INDEX

Acetabularia, 207, 215
Alderson Limestone, West Virginia, 146–147
Allendale pool, Illinois, 69
Allochthonous assemblages, defined, 116
Anadarko basin, Kansas, isopach map, 186
Andros Island, Bahamas, 227
and laterally adjacent carbonate environments, 233–235
lithology of, 230–231
location of, 229
ooid distribution, 229–230
ooid shoals, location of, 235
topographic cross section of, 234
Appalachian basin, sequence of flexural events in, 18
Aragonite ooids, 179, 180
Autochthonous assemblages, defined, 116
Backshoal, 135
Bahamian oolite shoal, schematic cross section of, 126
Basal rudstones, 35, 39
Batophora, 207, 215
Beach agitation, 222
Bed configuration of intertidal grainstones, 155
of subtidal tide-dominated grainstones, 152–153
Beech Creek Limestone, Illinois, 130
Belle Rive Southwest field, Illinois, location of, 67
Benthic assemblages, genera in from Harrodsburg Limestone, Indiana, 120
as indicators of sediment stability, 115–128
from Salem Limestone, Indiana, 120
Bidirectional foresets, of subtidal tide-dominated grainstones, 152–153
Bioclastic flanks and core, 135
Bioclastic grainstone, in Willow Hill field, Illinois, 99
Bluefield Formation, West Virginia, 165
Blue River Group stratigraphic section, 74
Broken ooids, 51, 53
abraded, 54
Burial cementation, 108–109
controls and predictions of, 111–112
Burrows of intertidal grainstones, 156–157
of subtidal tide-dominated grainstones, 154–155
Caicos Platform, Bahamas, 199
and ancient limestone sequences, 221–222
climatic and hydrographic setting, 200–201
lithostratigraphic cross section of, 218
physiography of, 205–206
sediment types, 206–207
setting, 203–204
surficial sediment types map, 206
types of ooids in, 207
Calcarenites, skeletal, San Salvador Island, Bahamas, 243
Calcite cement ferroan, 181, 182
non-ferroan, 181
Calcite ooids, 179
Callianassa, 215, 218
Carbonate environments, ooid-rich, flexural controls on, 13–30
Carbonate eolianites, in Ste. Genevieve Limestone, Indiana, origin of, 56–59
Carbonate facies, in Willow Hill field, Illinois, 99–101
Carbonate minerals, stabilization of, 177–178
Carbonate sequence, mapping oolitic facies in, 61–72
Carbonate shelf, Pitkin Formation, Arkansas, 175
Carbonate shore, Greenbrier Group, West Virginia, 158
Cement, calcite ferroan, 181, 182
non-ferroan, 181
Cementation of grainstones at Willow Hill field, Illinois, 108–111
in a Mississippian oolite shoal complex, 91–113
of ooids, Greenbrier Group, West Virginia, 170
Cement textures, 255–256
Chalky ooids, 180
Chama macerophylla, 217
Channels, 232
Chemical compaction, of ooids, Greenbrier Group, West Virginia, 172
Chesterian oolites, 23, 24–25
compared to Valmeyeran, 136–138
distribution of, 7
Climbing-current-ripple structures, 44
Climbing-wind-ripple structures, 44
Coastal plain, Greenbrier Group, West Virginia, 158, 161
Cross-strata in Paoli Limestone, Indiana, 41
in Ste. Genevieve Limestone, Indiana, 41
wedge-shaped, Greenbrier Group, West Virginia, 152
Curvolithus, 123, 124, 126
Cystodictya, 124
Damme field, Kansas, 189
Denmar Formation, West Virginia, 142, 143–144, 146
Depositional model, of the Golconda Group, 131
Detrital quartz, 50–51
Devonian–Mississippian black shales, area of, 15
Devonian–Mississippian unconformity, and Kinderhookian oolites, 19
Diagenesis, and ooid mineralogy, of Pitkin Formation, Arkansas, 175–184
Dolomite lithology, of Ste. Genevieve Limestone, Illinois, 66
Eione, 123
Electric logs, and isopach maps of oolitic grainstone, 64, 66, 68–69
Elongate subtidal banks, capped by regular ooids, 213–214
Eolian cross-strata, in the Ste. Genevieve Limestone, Indiana, 41
Eolian deposits classical types of evidence for, 40–42
identifying, 40–44
petrographic evidence for, 43–44
in Ste. Genevieve Limestone, Indiana
fine structure, 42–43
origin of, 56–59
Eolian dunes, 232–233
Eolian facies, in Ste. Genevieve Limestone, Indiana, 31–48
Eolian grainstones
- diversity in, 53
- inverse grading of, 56
- laminated, 55, 56
- percentage of components in, 52
- petrographic features of, 50-56
- rounding and sphericity in, 54
  - in Ste. Genevieve Limestone, Indiana, 52-58
- solution packing of, 56
- sorting, 55-56

