case Report), 291  
 metabolic effect of fructose feeding in diabetic subjects, 111  
 metabolic effects of white beans processed into two physical forms, 260  
 metabolic effects of meal size alteration, and preprogrammed intravenous insulin infusion, 283  
 nutritional risk of high-carbohydrate guar gum supplementation in non-insulin-dependent diabetes mellitus, 497  
 patient perspective on nonadherence, 168  
 patient vs. physician explanation of noncompliance (Letter), 434
- Dipyridamole, effects on atherosclerotic vascular disease rates after amputation for gangrene, 140
- Disposable syringe,  
 insulin levels after injection with, 637  
 silicone oil release from (Letter), 672
- Doppler ultrasound, preclinical changes in arterial wall in diabetic subjects, 27
- E**
- Eating disorders, subclinical, and glycemic control in adolescents with type I diabetes, 162
- Education,  
 altering physicians' practice patterns, evaluation of clinical, assessing value of patient (Letter), 553  
 comparison of advice, with group management, in obese patients with diabetes mellitus, 490  
 computer-based learning, effect on diabetes knowledge and control, 504  
 continuing medical, assessment of diabetes, 11  
 costs and benefits of outpatient education and nutrition counseling, 81  
 patient perspective on nonadherence, 168  
 Program of ADA (Special Article), 420  
 psychosocial context, the person and diabetes (Special Article), 194
- randomized study on effects of home-education program, 173  
 strategies with diabetic patients (Letter), 674  
 study, controlled trial of effects of patient, 1  
 third-party reimbursement for outpatient (Letter), 93  
 third-party reimbursement, cost-benefit rationale (Letter), 554
- Electrocardiogram, screening method for diabetic autonomic neuropathy (Letter), 103
- Electrocardiography, exercise study of asymptomatic myocardial ischemia and relationship to diabetic neuropathy, 384
- Environment, rural, diabetes care in, 509
- Erythrocytes, effects of sorbinil on erythrocytes and platelets in diabetes, 36
- Exercise,  
 decreased heart rate and blood pressure response in diabetic subjects with cardiac autonomic neuropathy, 389  
 electrocardiography study of asymptomatic myocardial ischemia and relationship to diabetic neuropathy, 384  
 patient perspective on nonadherence, 168
- Extremities, focal infarction of muscle in diabetics, 623
- F**
- Family, child abuse and insulin-dependent diabetes (Special Article), 302
- Fasting plasma glucose, glycosylated hemoglobin and, comparative reliability in non-insulin-dependent diabetes mellitus, 371
- Fat atrophy, human insulin therapy and (Letter), 436
- Fat distribution, obesity and, in Mexican American and non-Hispanic Caucasians, role in non-insulin-dependent diabetes mellitus, 153
- Fatty acid deficiency, diet-induced, in ambulatory patient with type I diabetes (Case Report), 291
- Fibrinolysis enhancement after insulin administration in non-insulin-dependent diabetes mellitus (Letter), 216
- First International Symposium on Computer Systems for Insulin Adjustment in Diabetes Mellitus (Letter), 208
- Florida, surveillance of continuous subcutaneous insulin infusion use in cohort, 591
- Fluorescein, leakage into posterior vitreous, in patients with no or minimal retinopathy, 134
- Fluorophotometry, vitreous, in patients with no or minimal retinopathy, 134
- Focal infarction of muscle in diabetics, 623
- Focal laser photocoagulation, early-treatment study of diabetic retinopathy and, good news on (Editorial), 426
- Foot,  
 diabetic, liquid crystal thermography evaluation of, 267  
 ulceration, neuropathic, plaster casts in management of, 149
- Free-insulin profiles, after intraperitoneal, intramuscular, and subcutaneous insulin administration, 575
- Fructose feeding, metabolic effect in diabetic subjects, 111

