as analogy machines, 161,
165–166
brain as, 20–22, 25, 29,
165–166, 171
conditioned reflexes in, 178–179
contingencies affecting
operation of, 163–164
data inserted at beginning in
ideal, 162–163
defined, 159
as essential for the war effort,
22–23
game-playing, 228–230,
234–239, 241–242
induction by, 172–173
learning apparatus in, 179–181
logic of, 173–174
mathematical logic and,
xxiii–xxiv, 19–20
memory and, 166–169
numerical, 161–162, 194
pathological processes in, 204
power consumed by, 181–182
for recording information,
159–161
relays used in, 164
for solution of partial
differential equations, 6, 161,
180–181
telegraph-type repeaters,
168–169
two great types of, 161
- Conditional probabilities, 96–97
- Conditioned reflexes in
computing machines,
178–179
- Conductivity, phenomena of,
25–26
- Conscience, 205
- Control by informative feedback,
154–155
- Control systems, 132–133
- Conway, Flo, xiv, xvii
- Cybernetics, or Control and
Communication in the Animal
and the Machine*
on cybernetics as lingua franca
of animals and machines,
xv–xvi, xxi–xxii
first reissue of, ix
Greek origin of name *Cybernetics*
and, 18
moral position of, 41–42
preface to second edition of,
xxxv–xlvii

- Dark Hero of the Information Age*,
xiv
- Darwin, Charles, 51–53
- Darwin, George, 50, 52
- Davis, James W., xlvii
- Death effects on the brain, 205
- De Santillana, G., 35

- Electroencephalography, 253–254
- Electrophysiology, 252–253
- Energy
 computing machine, 181–182
 human, 59–60, 181–182
- Engineering, ancient, 54–55
- Entropy, 80–83, 88, 90
- Ergodic hypothesis, 71, 77–80
- Ergodic transformations, 78–80
- Ericsson, M., 27
- Evolution, Darwinian, 51–52
- Ex-Prodigy: My Childhood and
 Youth*, xiv, xvii
- Exterior points, 137
- Facebook, xi, xii, xviii
- Feedback control, xxx, 11–12,
152
 double system of, 146
- Feedback(s)
 affective tone as, 176–177
 anticipatory, 153
 chain of transmission and
 return of information as,
 129–131
 compensator and effector,
 153–155
 complicated system stabilized
 by two, 144–145
 control by informative, 154–155
 differential operators and ranges
 of, 139–143
 double system of control and,
 146
 eye-muscle, 184–185
 homeostatic, 156–157
 in human animal reflexes,
 153–154
 infinity and, 137–138
 information and, 132–133
 interior points and, 137–139
 mathematics of, 133–137
 mechanical systems of,
 132–133
 negative, 132
 oscillations due to excessive
 amount of, 148
 of voluntary activity, 132,
 146–147
- Feedback systems, information,
xxviii–xxix
- Ferromagnetism, 169–170
- Filtering problem, time series,
114–121
- Fireflies, 275–276

- First-order programming, 238–239
Fisher, R. A., 17
Fourier transformation, 105–108,
115–119
Fremont-Smith, Frank, 26–27
