Index

- Academic institutions, 208–209
- Access to information technology. *See also* Affordability; Content of digital resources; Electronic literacies; Rural areas comprising a broad array of factors, 46–48, 50, 51, 58, 199, 213 contact with other users affecting, 156–157 cost of computers and operating software, 32, 47, 62–63 cost of Internet access, 52 cultural barriers to, 45–46 educational level and literacy affecting, 56, 57–58, 59 lack of linguistic diversity, 92–96 physical access as only one aspect of, 118–119 race and ethnicity as a factor, 37, 55, 57–58 socioeconomic factors, 29, 37, 49–52, 54–58, 59
- Access models. *See* Conduits model of access; Devices model of access; Literacy model of access
- Affordability cost of computers and operating software, 32, 47, 62–63 cost of Internet access, 52 plans to develop low-cost systems, 65–69
- African Americans Internet access rates for, 7, 55, 56, 57–58 television diffusion rates for, 37
- Africa, sub-Saharan, 19
- Agency of International Development (USIA), 5
- Agre, P. E., 187–188, 211, 212
- Amazon.com, 64–65
- American Standard Code for Information Exchange (ASCII), 203
- Antiglobalism movement, 192, 193–195
- Apprenticeship and mentoring, 121
- Arabic language computing, 59, 101–102
- ARPANET, 24
- ASCII, 203
- Asian Americans Internet access rates, 56 school computer use by, 130–131
- Associational technologies. *See* Information and communication technology (ICT); Networks
- Audiovisual media, 27, 87
- Automobile industry information-based capitalism influencing, 15–16
- Bangladore, India, 60, 85
- Bateson, Gregory, 110
- Behavioral change, 211–212
- Beijing, China, 61

- Beijing Normal University, 143
- Bilingual programs, 135
- BITNET, 24
- Blind persons
access to information technologies,
28, 90, 169
- Bolter, Jay David, 115
- Bonding social capital, 155
- Bourdieu, Pierre, 153
- Bourguignon, Francis, and C.
Morrison, 20
- Brazil, 9, 164
Committee for Democratization of
Information, 125–127
low-cost computer development
project in, 65–66
Sampa.org project in São Paulo, 87,
165–166
- Breese Foundation, 166–167
- Bridging social capital, 155
- Broadband access, 58, 69
- Brown, J. S., A. Collins, and P.
Duguid, 124
- Bulletin boards, 105–107, 117,
187
- Bush, George W. (administration), 12,
217n.1
- Bush, Vannevar, 26, 113
- Cable television, 33–34, 73
- California, 9. *See also* Los Angeles;
Oxnard; Riverside
the 2001 energy crisis, 35
- Capitalism. *See also* Market
mechanisms
global capitalism, 12–13, 15–18
information stage of, 12–13, 38–39
- Castells, Manuel, 9, 13, 21–22, 34,
93, 218n.3
- Catalytic effects of information
technologies, 212
- Censorship of Internet content, 183,
184
- Children's Partnership study, 88,
89
- Chile, pilot program in, 142
- China, 9, 23
Beijing Normal University, 143
educational technology projects in,
142–144
Internet access in, 61–62
Internet surveillance by, 197
restrictions on Internet use in,
182–183, 185
- Chinese language, 61
- Christensen, C. M., 64–65
- Citizen feedback interactive
programs, 172–173, 177, 179–181
- Civil society, 185–187
- Class analysis, 209–210
- Class stratification
and classroom computer access,
129–137
income inequalities, 18, 20–24
and Internet diffusion, 54–55, 56
role of the English language in,
100–101, 102
- Clinton, William (Bill), 1
- Coding biases, 203–204
- Cognitive Academic Language
Proficiency, 117–118
- Collective identity, 93–95, 104–105
- Comitê para Democratização
Informática (CDI), 125–127
- Committee for Democratization of
Information, Brazil, 125–127
- Communication. *See also* Computer-
mediated communication (CMC);
Language; Multimedia; Online
communication; Print media
symbolic, 22
technology-mediated vs. face-to-face,
146, 148–149, 159
- Communication technologies. *See*
Information and communication
technology (ICT)
- Communities, 153, 186–187
assessing the information needs of,
90–91
data base development for, 91
Internet content production by,
91–92

- involvement of important to technology access, 4, 5, 163, 199–202
- learning communities, 120–121, 124
- virtual communities, 146, 159, 160–162, 187
- Community Digital Initiative, 164–165
- Community informatics, 162–163, 169
- Community involvement in technology access, 4, 5, 163, 199–202
- Community news services, 87
- Sampa.org project, 87, 165–166
- Community Radio Internet project, Sri Lanka, 170–171
- Community technology centers, 75, 76, 127, 169
- Community Technology Centers Network (CTCNet), New York, 127
- Community technology projects
- community technology centers, 75, 76, 127, 169
 - complementing community centers, 166–167
 - computer kiosks, 1, 85, 91, 163, 179
 - mapping and connecting community resources, 162–163, 165–166, 169
 - social capital promoted through, 163
 - telecentros*, 75, 76, 77–79, 199–201
- Computador popular* (people's computer) development project, Brazil, 65–66
- Computer education, 9, 125–129, 137–138, 179. *See also* Skill-levels in information technologies
- Computer-enhanced education, 129–135
- Computer kiosks, 1, 85, 91, 163, 179
- Computer literacy, 111–113, 134–135
- Computer-mediated communication (CMC), 24, 25, 27–28, 172