Eolian limestones
- history of studies on, 243-244
- new perspective on, 243-259

Eolian stratification
- in outcrop, San Salvador Island, Bahamas, 245-251
- in thin section, Grotto Beach Formation, Bahamas, 251-256

Eolian units
- character of, 33-39
- main parts of, 33, 35

Erosion surfaces, of subtidal tide-dominated grainstones, 154

Facies, relationship with faunas, 117-118

Faunas, relationship with facies, 117-118

Fayetteville Formation, Arkansas, stratigraphic section of, 177

Fistulipora, 120

Flexural controls
- on localized oolitic deposition, 25-26
- on origins of ooid-rich carbonate environments, 13-30
- on regional oolitic deposition, 19-25

Flexural events, sequence of, in Appalachian basin, 18

Flexural interaction, between foreland basin and intracratonic basin, 16

Flexural models, 14-18

Flexural responses, to lithospheric-stress relaxation, 17

Folsomville field, Indiana, 73
- cumulative oil production, 75
- density porosity logs, 76
- depositional model, 87-88
- distribution of oolite bodies, 87
- location of, 74
- porosity zones, 79-87
- production and development history, 74-75
- slice maps, 77-79
- stratigraphy of, 75-77

Foreland basin
- and intracratonic basin, flexural interaction between, 16
- and peripheral bulge, development of, 16

Fossil assemblages, composition and interpretation of, 118-121, 122, 123-124

Fraileys Shale, Illinois, 130

Globoendothyra baileyi, 121

Golconda Group, Illinois, 129
- depositional model, 131
- location of, 130
- ooid shoal, schematic block diagram, 135
- ooid shoal facies, 133
- ooid shoal subenvironments, 134-136
- oolites, 138
- oolite shoal, origin and character, 136
- stratigraphy and lithologic character of, 130

Grain diversity, in eolian samples, 53

Grainfall strata, 249-250, 254-255
- distinguishing from sandflow cross-strata, 250

Grainstones
- bioclastic, 99
- cross-bedded, 126
- eolian, 55-56
- quartz silt in, 53
- grapestone, 207
- intertidal, 155-157
- low-permeability, 93
- marine, 50-56
- ooid, SEM photomicrographs of, 171
- oolitic, 99, 207
  - late Pleistocene, photomicrograph of, 218
  - permeable, 93
  - Pleistocene, 215-219
  - underwater photograph of, 217
- peloidal, and packstones, 207
- petrographic features of, 50-56
- in Pitkin Formation, Arkansas, 175
- sedimentary characteristics of, 157-158
- skeletal, 206-207
- subtidal tide-dominated, 151-155

Grapestone grainstones, 207

Gravity anomalies, associated with sea floor perturbations, 194-195

Greenbrier Group, West Virginia
- depositional model, 166-169
- depositional setting of, 158-161
- diagenetic model, 169-172
- formations of, 151
- geologic setting of, 150, 164-166
- isopach map of, 165
- photomicrograph of oolites, 168

Greenbrier Limestone, West Virginia, 141
- ooid shoals recognized in, 145
- paleogeography of, 142
- stratigraphic cross section, 145
- stratigraphic section, 144
- stratigraphy of, 142, 144

Grotto Beach Formation, Bahamas, 243

Halimeda, 125

Haney Limestone, Illinois, 130
- deposition of, 132

Hapsiphyllum cassedayi, 119, 120, 122, 124

Harrodsburg Limestone, Indiana, 115
- facies model for, 117
- genera in benthic assemblages from, 120

Hugoton embayment, Kansas
- isopach map, 186
- Mississippian oil fields, 187

Illinois basin, 130
- location of, 62

Ingalls field, Kansas, 189-195
- electric log cross section, 192
- isopach map, 194
- of ooid shoal, 191
- schematic cross section, 194
- type log, 186

Intershoal, 136

Intershoal facies, Salem Limestone, Indiana, 121-122

Intertidal grainstones
- outcrop photograph of, 156
- petrography of, 155
- sedimentary characteristics of, 155-157

