Index

Aberdeen Member, 33, 34, 49, 226, 269, 274
Abnormal subaerial exposure, 29, 185, 188
Abnormal vertical association of facies, 181
Accommodation cycle, foreland basin, 56
stacking patterns and, 97–99
Accommodation profile, sequence boundary expression for, 64–67
Accommodation volume, topset, 2–5
Accommodation zones, foreland basin, 63
Agrichnia, 430
Airy-isostatic subsidence, 98
of basement blocks, 64
in foreland basin margin, 60
in hinge zone, 61
tectonic, 55
Alberta basin, 419
Allen Valley Shale, 88, 91
Allostratigraphy, 429–430
Alluvial aggradation, during highstand, 113
Alluvial stacking patterns, 110
Alrad Canyon, 259
Alvey Wash, 106
Amalgamated sequence boundaries, and flooding surfaces, 463–470
Ambrosia Lake, 292–294, 300
American plate, 143
Ammonite biostratigraphic control, 21
Anconichnus, 470
Anconichmus horizontalis, 456
Anomia micronema, 43
Appaloosa Sandstone, 436
Arches National Park, 241
Ardmore Bentonite, 392
Arenicolites, 110, 155, 187, 192, 193, 431, 436, 438, 441, 449, 451, 454, 456, 465, 467, 470
Asteriacites, 431
Atarque Member, 123
Auricaria, 41
Baculites gregoryensis, 17
Baculites jenneyi, 18
Baculites jenseni, 17
Baculites maclearni, 17, 144
Baculites obtusus, 16, 17, 18, 144
Baculites perplexus, 17, 18, 144
Baculites reesidei, 17
Baculites scotti, 17, 20
Baltic Shield, 462
Barrier island formation, 49
Basement blocks, Airy-isostatic subsidence of, 64
Basement lineaments, transecting foreland basin margin, 57
Basement structures, underlying foreland basin margin, 57
Basin control, on topset sand percentage, 5
B basin-fill model, nonmarine sequence stratigraphy and, 64–70
B Basinward shift in facies, 181
Bear Canyon, 259
Bearpaw Formation, 436, 438
Bearpaw sea, 18
Bearpaw transgression, 16
Beckwith, Lt. E.G., 140
Beckwith Plateau, 234
Beds, as building blocks of sequence stratigraphy, 32
Bell Creek field, 397
Bell Creek Sandstone, 396
Benthic environment, typical, 432–433
Benthic organisms, behavioral record of, 430
Benuc Trough, 462
Bergaueria, 456, 470
Beveling, 190
Big Hole Wash, 173, 176, 186, 191
Big Horn Sheep Canyon, 159, 196
Bisti field, 340, 341
Bisti valley, 325, 329
Blackhawk Formation, 15, 27–54, 69–70, 98, 137, 139, 140, 142, 213, 227–230, 234, 247
highstand sequence set, 222
paleogeography of, 257–275
regional setting and stratigraphy, 226–229
stratigraphy of, 258–260
Black Hills, 414
Black Mesa, 104, 120–121, 123–128
location map, 105
Black shale facies
Mowry Shale, 413–414
Shell Creek Shale, 413–414
Blaze Canyon, 151, 156, 159, 161, 172, 174, 179, 191, 236
Index 479

Denver basin, 130, 207, 366, 392
Depositional environments, of Kenilworth Member, 260–266
Depositional reconstruction, parasequence evolution and, 47–51
Depositional sequences
  Muddy Sandstone, 415–416
  Tocito Sandstone, 316–334
Depositional systems
  estuarine, conceptual model for, 465
  in Gallup Sandstone, 284–388
Desert Member, 33, 69–70, 137–140, 142, 144, 146, 148, 210, 211, 213, 218, 219, 225, 226, 236, 246, 251, 274
cross section summary, 144–148
  lowstand systems tract, 159–172, 211
  sequence boundary, 151–152, 155–159
  transgressive systems tract, 172–173, 198
Desmoscaphites bassleri, 16, 17, 118, 119, 123, 128
Desmoscaphites erdmanni, 123
Didymoceras cheyennense, 17, 18, 20
Didymoceras nebrascense, 17, 20
Didymoceras stevensoni, 17, 20
Dilco Coal Member, 281, 284, 286, 287, 298, 303, 350, 354, 356, 360, 362–364, 366, 367
  coastal-plain deposits, 364, 365
  stratigraphic framework, 353
Diplocraterion, 431, 432, 436, 438, 441, 444, 449, 451, 453, 455, 456, 465, 466, 469, 470
Diplocraterion habichi, 453, 454, 465
Diplocraterion parallelum, 438
Distal zone, of foreland basin, facies associations of, 79–82
Distributary mouth bar, Kenilworth Member, 263–264
Domichnia, 430
Douglas Creek arch, 143, 144
Dovey Estuary, Wales, 48
Drainage patterns, Niobrara Formation-Carlile Shale contact, 381–388
