Interviews and Fieldwork Archives

The oral and visual archives for this monograph are excerpted from two projects I initiated in northern and southern Zimbabwe between 2001 and 2017. The Black Bvekenyas (hence BBP) project (2001–present) is a digital documentation of four generations of a hunting family, the descendants of the early twentieth-century ivory poacher, Cecil Bvekenya Barnard. The author had extensive initial interviews with one of Bvekenya’s grandsons, Solomon Bvekenya, who then conducted the rest of the interviews. The videotapes are marked as BBP/MOV ..., the “MOV ...” denoting the specific tape’s ID. The Zambezi Valley Interviews/Gokwe/Nembudziya (hence ZVI/G/N) project (2016–2017) was a short-term research that sought local perspectives of antitsetse operations for purposes of this book. The goal was to create a digital archive that would be deposited with the local communities for future use. Asa Mudzimu, who comes from Nembudziya, conducted the set of interviews in that area. The videos are marked ZVI/G/N, with a number denoting the specific tape. The author lived at Chiroti Secondary School, close to two former tsetse gates, Deve and Chiroti, just a few miles from Sanyati River bridge, west of which lies Gokwe. This entire area, from Magunje in the east, through Zvipani, into Gokwe to the west, was deep inside *mhesvi* territory until the 1990s.