Intraclasts
- in eolian grainstones, 54
- in marine grainstones, 54-55
Index 263

Intracratonic basin, and foreland basin, flexural interaction between, 16
Inverse grading, of eolian grainstones, 56
Irregular ooids, 199, 214–215, 220–221
photomicrograph of, 209
Irregular oolites, Caicos Platform, Bahamas, map of, 210
Isopach maps, of oolitic grainstone, from electric logs, 64, 66, 68–69
Joulters Cays, Bahamas, 227
and laterally adjacent carbonate environments, 233–235
lithology of, 230–231
location of, 229
oolid distribution, 229–230
oold shoals, location of, 235
topographic cross section of, 234
topography of, 231–233
Kinderhookian oolites, 19–21
and Devonian–Mississippian unconformity, 19
Lagoons, 235
Lamination, of eolian grainstones, 55
Lancaster field, Illinois, 68
Lawrence field, Illinois, 61, 70
Limestone lithology, of Ste. Genevieve Limestone, Illinois, 66
Limestones, oolitic, and petroleum reservoirs, 1
Low-permeability grainstones, 93

Macaronichnus, 123
McClosky reservoirs, 63
McClosky sands, 73
McClosky zones, 92, 94
stratigraphy of, in Willow Hill field, Illinois, 101
Magnetic anomalies, associated with sea floor perturbations, 194–195
Marine grainstones
large grains in, 56
percentage of components in, 52
petrographic features of, 50–56
rounding and sphericity in, 54
in Ste. Genevieve Limestone, Indiana, 52–56
solution packing of, 56
sorting, 56
Marine sand belts, 203
Meniscus-style cement, in ooid-rich grainstone, 110
Meramecian outcrop belt, 52
Microcrystalline dolomite, 93
Mineral stabilization, of ooids, Greenbrier Group, West Virginia, 170–172
Mississippian oil fields, in Hugoton embayment, Kansas, 187
Mississippian oolite reservoirs, 6–8
Mississippian oolites
and petroleum reservoirs, overview, 1–12
Quaternary analog for interpretation of, 227–241
tidal origin of, 149–162
Mississippian oolite shoal complex
log analysis of, 93–94
paleogeography and cementation in, 91–113
Mississippian rocks, distribution of, 2
Mississippian stratigraphy, 2–3
Mississippian units, stratigraphic correlation chart for, 4–5
Mixed siliclastic facies, in Willow Hill field, Illinois, 99–101
Mobile belt, 120, 122
Mud drapes, of subtidal tide-dominated grainstones, 154
Nearshore tide-dominated environment, Greenbrier Group, West Virginia, 158–159
New Albany Shale structure map, 92
Ocean swells, 221–222
Offshore environment, Greenbrier Group, West Virginia, 160, 161
Offshore packstones and wackestones
petrography of, 157
sedimentary characteristics of, 157
Oil and gas exploration guide, St. Louis Formation, Kansas, 185–197
Ooid cap, 135–136
Ooid distribution
Greenbrier Limestone, West Virginia, 236–237
Ste. Genevieve Limestone, Indiana, 236–237
Ooid formation and occurrence, environments of, 207–215
Ooid grainstones, Greenbrier Group, West Virginia, SEM
photomicrographs of, 171
Ooid mineralogy, and diagenesis of Pitkin Formation, Arkansas, 175–184
Ooid mineralogy and fabric factors controlling, 180–181
of Pitkin Formation, Arkansas, 178–179
Ooids
ancient, 178
aragonite, 179, 180
broken, 51, 53
calcite, 179
chalky, 180
irregular, 199, 214–215, 220–221
photomicrograph of, 209
modern, mineralogy and fabric of, 177–178
Pitkin Formation, Arkansas, 175
regular concentric, 199, 210–213, 219–220
photomicrograph of, 208
types of, in Caicos Platform, Bahamas, 207
Ooid sand shoal, cross section showing development of, 230
Ooid sediment production restricted through shoaling, 203
Ooid shoal
controls on development of, 131–132
depositional model, of Golconda oolites, 131
drowning of, 141–148
isopach map, Ingalls field, Kansas, 191
transverse cross section, Pleasant Prairie field, Kansas, 190
subenvironments of Golconda Group, 134–136
Ooid shoal facies, character of Golconda, 133
Ooid shoals, 235
of St. Louis Formation, Kansas, 185–197
Oolite bodies, depositional aspects of, 129–140
