INDEX

A

Abo formation, 192
abyssal plains of ocean, 65
accumulations, oil and gas, 213, 218
average sandstone thickness, 213
conditions of, 208
fluids in reservoirs, 218
size, compared with fluids and trapping conditions, 217
stratigraphic trap types, 216, 217
age, geologic, of stratigraphic traps, 217
alluvial cones, references in literature to, 11
fans, 11, 71, 143, 215
plain, 146, 150
Almond formation, 84
intertonguing relations, 85, 87
Ancient Rockies, 152, 154
ancient bar-finger sands, 38, 50, 51
deposits, interpreted from Recent deposits, 10, 28
colinss, 155-61
fluvial channel-sand bodies, 145, 146, 161-77, 229-32
turbidites, 67
Andros Island, 55
platform, oolite shoals on, 55
animal tracks in eolian ss., 158
Appalachian basin, 120, 121
Mountains, 123
Arguello deep-sea fan, 71
arid regions, sedimentary processes of, 154
ash-leach theory, uranium deposit origin, 176
A-10 sand, turbidite, 78
isopach map of, 79
Aux Vases ss., 123, 124
Aztec ss., cross-strata in, 161

B

Baars, D. L., 179
Bahama Banks and environs, 54
BAMARIAN OOLITE SHOALS, 53
balls and lows, 14
barchans, oolite, 59
BAR-FINGER SANDS OF MISSISSIPPI DELTA, 29
absence of faunas in, 38
ancient, 38, 50, 51
identification of, 38
and delta platform, Mississippi River, 30
bird-foot delta, outline of, 34
clean-sand zone, 42
cores of deposits, 44
criteria for recognition, 48
cross-bedding in, 45
deformation of, by mud lumps, 48
dimensions and age of, 50
distribution and form of, 50
Eocene Cockfield and Sparta, 52
Wilcox, 50
facies relationships, 50
geometric and sedimentary characteristics, 36, 38, 49,
50
grain size and sorting, 38
in Southwest Pass, historic development of, 52

†Titles of papers are shown in capital and small capital letters.

Miocene and Oligocene, Gulf Coast, 52
Pennsylvanian Booch sand, 50, 51, 145, 146, 229-31
sedimentary characteristics, 38
stratigraphic traps, exploration for, 52
structures of, 50
sedimentary, 45
see also Mississippi Delta
Barker Dome tongue, 112, 113, 114
barrier beaches, spits, and islands, 14
barrier beaches, spits, and islands, 14
barrier beaches, spits, and islands, 14
barrier, 9
offset of, 5
references in literature to, 11
LONGSHORE, AND BEACHES, LABORATORY EXPERIMENTS ON FORM AND STRUCTURE OF, 13
cross sections of, 18, 19, 22-25
cross-strata, angle of dip in, 20, 25-27
height-to-width ratios, 20
modern, structures in, 25-27
profiles of, 27
shape and structure of, 17-20
stages in growth of, 14-16
Mississippi River, at Southwest, Southeast, South, and North Pass, and at Pass a Loutre, 30-33
offshore, 14, 220, 225, 229, 232
subaqueous, references in literature to, 12
Basin and Range province, 152
basin-floor turbidites, 71
Baxter (Mancos) shale, 83
beach and shoreface terrace deposits, height-to-width ratios, 21
barrier, 14
cross sections of, 22-25
deposits, 215, 220, 222, 232
en echelon sands, 222
references in literature to, 11
shape and structure of, 21-24
topset beds on, 21
BEACHES AND LONGSHORE BARS, LABORATORY EXPERIMENTS ON FORM AND STRUCTURE OF, 13
Bearpaw shale, 92
beach sand, definition, 99
in Cliff House formation, 107, 108, 110, 111, 113, 114,
116
in Point Lookout formation, 112
Berea sandstone, 143, 145
Big Horn Mountains, 96
Big Snowy anticlinorium, 94
Mountains, 96
Bimini Island, North, longshore bars off, cross sections, 26-27
Bimini Islands, 55
bird-foot delta platform, Mississippi River, 31
Black Mesa basin, 152, 193
Blanking district, uranium ore of, 174
blanket sand, 9
sandstones, Permian, Colorado Plateau, 179-207
Blue Ridge, crystalline and metamorphic terrain, 121,
123
Bluff ss. member, Morrison formation, 135, 155, 157,
162
sandstone pipes in, 148
Bolivar Peninsula-Galveston Island, 5

