11. There was a surge in tweets linking #YesAllWomen on April 6, 2015, when two automated accounts with large followings (@WeNeedFeminslm and @SincerelyTumblr) retweeted old #YesAllWomen tweets, which were in turn retweeted by several of their followers. The decision to retweet on April 6 appears to have been idiosyncratic, unattached to activity elsewhere on Twitter or to any external events or anniversaries that may have prompted the resurgence.

20. #WhyIStayed was the first among those we examined to include a large number of pornographic images propagated by bots or automated accounts. Although we cannot be sure why pornographic bots appeared here, the fact that they first appeared in a hashtag associated with violence perpetrated against a Black woman is evocative of Safiya Noble's intersectional critique of algorithmic bias against women of color. See Safiya Umoja Noble, *Algorithms of Oppression: How Search Engines Reinforce Racism* (New York: New York University Press, 2018). For purposes of our analysis, we removed confirmed bots from this network and all of the networks we examine.

21. Throughout this book we use screenshots of tweets to illustrate important findings. Although the twitter data used in our analysis were

collected from the Twitter API, these screenshots were collected at various times throughout 2015–2018 as we completed our analysis. The text content of tweets retrieved through the API and appearing in the screenshots is identical, but occasionally the visual features of the tweets, including the avatar image used by each user and the layout of the tweet, may be different from how they originally appeared.

12. Of note, the most commonly co-occurring hashtags suggest that the rapid proliferation of #FastTailedGirls was exploited by bots seeking to boost follower accounts through the use of trending hashtags. In our original data set, #FastTailedGirls appeared alongside references to college football bowl games (e.g. #BAMAvsAUB and #OSUvsMICH) that were played on the same day Kendall’s tweets appeared. Subsequent analyses used a reduced data set, referred to as the “core network,” that eliminated tweets that did not get at least one retweet.

In fact, Sylvia Rivera, founding member of some of the first gay and trans liberation organizations in America, was once similarly booed and chastised for speaking to the concerns of trans women of color at a pride rally in 1973, only a few short years after her pivotal role in starting the LGBTQ movement.

Booth writes that in television documentaries, voiceover narration often misgenders trans people, while scripts create visual spectacles by focusing overwhelmingly on physical and medical aspects of transition. These trends are indicative of how traditional media "consider the comfort level of the dominant public above that of the transgender public, even though transgender lives are being represented" (p. 115).

24. The #GirlsLikeUs hashtag predates Janet Mock's deployment. It was initially a little-used hashtag promoting the film *Girls Like Us*, a short-lived, now squelched Joni Mitchell biopic set to star Taylor Swift. The studio attempted to make the hashtag popular by repeatedly tweeting the tag and getting Swift fans to reblog it. However, no one created

original tweets with the hashtag, and when the project was shelved, there was little trace of the tag when Mock generated it herself. This demonstrates the ephemeral nature of hashtag use if the particular initiating use of a tag does not resonate widely.

28. As in other groups, class status and race have an impact on the lives of different trans women and shape their political perspectives differently. @xoAMILLAxo's conservative ideology is likely in part informed by her class and race privilege. Similarly, Caitlyn Jenner's conservatism has prompted confusion, including during a 2015 interview with Ellen Degeneres after Jenner mentioned her own reticence around the issue of gay marriage, prompting Degeneres to say she expected Jenner to have a more left-leaning political stance on transitioning. Degeneres conflated Jenner's transition not only with a liberal political perspective but also with her views on sexuality.

Notably, filmmaker Spike Lee tweeted what he mistakenly believed to be the home address of George Zimmerman. 17. This is not to say that those opposing the claims and demands of the Black Lives Matter networks on Twitter did not share and spread their ideas, simply that they were largely unsuccessful in doing so vis-à-vis the hashtags created by and within the networks by activists and everyday people we've examined up to this point. Instead, those working to justify police use of force generally created and interacted on their own hashtags, such as #AllLivesMatter, #BlueLivesMatter, and the nonsubtly racist #PantsUpDontShoot.

However, these hashtags were the most used ally hashtags during the period of our data collection. While we hoped to focus on organic allyship, for this chapter, only #CrimingWhileWhite ultimately met this expectation. Unlike #CrimingWhileWhite and the other hashtags examined in this book and chapter, which were created spontaneously by members of the networks we analyze, the most circulated examples of digital allyship by men on behalf of women, including #AllMenCan, were started by organizations or women hoping to encourage men to play a more active role in digital feminism.