- G**
- Gastroparesis diabeticorum, jejunostomy feeding in management of (Letter), 217
- Genetics, low frequency of 5'-flanking insertion of human insulin gene in non-insulin-dependent diabetes mellitus, in Japanese, 365
- Gestational diabetes mellitus, (Position Statement), 430  
cost efficacy of routine screening, 255  
longitudinal assessment of glycosylated blood protein concentrations in, 107
- Glipizide, effect on insulin secretion (Letter), 556
- Glucagon,  
effect of mixed meals on insulin, somatostatin, and, 244  
tolbutamide, and glucose, acute insulin response to, in non-insulin-dependent diabetes mellitus, 57
- Glucose II bG, comparison of five glucose meters for self-monitoring (Technical Section), 70
- Glucose II-Dextro, comparison of five glucose meters for self-monitoring (Technical Section), 70
- Glucose reflectance photometer, comparison of five glucose meters for self-monitoring (Technical Section), 70
- Glucoscan II, comparison of five glucose meters for self-monitoring (Technical Section), 70
- Glucose homeostasis, short-term thiazide therapy and, 631
- Glucose intolerance and plasma lipids (Letters), 212, 213
- Glucose monitoring, telemetry device, with needle-type glucose sensor (Technical Section), 298
- Glucose regulation, maintenance of basal insulin secretion in severe, 232
- Glucose tolerance, diabetic nephropathy and (Letters), 315, 316
- Glucose,  
blood, perioperative control in diabetes patients, 40  
fasting plasma, glycosylated hemoglobin and, comparative reliability in non-insulin-dependent diabetes mellitus, 371  
glycemic effects of carbohydrates (Special Article), 641  
loss during acute therapy for hyperglycemic hyperosmolar syndrome, 465  
tolbutamide, and glucagon, acute insulin response to, in non-insulin-dependent diabetes mellitus, 57
- Glucose-clamp technique, effect of mixing insulins by, 579
- Glycemic control,  
and eating disorders, subclinical, in adolescents with type I diabetes, 162  
and self-care, psychosocial predictors of behavior, in non-insulin-dependent diabetes mellitus, 614  
bone age and, association with muscle capillary basement membrane width, in diabetic children after puberty, 453  
risk of proliferative diabetic retinopathy in type I diabetes and, 443
- Glycemic effects of carbohydrates (Special Article), 641
- Glycemic response,  
differential to stress (Letter), 550  
to pasta, effect of surface area, degree of cooking, and protein enrichment, 401
- Glycosylated blood protein, longitudinal assessment of, in pregnancy and gestational diabetes, 107
- Glycosylated hemoglobin, fasting plasma glucose and, comparative reliability in non-insulin-dependent diabetes mellitus, 371
- Glycosylation, nonenzymatic, effects of metabolic control on antithrombin III activity, 32
- Guar gum,  
nutritional risk of high-carbohydrate, as supplement to diet in non-insulin-dependent diabetes mellitus, 497  
sulfonlureas vs., improved glycemic control (Letter), 433
- H**
- HDL cholesterol, serum lipids, lipoproteins and, in newly diagnosed non-insulin-dependent diabetic patients, 17
- HLA, non-insulin-dependent diabetes mellitus and, in the young (Letter), 436
- Heart coronary disease, risk reduction of, in patients with non-insulin-dependent diabetes mellitus, 601
- Heart,  
asymptomatic myocardial ischemia, diabetic neuropathy and, exercise electrocardiography study, 384  
decreased exercise, heart rate and blood pressure response in diabetic subjects with cardiac autonomic neuropathy, 389  
impaired cardiac adjustment to pregnancy in type I diabetes, 377
- Hemoglobin A<sub>1c</sub>, asymptomatic bacteriuria and, 518
- Hospitalization, ketonuria in patients with non-insulin-dependent diabetes mellitus, 596
- Human insulin,  
fat atrophy in therapy (Letter), 436  
gene, low frequency of 5'-flanking insertion in Japanese, 365
- Hyperglycemia  
glucose loss during acute therapy for, 465  
perioperative control in diabetes patients, 40  
postprandial, metabolic effect of fructose feeding, 111
- Hyperglycemic hyperosmolar syndrome, glucose loss during acute therapy for, 465
- Hyperosmolar nonketotic coma and rhabdomyolysis (Letter), 100
- Hyperosmolality, glucose loss during acute therapy for, 465
- Hypertension, diabetic, current therapeutic concepts (Review), 409
- Hyperthyroidism, decreased serum C-peptide/insulin molar ratios, after oral glucose in (Letter), 550
- Hypoglycemia,  
counterregulation in insulin-dependent diabetes, 221  
perioperative control in diabetes patients, 40  
psychosocial context, the person and diabetes (Special Article), 194
- I**
- Immunoreactive insulin, secretion abnormalities in offspring of Indian patients, 53