233
INDEX

Booch (delta, 50, 51, 144, 145, 229, 230
sandstone, 50, 51, 144, 145, 229-31
bar fingers, 50
isopach map, 230
oil pools in, 229
sand development and oil and gas accumulations, 229
structure map, 231
thickness map, 51, 145, 230

Brown Clay-Cay Cay area, oolite shoal in, 56, 57, 58
aerial photograph of, 57

Brushy Basin member, Morrison formation, 135, 147, 149

Buckhorn conglomerate, oil and gas in channel systems, 177
Bull Mountain syncline, 96
bundle of sandstone turbidites, 68, 69
Burwood boring, 33, 38, 41, 42, 47
radiocarbon dates from, 48
Busch, Daniel A., 220

C Calamity group of claims, relationship of ore in, 175
Canadian shield, 119, 120, 121, 128
Canyon de Chelly National Monument, 179
Carmel formation, 155, 156
Cedar Creek anticline, 96
Mesa ss. member, Cutler formation, 159, 168, 182, 183, 194, 197, 198
at Natural Bridges National Monument, 189
compared with De Chelly and Coconino-Glorieta, 206, 207
cross-stratification in, 186, 188, 189
depositional environments, 187-89
eolian deposits in, 179
fossils in, 189
isopach map, Colorado Plateau, 187
lateral relationships, 186
origin, 179
photo near type section, 190
type area of, 186
Mountain formation, photos, 168, 169
channel, coarse-grained turbidite fill in, 80
definition of, 162, 165
distributary sand of, 29, 144, 145, 229
river, 9, 12
references in literature to, 12
sandstone, ancient, 30, 145
Booch sand, 229
Cedar Mountain formation, 169
Jackpile, 145
Salt Wash member, Morrison fm., 165
Shinarump, 162
generalized section of, 163
system, of Chinle type, 164
oil and gas in, 177, 229-32
post-Mississippian, 121
turbidite deposits, in East Sansinena oil field, 79
type sands, 229, 232

Characteristics of Sandstone Reservoirs in United States, 208
Cherokee sand reservoir, relation to pre-Pennsylvanian erosion surface, 224
Cheslerian Series, axial trend of major sand bodies, Illinois basin, 127
channel-phase sandstones, 121
clastic ratio, Illinois basin, 123

compared with Gulfian Series, 128, 129
deltaic sedimentation, 128
facies trends, 123, 124
linear sand bodies in, 128
sandstones, cross-stratification directions, Illinois basin, 124, 127
fluvial-deltaic environment, 121
stratigraphic section, 122
thickness, in Illinois basin, 123
Chinle formation, 135, 155, 156
fluvial origin of, 162
mineralization in, 176
paleogeography of, 163
-type channels, 163, 164
Cincinnati arch, 119, 120, 121
Circle Cliffs uplift, 152
Claggett shale, 92
Classification, Sandstone-Body, Problems and Principles of, 3
basis of, 9, 10
Clayton formation, 125
Cliff House formation, San Juan basin, 98, 102
characteristics of, 115
gas production in, 98, 99
-Menefee strand-line contact, 106
sandstone benches of, 107, 110, 111, 113, 114, 116
transgressive shoreline, sand deposition along, 104
Club Mesa area, ore deposits in, 174
Coconino-Glorieta ss., 199, 206-207, 206-207
direction of cross-stratification dips, 206-207
isopach map, 206-207
Coconino ss., 156, 159, 178, 182, 197, 205
bedding characteristics, 202, 204, 205
depositional environment, on coastal dune deserts, 204
distribution, 199
eolian deposit, 199, 202, 204
origin of, 179
Codell ss., 96
Colorado Plateau
eolian sandstones in, 155
geologic features of, 152
oil and gas from fluvial sandstones, 177

