INDEX

A

Abnormal temperature with structure, 146
Acadia Parish, 667
Accumulation and discharge of oil, some physical and chemical properties of reservoir rocks bearing on, 825
Accumulation and migration of petroleum, 247
present interpretations of structural theory for oil and gas, 253
structural theory for oil and gas, 287
Accumulation and origin of oil, 309
Accumulation and structure in Michigan “basin” and its relation to Cincinnati arch, 531
Accumulation of oil, 13, 17, 53, 98, 304, 360, 552, 677
analytical application of theories, 303
anticlinal theory, 3, 4, 8, 9, 12
conditions necessary for, 6, 256
in California fields, factors governing, 735, 759
in Kevin-Sunburst dome, 706
in lenticular sands, 601
in Rocky Mountain district, 689
in shallow lagoons and bays, 459
in synclines, 18
in terrace structures, 435
problem of, 307
related to faulting, 509
related to porosity variations, 439, 505
relationship of, to structure and porosity in Lima-Indiana field, 521
time element of, 296, 301
where water absent, 729
Accumulation of oil and gas, 463
anticlinal theory, 316
essential factors in, 254
historical development of structural theory of, 1
in limestone, 365
in Montana, factors controlling, 717
in Rocky Mountain district, structural history and its relation to, 679
origin of oil and gas reservoirs of interior coal basin in relation to, 557
related to unconformities, 510
Accumulation of organic material, 28
conditions favoring, 362
Accumulation of petroleum, relations to structure, 429
Accumulation of source material, 55

1 Items referring to titles of papers are shown in italics.
main source of oil in Northern fields of Mexico, 398
Agua Nueva limestone fault breccia, 390
Alabama, 72
Alabama pool, 411
Alamitos Heights pool, 750
Alamitos zone, 218
Alaska, 30
Alberta, 158, 165, 167, 169, 347, 368, 702
high gravity of oil at Turner Valley due to thrust faulting and folding, 161
Alberta syncline, 703
Albertite, 9
Albion formation, 457
Albumen, 261
Alcohol, 38, 39, 261
Aldrich, H. R., cited, 539
Algae, 25, 42, 43, 235, 451
acid hydrolysis of, effect in formation of liquid oil, 270
Algal limestone, 366
Algal remains, 82
Aliso Canyon, 193
Allan, Thomas H., cited, 777
Allegheny County, New York, 461
Allegheny County, Pennsylvania, 465, 466, 469, 471
Allegheny formation, 453
Allen, E. T., Crenshaw, S. H., Johnson, John, and Larsen, Esper S., cited, 909
Allen County, Kansas, 400
Allen dome, 637
Alteration of anhydrite to gypsum, Grand Saline, fol. p. 642
Amarillo arch, 627
Amarillo district, 907, 608
Ambronn, Richard, cited, 997
American Petroleum Institute, 26, 450, 989
American Petroleum Institute Research, 365
American Petroleum Institute research program, 27
Amaden formation, 159, 698, 716
Anaerobes, 266
reduction of sulphates by, 918
Anaerobic bacteria, 36, 38, 46, 262, 268, 836, 875, 910, 914
effect on organic source material, 29
in oil-field waters, 836
Anaerobic bacterial activity, 462
Anaerobic conditions, 452
Anaerobic decomposition, 36, 39, 450
Anaerobic fermentation, hydrolysis of plant and animal residues in sea water by, 44
Anaerobic marine bacteria, 45
Anaerobic metabolism, 266
Anaerobic oxidation of crude petroleum, 266
Anaerobic sulphate reducing bacteria, 915
oxygen supply for, 921
Analyses of coal, 83
of Mexican limestones, 370
of waters in West Texas Permian basin, 873
United States Bureau of Mines, 149, 151
Analysis of ocean water, 957
of salt structures, 636
Spindletop crude oil, 152
Ancestral crude oils, 137, 139
Ancestral petroleum substance, 140
Ancestral Rocky Mountains, 682
Anderson, Belle, and Gahl, Rudolf, cited, 267, 915
Anderson, F. M., cited, 792
Anderson, Robert, and Arnold, Ralph, cited, 792
Anderson County, 276, 330, 400, 639, 659, 660, 669
Andrews, E. B., cited, 4, 5, 6, 12, 13, 16, 254
Androusoff, N., cited, 913
Anhydrite, 637, 639, 651
Anhydrite and sand from Hockley dome, Harris County, fol. p. 642
Antarctica, 30
Antelope Hills, 188
Anthracitization, 80, 89
Anthraxolite, 79
Anticlinal control of accumulation, 480
Anticlinal dome, elongate, 217
Ventura, 209
Anticlinal noses, accumulation of oil on, 400
Anticlinal structure a necessary condition of occurrence of oil, 8
Anticlinal theory of accumulation, 3, 4, 6, 7, 8, 9, 12, 15, 16, 20, 71, 253, 310, 403
early application, 12
opposition to, 9, 10
Anticline, asymmetrical, at Wheeler Ridge field, 203
pitching, in Kern River field, 203
Anticlines, 2, 3
closed, 20
plunging, 17
Appalachian basin, 485, 486, 499, 492, 496
Appalachian calcium chloride waters, 852
Appalachian coal basin, 537
Appalachian district, 58, 97, 342
source beds in, 58
Appalachian fields, 430
Appalachian folds, 340
INDEX