- Immunosuppressive drugs to prevent diabetes (Letter), 214
- Indian Health Service, growth of diabetes in American Indian population, and, 609
- Infarction, focal, of muscle in diabetics, 623
- Injection,  
 continuous subcutaneous insulin infusion, comparison with conventional insulin therapy, 221  
 insulin levels after jet stream and disposable syringe, 637
- Injection site,  
 dissociation of insulin absorption and blood flow during massage of, 570  
 overnight interruption of wearing pump, and substitution dose, 565
- Insulin,  
 absorption, new jet injector vs. conventional syringes, pharmacokinetics of, 279  
 absorption rate, continuous subcutaneous infusion and basal infusion rate change, 561  
 accuracy of patient-prepared mixtures, 23  
 action after short-term thiazide therapy, 631  
 acute response to glucagon, tolbutamide, and glucose in non-insulin-dependent diabetes mellitus of the young, 57  
 allergy (Letter), 99  
 basal, delivery, plasma insulin concentrations after chronic ultralente injection, 120  
 Biostator-induced aggregation, solution to problem of, 356  
 closed-loop intraperitoneal, blood glucose and, 124  
 continuous subcutaneous insulin infusion, surveillance in Florida, use in cohort, 591  
 deficiency, prevalence in initially non-insulin-dependent diabetic middle-aged individuals, 228  
 dissociation of absorption, and blood flow during injection-site massage, 570  
 dosage, self-adjustment of, personal computer programs to aid (Technical Section), 61  
 effect of mixed meals on glucagon, somatostatin, and, 244  
 free, profiles, after intraperitoneal, intramuscular, and subcutaneous insulin administration, 575  
 human gene, low frequency of 5'-flanking insertion, in non-insulin-dependent diabetic Japanese, 365  
 infusion, intravenous, preprogrammed, metabolic effects of altering meal size, 283  
 infusion, system malfunction, one-year prospective study, 351  
 levels after jet stream and disposable syringe injection, 637  
 mixed by glucose-clamp techniques, effects of, 579  
 mixing short- and intermediate-acting, effect of, and absorption course, 587  
 mixtures, accuracy of patient preparation of, 23  
 overnight interruption of wearing pump, substitution dose and injection site, 565  
 perioperative control of blood glucose in diabetes patients, 40  
 pharmacokinetics and (Editorial), 666  
 pump delivery during parenteral hyperalimentation (Letter), 97  
 pump, continuous low-dose corticosteroid infusion and (Letter), 318  
 pump, therapist association, history and progress report (Letter), 552  
 response, effect of exchange of ham for boiled egg on, 46  
 response, effect of fructose feeding on, 111  
 secretion, abnormalities in offspring of Indian patients with type II diabetes of the young, 53  
 secretion, basal, maintenance in severe non-insulin-dependent diabetes mellitus, 232  
 secretion, glipizide effect on (Letter), 556  
 syringe reuse (Letter), 310  
 therapy, development of new jet injector for (Technical Section), 294
- Insulin-dependent diabetes mellitus,  
 autoimmunity in South Indian patients with (Letter), 435  
 children and, self-reports of psychologic adjustment during first year, 472  
 impaired cardiac adjustment to pregnancy in, 377  
 muscle capillary basement membrane width, glycemic control and bone age association in diabetic children after puberty, 453  
 psychological adjustment of recently diagnosed children, 323  
 child abuse and (Special Article), 302

