

SUBJECT INDEX

SUBJECT INDEX

- accommodation space, 31, 40, 422
aggradation potential, 53, 68
Alicante, 291–302
Alps
 Northern Calcareous, 753–62
 southern, 703–17, 721–46
 western, 625–39
 ammonite biostratigraphy, 585
ammonites, 365, 366, 371, 373, 377, 380, 381, 383
Anglo-Paris Basin, 365–86
Antarctica, 75, 77, 78
Apennines, 53, 54, 55
Arctic domain, 645
- A
- Barents Sea, 653–67
Basco-Cantabrian Basin, 335–42
basin analysis, 165–76
Basque basin, 313, 314, 315
Belgium, 121–52
Belice, 183, 190–91, 192
Berriasian-Barremian, 425–41
biostratigraphy, 91, 92–93, 305–10, 365–66, 371, 404, 406, 408
block-faulting events. *See* tectonic (block-faulting) events
Boreal domain, 647
British Isles, 565–82. *See also* Great Britain
- B
- Capodarso, 183–85, 195
carbonate platform margin, 53–71
carbonate platforms, 291, 292, 295, 296, 297, 298, 299, 300, 537
carbonate ramp, 335–42
Cenomanian, 365–86
Cenozoic, 91–115, 247, 257
continental encroachment cycle, 45–51
correlative conformities, 3, 4–5
Cretaceous, 75–79, 335–42
cycle, 263–87
cycle stratigraphy, 345–62
- C
- dating, 292, 295, 300
depositional environment, 97, 100, 101, 102, 103–4, 106, 107–8, 677, 679,
 681, 683, 753, 754–56, 757, 759, 760
depositional sequences, 235, 237, 244–46, 547, 554–59
depositional units, 216–17
Dolomites, 721–46
downlap surface, 43, 44, 46, 47, 50, 51
- D
- Early Jurassic, 585–622
Eocene, 291
epicontinental ramp, 345
epicontinental sea, 547
episutural basin, 235
escarpment, 53, 54, 59, 61, 71
estuarine sediments, 413
Europe, western, 399–408, 447–66, 469–80
eustasy, 703, 705, 707, 716–17
eustatic, 547, 554, 555, 556, 557, 560
eustatic fluctuations, 291
- E
- facies analysis, 291, 292
Fe-enriched deposits, 547, 548, 552, 553, 559
- F
- foraminifers, 337
France, 585, 669–91, 693–701. *See also* Paris Basin
 southeastern, 425–41, 625–39
- G
- Germanic domain, 645, 646, 648, 650
Gibraltar Arc, 201–9
glaciation, 302
glacioeustasy, 77–78, 230–31, 247–60, 291, 301, 302
global control on sea level by waxing and waning ice sheets, 302
graphic correlation, 263, 264, 265, 266, 271, 274, 279, 281, 283, 287
Great Britain, 585, 586, 602–15. *See also* British Isles
growth folds, 181–97
growth rate, 182, 185, 190, 192, 195
- H
- hemipelagic, 313, 315
hierarchy, 15, 31, 40, 41
high-order cyclicity, 318–19
- I
- ice sheets, waxing and waning, global control on sea level by, 302
incision, 419
Inner Moray Firth (IMF), 483, 484, 486, 487, 488, 490, 491, 494, 501, 502,
 503, 504, 505
intra-cratonic, 751
iron-enriched deposits, 547, 548, 552, 553, 559
Italy, 53–71
- J
- Jura, 529–47
Jurassic, 447, 453, 461, 462, 463, 464, 465, 466
- K
- Kimmeridgian, 529, 530, 541–42, 544–45
- L
- Late Cretaceous, 345–62
Late Jurassic, 510
Lias, 547–59
Lower Cretaceous, 399–408
Lower Jurassic, 469–80, 565–82
Lusitanian Basin, 509–28
- M
- Maiella carbonate platform margin, 53–71
major transgressive/regressive cycles, 9, 10, 483, 484, 486–88, 489, 491–94,
 504
marine source rock, 45–51
Mediterranean, central, 157–77
mixed siliciclastic-carbonate associations, 509
- N
- Neogene, 83–85
North Sea, 91–115, 121–52, 263–87
- O
- Oligocene-Miocene, 235–46
Outer Moray Firth (OMF), 483, 484, 486, 491, 501, 502, 503, 504, 506
Oxfordian, 529, 530–35, 540, 541–42, 543–44, 545