Drip Tank Member, 106, 109, 119, 120–121
Dugout Canyon, 259
Dunvegan Formation, 445–449, 463, 464
Dwelling structures, of benthic organisms, 430
Eco-stratigraphy, 429
Edson field, 463, 469
Emery Sandstone, 70, 96, 128
Entobia, 431
Ephraim fault, 57, 60, 94
Equilibria, of benthic organisms, 430
Ericson Formation, 17
Ericson unconformity, 16, 18–21
Erosional ravinement surface, 303
Escape traces, of benthic organisms, 430
Estuaries, Gallup Sandstone, 285–286
Estuarine depositional systems conceptual model for, 465
  Tocito Sandstone, 361, 364
Ethological classification, of trace fossils, 430
Eustasy, influence of, on foreland basin fill, 56
Eustatic change, 98
Event stratigraphy, 429
Exiteloceras jenneyi, 17, 18, 20
Facies
  abnormal vertical association of, 181
  basinward shift, 181
  black shale, Mowry Shale, 413–414
  black shale, Shell Creek Shale, 413–414
  coal-bearing, Muddy Sandstone, 411
  component, of foreland basin zones, 70–82
  Loop Current, 391
  mapping, from outcrop exposures, 269–273
  mudstone, Mowry Shale, 412–413
  mudstone, Muddy Sandstone, 411
  mudstone, Shell Creek Shale, 412–413
  mudstone, Skull Creek Shale, 412–413
  sandstone, Mowry Shale, 413
  sandstone, Muddy Sandstone, 411–412
  sandstone, Shell Creek Shale, 413
  sandstone, Skull Creek Shale, 413
  seaward shift in, 111–114, 116–117, 119
  subsurface, 85–91
  and systems tract architecture, in subsidence zones, 67–69
Facies architecture
  marine to nonmarine, Book Cliffs foreland basin strata, 137–223
  and stratigraphy, of parasequences, 27–54
Facies associations, of foreland basin accommodation zones, 63
Facies successions, Muddy Sandstone, 415
Falling stage systems tract, 277, 302
Farming systems, of benthic organisms, 430
Farrer Formation, 141
Feeding burrows, of benthic organisms, 430
Fenn field, 454
Ferron Sandstone, 109, 114, 123, 126, 129
Ferron Shale, 127
Fillmore-Maricopa basement arch, 57
Fite Ranch Member, 126
Flexural subsidence, in foreland basin margin, 60
Flooding surfaces, 65
  amalgamated, 463–470
  high-energy, 451, 453, 456
  initial, 301
  low-energy, 441
  low-energy marine, 445–451
  maximum, 115–116, 301
  nonerosive, 441
  and parasequence boundaries, 30
  transgressive, 323
  valley-fill, 325, 334
Flood-tidal deltas, Gallup Sandstone, 286
Floy Canyon, 146, 159, 235, 236
Fluvial deposits, braided, Torrivio Sandstone, 364–365
Fluvial flood plains, 463
Fluvial to shallow-marine architecture, in foreland basin, 55–101
Fluvial strata, aggradation of
  coarse, 114, 119–120
  and tidally-influenced strata, 17, 112–113
Fluvial valleys, encased in marine deposits, 371–393
Fodinichnia, 430
Forced regression
schematic model of, Viking Formation, 459
shoreface surfaces, 441
succession, 457–462
Foreland basin, 33. See also Western Interior foreland basin; Western Interior Seaway
Foreland basin accommodation cycle, 56
stacking patterns and, 96–98
Foreland basin accommodation zones, 63
Foreland basin evolution
and sequence stratigraphy of Kaiparowits Plateau, 103–136
structural elements defining, 60–61
Foreland basin fill
influence of eustasy and tectonic subsidence on, 56
sequences, late stage, 64
sequence chronostratigraphy of, 59
Foreland basin margins
Airy-isostatic and flexural subsidence in, 60
basement lineaments transecting, 57
basement structures underlying, 57
evolution of systems tracts and unconformities across, 84
structural elements of, 57–58
structural and stratigraphic zonation of, 60–64
thrust events in, 57–58
Foreland basins
controls on sequence stacking in, 55–101
fluvial to shallow-marine architecture in, 55–101
model of sequence stratigraphy and facies architecture in, 137
of North America. See Western Interior foreland basin
sequence stratigraphy model, nonmarine to marine, 66
systems tracts in, 8
Foreland basin strata, Book Cliffs, 137–223
Foreland basin zones, component facies and architecture of, 70–82