INDEX

SANDSTONE RESERVOIRS IN UNITED STATES, CHARACTERISTICS OF, 208
age and thicknesses, 212
areal extent, 213, 215
associated with stratigraphic traps, origin of, 215
average nature of fields containing, 210
bars, oil pools in, 215, 227
basic data for, 210
distribution in U. S., 210, 211
Paleozoic, Mid-Continent, Illinois and Appalachian basins, 210
Tertiary, Gulf Coast, California, 210
thickness compared with quantity of fluid, 212
trapping conditions, combinations of, 211, 213, 215
types of, 215
Sandstones, Mesaverde, Producing, in San Juan Basin, GEOMETRY OF, 98
Permian Blanket, of Colorado Plateau, 179
see also Colorado Plateau

[ Upper Cretaceous, Rocky Mountain Area, SPATIAL DIVISIONS OF, 82
Sand Trends and Paleoslope in Illinois Basin and Mississippi Embayment. 119
Sand Cay-South Cat Cay oolite shoal, 62
idealized relationships in, 61
San Juan basin, gas accumulations in, 118
Geometry of Producing Mesaverde Sandstones in, 98
see also Mesaverde sandstones
maps of, 99, 109
Upper Cretaceous deposits in, 100
San Pedro basin, turbidites in, 71
San Rafael group, 156, 157
swell, 152, 179, 182, 183, 198, 199
Santa Margarita sands, 77
- Stevens sand facies, net-sand isopachs, 76
Santa Monica basin, turbidites in, 71
Schlee, J. S., and Moench, R. H., 134
sedimentation model, Chesterian Illinois basin and Gulfian Mississippi embayment, 131
miogeosynclinal basin, 132
depths, eolian and water-laid, distinctions between, 160, 162
Shannon ss., 96
shell-edge sands, 9
references in literature to, 12
environment, faunas of, Mississippi delta, 39
Shinarump channel, 162
generalized section, 163
member, Chine formation, 162
Shoals, Oolite Bahamian, 53
shoestring sand, 4, 5, 9
shore, 14
and offshore deposits, evolution of, 15
drift, 15
shoreface terrace, 14
cross sections of, 22–25
fore-set beds on, 21
height-to-width ratios of sand bodies, 21
shape and structure of, 21
shoreline positions, step-like character, 101
shorelines, Cliff House ss., 104
Upper Cretaceous, transgressive and regressive, 84, 100
slump structures, 69
sole markings in turbidites, 66, 67
South Cat Cay, 55
-Sandy Cay oolite shoal, 56, 57, 58, 61, 62
aerial photograph, 57
idealized relationships in, 61
South Pass bar, 30, 31
Southeast Pass bar, 30, 33
boring in, 38
finger, age of, 47, 48
gologic core test, 40, 42, 43–45, 47
Southwest Pass bar, 30–33
boring in, 38
finger, historical development of, 32
gologic core test, 41, 42, 45, 47
Spatial Dimensions of Upper Cretaceous Sandstones, Rocky Mountain Area, 82
spits, barrier, 14
steps in strand line, 99
Sterrett, Thomas S., and McKee, Edwin D., 13
Stevens sand, turbidit-current deposit, 72, 77
bundle of turbidites, 74
-Santa Margarita sand facies, net-sand isopachs, 76
Stokes, Wm. Lee, 151
strand line, steps in, 99
stratigraphic approach to oil and gas exploration, 232
traps, 5, 213, 215–17, 220–232
compared with accumulation size, 216
with geologic age, 217
facies changes in, 215
kinds of, 14, 215–17, 220, 221, 225, 229, 232
beach, 220, 232
channel, 221, 229, 232
