

ACKNOWLEDGMENTS

The researching and writing of this book have benefited greatly from a fellowship from the American Association of University Women Educational Foundation American Postdoctoral Fellowship for the 2004–5 academic year. The project was further advanced by a sabbatical from Gettysburg College in 2005–6. I am especially grateful to the former Provost of the college, Daniel DeNicola, for encouraging me to apply for the AAUW fellowship and for making it possible to take two years off from teaching. I am also grateful to Gettysburg College for its supplemental financial support while I was an AAUW fellow as well as for its ongoing support of my research at Cerro Palenque. Some of the publication costs have been funded by a Mellon grant to Gettysburg College.

This book draws in part on the results of my own

field research and in part on the work of others. The Instituto Hondureño de Antropología e Historia (IHAH) and its staff have been crucial to the success of my research in Honduras over the years. I am very grateful for permission to conduct research in Honduras and for the Instituto's ongoing support of my work. I thank the Director of IHAH, Dr. Dario Euraque, for his gracious permission to use data from Honduras in this study. The late Lic. Juan Alberto Durón, in his capacity as supervisor of sites and antiquities for the departments of Cortés and Yoro, was critical to my efforts to conduct research at Cerro Palenque and to those of myself and my codirector when we worked in the Cuyumapa valley.

The Corpus Archive Program of the Peabody Museum at Harvard University, Dumbarton Oaks, Kerr Associates, US Games Systems, Inc., and the National Museum of the American Indian (NMAI) gave permission to reproduce images from their collections or publications. I am grateful to Helen Najarian (Peabody Museum Press), Hilary Parkinson (Dumbarton Oaks), Bobbie Bensaid (US Games Systems), Barbara Kerr (Kerr Associates), and Lou Stancari (NMAI) for their prompt and helpful responses to my requests. Rosemary Joyce, Nancy Gonlin, Christopher Fung, and John Fox kindly gave permission to use drawings or photographs.

Parts of chapters 1, 3, and 4 were previously published as "Maya Home Life: Daily Practice, Politics, and Society in Copan, Honduras," in *Domestic Life in Prehispanic Capitals: A Study of Specialization, Hierarchy, and Ethnicity*, edited by L. R. Manzanilla and C. Chapdelaine. (Memoirs, no. 46, University of Michigan, Museum of Anthropology, © 2009, reproduced with permission). Part of chapter 4 previously appeared in "Textile Production as Craft in Mesoamerica," *Journal of Social Archaeology* 2, no. 2 (© 2009 by Sage Publications Ltd/Sage Publications, Inc., all rights reserved).

Financial support for the research I carried out has come from several sources over the years. The support of these organizations is gratefully acknowledged, and they are absolved of all responsibility for the ideas presented in this study. Funding for my work at Copan came from a National Science Dissertation Improvement Grant (BNS-8319347), the Proyecto Arqueológico Copan Fase II (directed by William T. Sanders), and the Owens fund of the Peabody Museum of Harvard University.

Claude F. Baudez, director of the first phase of the Proyecto Arqueológico Copán, and William T. Sanders, director of its second phase, graciously allowed me to work at Copan. Bill Sanders's willingness to allow me to base my dissertation on material from all excavations in the Sepulturas area repre-

sents a model of collegiality and intellectual generosity. The development of my understanding of Copan's archaeology and history began under the tutelage of William L. Fash, who was not only remarkably patient with me, an inexperienced fellow graduate student, but also had the good sense to let me sink or swim in the field. Meli Diamanti, Andrea Gerstle, and Ann-Corinne Freter provided support of all kinds during the Copan field seasons. The late Gordon R. Willey set me on the path that led me to Honduras. Without his unfailing intellectual, emotional, and financial support, my experiences in Maya archaeology would never have happened and this book would not have been possible.

The work in the Cuyumapa valley was a joint effort with Rosemary A. Joyce. I thank Rosemary for inviting me to codirect the project, for sharing her stimulating ideas, and for offering supportive feedback, actions that have enriched my thinking about Cuyumapa, Cerro Palenque, and Copan and about Mesoamerica generally. Project funding for the Cuyumapa work was supplied by grants from the National Science Foundation to Joyce and to Joyce, me, and Christopher Fung in the form of a Dissertation Improvement Grant (BNS-9310671), by the Wenner-Gren Foundation for Anthropological Research to John G. Fox, and by the Peabody Museum Bowditch Exploration Fund. Russell Sheptak carried out the aerial photograph analysis at the beginning of the project. Rus, John, and Chris, along with Stella Kao, John Gerry, and Laura O'Rourke, contributed important field and analytical work to the project.

My fieldwork at Cerro Palenque has been supported by grants from the Gettysburg College Research and Professional Development fund and a Presidential Research Fellowship, the H. John Heinz III Fund (Heinz Family Foundation), the National Science Foundation (BCS-0207114), and the Stahl Endowment and Committee on Research of the University of California, Berkeley. Field, laboratory, and research assistance for the Cerro Palenque project has been provided by Kira Blaisdell-Sloan, Megan Case, Sarah Dunham, Brian Heinsman, Jeanne Lopiparo, Anne Norman, Mike Rhodes, Jenny Smith, Kirsten Triplett, and Amy Yarnell. Diane Ballinger carried out the analysis of the Cerro Palenque faunal and human remains. Shanti Morell-Hart carried out the analysis of the light fraction of the Cerro Palenque flotation samples. Rosemary Joyce's assistance with the classification of the Cerro Palenque pottery and artifacts from my excavations has been crucial to the comparative project discussed here. The hard work and creative energy of all these people is much appreciated.

I would like to thank Lynn Meskell for her interest in including this book in the series, *Material Worlds*. Her encouragement over the period it took to write the book is greatly appreciated. The two anonymous reviewers provided substantive comments that have improved the arguments presented here although they are not responsible for the direction in which I have taken those arguments. It has been a pleasure to work with Ken Wissoker, Editorial Director of Duke University Press, and the staff of the press. Thank you to Leigh Barnwell, Editorial Associate, and the design department for their work on the illustrations. Thank you also to Mark Mastromarino, Assistant Managing Editor, for his care in seeing the manuscript through to publication.

It is my parents, Rufus S. Hendon and the late Jane Bein Hendon, who are ultimately responsible for this book. They encouraged me in my chosen profession, supported me throughout the lengthy process of fieldwork, dissertation writing, and job searching, and always made me feel that my ideas had merit. Their experiences in Indonesia and Malaysia before I was born became a touchstone for me as I navigated my way through the culture shock, linguistic pitfalls, and excitement of living and working in Honduras.
