MICROPALEONTOLOGIC PROXIES FOR SEA-LEVEL CHANGE AND STRATIGRAPHIC DISCONTINUITIES

Hilary Clement Olson and R. Mark Leckie, Editors

CONTENTS

Preface HILARY CLEMENT OLSON and R. MARK LECKIE	1
Foraminifera as proxies for sea-level change on siliciclastic margins R. MARK LECKIE and HILARY CLEMENT OLSON	5
Seasonal distributions of foraminifera and their implications for sea-level studies, Cowpen Marsh, U.K. BENJAMIN P. HORTON and ROBIN J. EDWARDS	21
Taphonomy and artificial time-averaging of marsh foraminiferal assemblages (Bombay Hook National Wildlife Refuge, Smyrna, Delaware, U.S.A.): Implications for rates and magnitudes of late Holocene sea-level change RONALD E. MARTIN, SCOTT P. HIPPENSTEEL, DARIA NIKITINA, and JAMES E. PIZZUTO	31
Transgressive valley-fill stratigraphy and sea-level history of the Leipsic River, Bombay Hook National Wildlife Refuge, Delaware, U.S.A. DARIA L. NIKITINA, JAMES E. PIZZUTO, RONALD E. MARTIN, and SCOTT P. HIPPENSTEEL	51
The benthic foraminiferal record from the bathyal Gulf of Mexico during the last glacial–postglacial transition RICHARD A. DENNE and BARUN K. SEN GUPTA	63
Bio-sequence stratigraphic utility of SHE diversity analysis MATTHEW. I. WAKEFIELD	81
Similarity curves as indicators of stratigraphic discontinuities HILARY CLEMENT OLSON, ANTHONY GARY, and GARRY D. JONES	89
Chronostratigraphy and microfossil derived sea-level history of the Qiong Dong Nan and Ying Ge Hai basins, South China Sea PETER R. THOMPSON and WILLIAM H. ABBOTT	97
Terrestrial and marine palynomorphs as sea-level proxies: an example from Quaternary sediments on the New Jersey margin, U.S.A. FRANCINE M.G. MCCARTHY, KEVIN E. GOSTLIN, PETA J. MUDIE, and JENNIFER A. HOPKINS	119
Biofacies and lithofacies evidence for paleoenvironmental interpretations of upper Neogene sequences on the New Jersey continental shelf (ODP Leg 174A) MIRIAM E. KATZ, KENNETH G. MILLER, and GREGORY S. MOUNTAIN	131
Foraminiferal ecostratigraphy of late Oligocene sequences, southeastern Australia: patterns and inferred sea levels at third-order and Milankovitch scales QIANYU LI, PETER J. DAVIES, BRIAN MCGOWRAN, and THERESE VAN DER LINDEN	147
Oligocene neritic foraminifera in southern Australia: spatiotemporal biotic patterns reflect sequence-stratigraphic environmental patterns GRAHAM MOSS and BRIAN MCGOWRAN	173
Quantitative analysis of biofacies and genetic sequence stratigraphy of the Yegua Formation, Houston Salt Embayment, northern Gulf of Mexico, U.S.A. QING FANG	201

Foraminifers and calcareous dinoflagellate cysts as proxies for deciphering sequence stratigraphy, sea-level change, and paleoceanography of Cenomanian–Turonian hemipelagic sediments in western Europe KAI-UWE GRÄFE and JENS WENDLER	229
Recognition of relative sea-level change in Upper Cretaceous coal-bearing strata: a paleoecological approach using agglutinated foraminifera and ostracodes to detect key stratigraphic surfaces NEIL E. TIBERT, R. MARK LECKIE, JEFFREY G. EATON, JAMES I. KIRKLAND, JEAN-PAUL COLIN, ELANA L. LEITHOLD, and MICHAEL E. MCCORMIC	263
Microfaunal abundance fluctuations in the Western Black Sea (Romanian offshore, Cretaceous to Pliocene) MARIUS DAN GEORGESCU	301
Sequence evolution and sequence extinction: Fusulinid biostratigraphy and species-level recognition of depositional sequences, Lower Permian, Glass Mountains, West Texas, U.S.A. CHARLES A. ROSS and JUNE R. P. ROSS	317
Testing the sequence stratigraphy model: response of Fusulinacean fauna to sea-level fluctuations (examples from Pennsylvanian and Cisuralian of the Pricaspian–Southern Urals region) VLADIMIR. I. DAVYDOV, TAMRA A. SCHIAPPA, and WALTER S. SNYDER	361
Index	379