Oolite-body geometry, 8–9
controlling factors, 8
Oolite deposition, 3–4
around the West Virginia dome, 143–147
Oolite lithology, of Ste. Genevieve Limestone, Illinois, 66
Oolite reservoirs
characteristics of, 9–10
complex, in Folsomville field, Indiana, 73–89
geometry of, 8–9
Willow Hill field, Illinois, 103–108
Oolites
Chesterian, 23, 24–25
Golconda Group, Illinois, 138
Kinderhookian, 19–21
occurrence of, and stratigraphic thinning, 194
Ste. Genevieve Limestone, 137–138
Salem Limestone, Illinois, 136–137
Valmeyeran, 21–24
compared to Chesterian, 136–138
Oolite shoal, Bahamian, schematic cross section of, 126
Oolitic deposition
localized, flexural controls on, 25–26
regional, flexural controls on, 19–25
Oolitic facies
mapping, 64, 66, 68–69
and exploration applications, 69–71
on wireline logs, 63
Oolitic flood-tidal deltas, 203
Oolitic grainstones, 207
Caicos Platform, Bahamas, map of, 210
late Pleistocene, photomicrograph of, 218
Pleistocene, 215–219
in Willow Hill field, Illinois, 99
Oolitic sand bodies, comparison of tidal and wind-wave, 199–225
Oolitic sands, of the northern Bahamas, 201–202
Oolitic sediment bodies
generated by wave agitation, 222
types of tidal-current-generated, 202–203
Oolitic strand plain sequences, 222
Oolitic tidal-bar belts, 203
Oolitic tidal-bar reservoirs, Greenbrier Group, West Virginia, 163–173
Open platform interior, 215, 220–221
Ophiomorpha, 218
Ozark dome, Missouri, 129
Paleogeography, in a Mississippian oolite shoal complex, 91–113
Paoli Limestone, Indiana, 32
cross-strata in, 41
in Folsomville field, Indiana, 75
Peloidal grainstones and packstones, 207
Penicillus, 125
Pentremites, 123
Pentremites calyces, 122
Permeable oolite grainstone, 93
Petrographic features, of grainstones, 50–56
Petroleum occurrences, in Mississippian oolites, 5–6
Petroleum reservoirs, and Mississippian oolites
location of, 5–6
overview, 1–12
Petrologic method, for distinguishing eolian and marine grainstones, 49–59
Phylactis, 218
Pickaway Limestone, West Virginia, 144–145, 149, 168–169
Pickaway oolite member, 168
isopach map of, 169
Pickaway ramp, West Virginia, depositional model of, 159
Pitkin Formation, Arkansas, 175
Alco section, 178–179
location of, 176
Marshall section, 178–179
Mountain View section, 178
stratigraphic section of, 177
stratigraphy and depositional environment of, 176
Pitkin Limestone, Arkansas, diagenesis of, 181–182
Plane beds, of subtidal tide-dominated grainstones, 154
Platform-interior shoal complexes, 220
irregular ooids on, 214–215
Pleasant Prairie field, Kansas, 188–189
oolite shoal, transverse cross section, 190
Porites astreoides, 217
Porosity zones, 79–87
Prograding strand plains, 210–213
Protected shelf, 134
Providenciales, Bahamas
aerial photograph of, 212
map of physiographic features, 212
Quartz silt, in eolian grainstones, 53
Quaternary, skeletal calcarenites from, San Salvador Island, Bahamas, 243–259
Quaternary analog, for interpretation of Mississippian oolites, 227–241
Quaternary ooid sand shoals, 228–236
and comparison with Mississippian examples, 236–238
Reactivation surfaces, of subtidal tide-dominated grainstones, 153–154
Reefs, 233–234
Regular concentric ooids, 199, 210–213, 219–220
Caicos Platform, Bahamas, map of, 210
photomicrograph of, 208
Reynolds Limestone Member, West Virginia, 165
Rhodell field, West Virginia, 163
location of, 164
Ripple bedding, of intertidal grainstones, 156
Ste. Genevieve Formation, Illinois, Mississippian oolite shoal complex, 91–113
Ste. Genevieve Limestone
Illinois, 137–138
dolomite lithology, 66
limestone lithology, 66
lithofacies, 94
log examples, 65
mapping oolite facies in, 61–72
oolite lithology, 66
stratigraphic column, 92
Indiana, complex oolite reservoirs in, 73–89
cross sections of, 35, 40
eolian cross-strata in, 41
eolian deposits, fine structure, 42–43
eolian facies in, 31–48
eolian units
