SEPM (Society for Sedimentary Geology) is an international not-for-profit Society based in Tulsa, Oklahoma, U.S.A.. Through its network of international members, the Society is dedicated to the dissemination of scientific information on sedimentology, stratigraphy, paleontology, environmental sciences, marine geology, hydrogeology, and many additional related specialties.

The Society supports members in their professional objectives by publication of two major scientific journals, the Journal of Sedimentary Research (JSR) and PALAIOS, in addition to producing technical conferences, short courses, and Special Publications. Through SEPM’s Continuing Education, Publications, Meetings, and other programs, members can both gain and exchange information pertinent to their geologic specialties.

For more information about SEPM, please visit www.sepm.org.
FACIES MODELS REVISITED

Henry W. Posamentier and Roger G. Walker, Editors

CONTENTS

Facies models revisited: Introduction
ROGER G. WALKER ............................................................................................................................................................................. 1

Eolian facies models
NIGEL P. MOUNTNEY ........................................................................................................................................................................... 19

Fluvial facies models: Recent developments
JOHN S. BRIDGE .................................................................................................................................................................................. 85

Estuarine and incised-valley facies models
RON BOYD, ROBERT W. DALRYMPLE, AND BRIAN A. ZAITLIN. ................................................................................................ 171

Deltas
JANOK P. BHATTACHARYA ................................................................. 237

A reexamination of facies models for clastic shorelines
H. EDWARD CLIFTON ................................................................................................................................. 293

Facies models revisited: Clastic shelves
JOHN R. SUTER ................................................................................................................................. 339

Deep-water turbidites and submarine fans
HENRY W. POSAMENTIER AND ROGER G. WALKER ................................................................................... 399

Index ............................................................................................................................................................................................................ 521