oxygen isotope, 8, 75–79

P

Paleocene, 313–26
 Paleogene, 87–89, 263–87, 305–10
 paleogeography, 416, 658
 Pannonian Basin, 212, 217–28
 parasequence sets, 413
 Paratethys, 213
 Paris Basin, 594–98, 602–4, 669–91
 Peritethyan margin, western, 693–701
 plate reorganizations. *See* tectonic (block-faulting) events
 Pliocene, 181–97
 Plio-Pleistocene, 157–77, 201–9
 progradation, 53, 55, 60, 61, 64, 68
 Pyrenees, 305, 310
 western, 313–26

R

regional stages, 213–14, 216
 regression, 19, 33, 585, 598–602
 regression/transgression cycles, 43–45, 483, 484, 490–91, 495, 497–99, 501–4, 505
 relative sea-level, 91, 110–15, 565, 568, 570, 571, 573, 574, 575, 576, 577, 578, 579, 581, 582
 rift development, 447, 450, 456, 457, 461, 463, 465, 468, 469, 470–71, 472, 473, 474, 475, 477, 480, 586
 rifting, 25, 625–39
 rifting episodes, 512

S

sea level, 247, 248, 249, 250, 251, 256, 257, 258
 global control on, by waxing and waning ice sheets, 302
 sea-level changes, 625–39
 sechron, 4
 2nd-order sequence, 512–17
 sediment supply, 31, 41, 703, 704, 713
 seismic, 263, 264, 265, 266, 271, 274, 275, 277, 278, 279, 280, 281, 283
 sequence, 263–87, 532–43
 sequence boundaries, 217–28, 230–31
 sequence chronozone, 4
 sequence stratigraphic framework, 645–46
 sequence stratigraphy, 75, 78, 91–115, 121–52, 157, 165–76, 181, 182, 201–9, 247–60, 305–10, 316, 335–42, 365–86, 425, 434, 53–71, 565, 566, 586, 653–67, 669–91, 693–701, 721–46, 753–62
 shallow-marine, 751
 Sicily, 157, 158, 159, 161, 163, 165, 166–68, 177, 181–97

slope deposits, 291, 292, 295, 296, 297, 298, 299, 300
 Spain, 335–42, 345–62
 southeastern, 291–302, 425–41
 stable isotopes, 247–60
 stratal pattern, 31
 stratigraphic cycles, 15, 31
 stratigraphic framework, 653
 stratigraphic signatures, 157, 166, 169, 175
 subsidence, 669, 670, 671, 673, 678, 680, 683, 685, 686–87, 688, 697, 699, 700, 701
 supersequences, 53, 58, 59–68, 69, 70, 71
 Switzerland, northern, 529–47
 synsedimentary folds, 181, 189, 192
 systems tracts, 366, 370–71, 383–84

T

tectonic (block-faulting) events, 291, 296, 297, 298, 300, 301, 302
 tectonic influence, 53, 54, 55, 59, 68, 69, 70, 71
 tectonics, 201–9, 547, 553, 556, 558–59
 tectonic systems tracts, 513
 tectonism, 703–4, 705, 716–17
 terrestrial, 751
 Tertiary, 53, 54, 58, 62, 64, 66, 68, 70, 71, 121–52
 Tethyan margin, European, 625–39
 Tethys, 645, 648, 650
 3rd-order sequence, 291, 297, 298, 299, 300, 301, 302, 517–25
 transgression, 17, 19, 21–22, 24, 25, 37, 586–91, 598
 transgressive/regressive cycles, 345, 346–62, 399–408, 447–66, 469–80, 543–47
 major, 9, 10, 483, 484, 486–88, 489, 491–94, 504
 transgressive/regressive facies cycles, 6, 9, 10, 483, 484, 488–90, 492–95, 501, 504, 646–51, 741–46
 Tremp Basin, 305–10
 Triassic, 646, 648, 650, 651, 653–67, 669–91, 693–701, 703–17, 721–46, 751, 753–62

U

United Kingdom. *See* British Isles; Great Britain
 Upper Cretaceous, 53, 56, 58, 59, 66, 69, 71, 331–34

V

volcanism, 703, 704, 705, 709, 710, 712, 713, 716, 717

W

waxing and waning ice sheets, global control on sea level by, 302
 Western European Craton, 25
