

# Index

A reference is indexed according to its important, or "key" words.

Three columns are to the left of a keyword entry. The first column, a letter entry, represents the AAPG book series from which the reference originated. In this case, ME stands for AAPG Memoir Series. Every five years, AAPG will merge all its indexes together, and the letters ME will differentiate this reference from those of the Studies in Geology Series (ST) or from the AAPG Bulletin (B).

The following number is the series number. In this case, 45 represents a reference from AAPG Memoir 45. The third column lists the page number of this volume on which the reference can be found. The fourth column represents the type of entry: K = keyword, A - author, and T = title.

Index entries without page numbers represent the title or compilation editors of this volume.

ME 45	381	K ABRAMUT FIELD, PANNONIAN BASIN	ME 45	378	K BILCHE-WOLIVA FIELD, PANNONIAN BASIN