 risk factors, population-based study, Rochester, Minnesota, 334

- Rhabdomyolysis and hyperosmolar nonketotic coma (Letter), 100
- Risk reduction of coronary heart disease in patients with non-insulin-dependent diabetes mellitus, 601
- S**
- Screening, for diabetes, cost efficacy of routine, in pregnancy, 255
- Selection bias (Letters), 94
- Selective survival, influence on disparity in incidence and prevalence studies (Letter), 313
- Self-care,  
 accuracy of patient-prepared mixtures, 23  
 and glycemic control, psychosocial predictors of behavior, in NIDDM, 614  
 controlled trial of diabetes education on, 1  
 patient perspective on factors contributing to nonadherence, 168  
 randomized study on effects of home-education program, 173
- Self-management, continuing medical education and, 11
- Self-monitoring,  
 behavioral skills in, relationship to accuracy, 330  
 blood glucose, danger of techniques in hospital wards (Letter), 320  
 comparison of five glucose meters (Technical Section), 70  
 effects of continuing medical education on physician recommendation of, 11  
 futility of, without algorithms for adjusting insulin doses (Letters), 209, 210  
 hand warts associated with (Letter), 316  
 multiple herpetic whitlows, children and (Letter), 438  
 personal computer programs to aid (Technical Section), 61  
 precision index for evaluation of techniques (Letter), 319  
 reliability of, with portable reflectance meter (Letter), 670
- Self-reported data, reliability of (Letters), 557
- Serum C-peptide, insulin secretion abnormalities in offspring of Indian patients with maturity-onset diabetes of the young, 53
- Serum C-peptide/insulin molar ratios, decreased, after oral glucose in hyperthyroidism (Letter), 550
- Serum amyloid A protein, continuous subcutaneous insulin infusion and acute-phase response, 50
- Serum insulin, plasma glucose, and C-peptide responses to three isocaloric breakfasts in non-insulin-dependent diabetes mellitus subjects, 250
- Serum lipids, lipoproteins and, in newly diagnosed non-insulin-dependent diabetic patients, 17
- Silicone oil, release from disposable insulin syringes (Letter), 672
- Somatostatin, effect of mixed meals on insulin, glucagon, and, 244
- Sorbinil, effects on erythrocytes and platelets in diabetes, 36
- Staphylococcus aureus*, increase in diabetes (Letter), 317
- Statistics, omission of cardiac patients and statistical bias (Letter), 433
- Stress,  
 current status of research (Editorial), 546  
 differential glycemic response to (Letter), 550  
 labor without, for diabetic parturient (Letter), 555
- Subcutaneous, intramuscular, and intraperitoneal, insulin administration, free-insulin profiles, 575
- Sulfonylureas, guar gum vs., improved glycemic control (Letter), 433
- Symptoms, subjective, blood glucose estimations and concentrations in adolescents, 236
- T**
- Technology, high-tech diabetes care, present and future (Editorial), 87
- Telemetry glucose monitoring device, with needle-type glucose sensor (Technical Section), 298
- Thermography, liquid crystal, use in evaluation of diabetic foot, 267
- Thiazide therapy, short-term, and glucose homeostasis, 631
- Third-party reimbursement,  
 cost-benefit rationale (Letter), 554  
 for outpatient education (Letter), 93
- Three-city study, of incidence, prevalence, and mortality of diabetes mellitus, 343
- Tolbutamide, glucagon, and glucose, acute insulin response to, non-insulin-dependent diabetes, 57
- Tryglicerides, serum lipids, lipoproteins and, in newly diagnosed non-insulin-dependent diabetic patients, 17
- Type I diabetes,  
 diet-induced fatty acid deficiency in ambulatory patient (Case Report), 291  
 eating disorders, subclinical, and glycemic control in adolescents, 162  
 glycemic control with closed-loop intraperitoneal insulin, 124  
 impaired cardiac adjustment to pregnancy, 377  
 risk of proliferative diabetic retinopathy and, 443
- U**
- Ulcers, neuropathic, total contact casts for (Letter), 671
- Ultralente for basal insulin delivery, plasma insulin concentrations after administration of, 120
- Urinary albumin, radioimmunoassay for, evaluation of new product (Technical Section), 189
- Urticaria treatment, calcium-channel blocking agents in (Letter), 215
- V**
- Verapamil, long-term insulinoma therapy in 94-yr-old woman (Case Report), 186

Vision,  
color, screening in diabetic patients (Letter), 669  
loss and diabetes, improving services of the ADA (Letter),  
95

Wolfram syndrome,  
case report and literature review, 405  
clinical, diagnostic, and interpretative contribution,  
521

**W**

Warts, associated with blood glucose self-monitoring (Letter), 316

**Z**

Zinc, insulin preparation and (Letter), 552