character of, 33–39
main parts of, 33, 35
geologic setting of, 32, 50
measured section of, 51
noneolian exposure-surface features, 39–40
origin of eolian deposits in, 56–59
schematic stratigraphic column, 32
sedimentary structures of, 42
stratigraphic sections of, 32–33, 34, 36–39
Ste. Genevieve oolite bodies, distribution of, 7
St. Louis Formation, Kansas
lithology and stratigraphy of, 187–188
occurrence of oolites, 194
oil fields, facies and porosity occurrence, 187–188
oolite shoals, 185–197
stratigraphic thinning, 194
structure and stratigraphy of, 186–188
St. Louis Limestone, Indiana, 32
facies model for, 117
Salem Limestone
Illinois, 136–137
Indiana, 115
data collection in, 116
facies model for, 117
genera in benthic assemblages from, 120
intershoal facies, 121–122
sand-flat facies, 124
shoal facies, 122–124
upper shoreface facies, 118–121
Sand-flat facies, Salem Limestone, Indiana, 124
Sand-flow cross-strata, 247–249, 253–254
distinguishing from rainfall strata, 250
Sand holes, of intertidal grainstones, 156
San Salvador Island, Bahamas
location of, 244
sedimentary petrology of, 245–256
setting, 244–245
Sea floor perturbations, and associated magnetic and gravity anomalies, 194–195
Sedimentary basins, location of major, 2
Sedimentary structures, of the Ste. Genevieve Limestone, Indiana, 42
Sediment stability, indicated by benthic assemblages, 115–128
Seismic exploration methods, St. Louis Formation, Kansas, 193–194
Sessile benthos, 120, 122
Shoal asymmetry, 231
Shoal facies, Salem Limestone, Indiana, 122–124
Shore environment, Greenbrier Group, West Virginia, 158, 161
Shore-parallel strand plains, 219–220
Simple dunes, cutaway diagram of interior, 248
Skeletal calcarenites, San Salvador Island, Bahamas, 243
Skeletal grainstone, 206–207
Slice maps, 77–79
Solution packing
of eolian grainstones, 56
of marine grainstones, 56
Sorting
of eolian grainstones, 55–56
of marine grainstones, 56
Spar cement, 53
Straporolus, 122
Stratigraphic units, middle Mississippian, in southern Indiana, 50
Subtidal tide-dominated environment, Greenbrier Group, West Virginia, 161
Subtidal tide-dominated grainstones
outcrop photograph of, 153
petrography of, 151
photomicrograph of, 153
sedimentary characteristics of, 151–152
Syntaxial cementation, controls and predictions of, 111–112
Syringodium, 207
Syringopora, 124
Syringopora monroensis Beede, 120
Taggart Shale, West Virginia, 144
Thalassia, 125, 207
Tidal-bar reservoirs, oolitic, 163–173
Tidal bedding, of intertidal grainstones, 155–156
Tidal bundles, of subtidal tide-dominated grainstones, 153, 154
Tidal flats, 234–235
Trace element, geochemistry of Pitkin ooids, 179
Trade wind belt, 221
Transported fossils, problem of, 116–117
Trough cross-bedding, of subtidal tide-dominated grainstones, 154
Udotea, 125
Union Limestone, West Virginia, 144–145, 166–167
Union oolite member, 166
isopach map of, 169, 170
Upper shoreface facies, Salem Limestone, Indiana, 118–121
Valmeyeran oolites, 21–24
compared to Chesterian, 136–138
Wedge-shaped cross-strata, Greenbrier Group, West Virginia, 152
West Virginia dome, 141, 149
Willow Hill field, Illinois, 91
base map, 93
bioclastic grainstone in, 99
burial cement, 108–109
carbonate facies in, 99–101
cements and cementation of grainstones at, 108–111
core description, 94–95
cuttings and log analysis of lithofacies, 95
depositional model and evolution of, 103–108
depositional sequence, 95–101
eyearly cements, 108
distribution of, 110
geometry of grainstone bodies in, 99
log analysis of, 93–94
mapping techniques, 95
meniscus-style cement, 110
mixed siliclastic facies in, 99–101
oolite grainstone in, 99
paleogeography and cementation in, 91–113
terrigenous/carbonate nearshore deposits, 103
Wind-aligned shoals, 220
Wind-ripple strata, 246–247, 250, 252–253
Wireline logs, recognition of oolitic facies on, 61–71