Appalachian geosyncline, 101, 102, 468, 472, 843
Appalachian oil, 102
Appalachian province, gravity of oils in, 101
Appalachian region, composition of oil-field waters of, 841
oil-field waters of, 834
Appalachian revolution, 463, 540, 547
Appalachian structural front, 539
Appalachian trough, 539
Appalachians, carbon ratios in, 85
Arbuckle group, 355
Arbuckle limestone, 293, 294, 356, 359, 410, 412, 763, 769, 856
Arbuckle Mountains, 574, 611, 615
Arbuckle-Wichita belt of mountain folding, 576
Arbuckle-Wichita system, 572
Archer County fields, 402
Archer County pools, 340, 342
Arizona, 682
Arkansas, 345, 578, 632, 666
concentration of Ordovician waters in, 277
relation between carbon ratios and oil and gas occurrence, 74
source beds in, 60
Armells field, 704
Armstrong, E. F., and Allen, J., cited, 42
Armstrong, J. M., cited, 353
Armstrong County, Pennsylvania, 478, 608
Arnold, Ralph, and Anderson, Robert, cited, 792
Arroyo Grande (Edna) field, 206, 228

Bach, cited, 36, 39, 40
Backhaus, A. A., cited, 925
Bacteria, 26, 36, 39, 40, 41, 44, 263, 302
effect on organic material, 35
fermentation of cellulose by, 38
formation of hydrocarbons by, 35
in coal, 43
in geologic formations, 43
influence on formation of oil, 32, 262
marine, 43
Bacterial action, 262, 264, 266, 462
in formation of oil, importance of, 235, 261
Bacterial decomposition, 450, 452
of cellulose, fats, and protein, 45
Bacterial origin of petroleum, 35, 43
Bacterial oxidation, 265
Bacterium aliphaticum liquifaciens, 264
Bacterium benzioli a and b, 263
Bahama Banks, 358
Bailey, J. R., and Thompson, W. C., cited, 921
Artesian field, 413
Artesian circulation, 597
Artesian flushing, 717
Ashbuner, Charles A., cited, 12, 16, 19
Ashton zones, 221
Aspen shale, 167
Asphalt, 56, 183, 207, 213, 394, 396, 397
in McKittrick field, 198
Asphalt seeps, 758
Asphaltic base, 107
Asphaltic oil, 207, 208, 209
in Los Angeles City pool, 213
Asphaltic oils, heavy, 238, 245
Asphaltic sands, 333, 334, 412
in Oklahoma City field, 295
Asphaltite, 79

Atlantic, coasts of, 30
Atlantic pool, 411
Augusta field, 319
Augusta pool, 294, 770
Austin chalk, 276, 295, 296, 378, 419
Austin chalk age of San Felipe formation, 385
Austin formation, 302
Australia, 76, 89
Avery Island, 636
Axis of structure, shifting of, 496

B

Bailey, T. L., cited, 666
Bailey (Wassam) zone, 219
Bath, H. F., cited, 908
Baker, C. L., cited, 75, 391
Baker-Glendive anticline, 945
Baku oil fields, 265
Balcones fault, 315
Balcones fault zone, 578
Baldwin Hills, 742, 749
Baldwin Hills uplift, 216
Baltic Sea, organic sediments in, 30
Banded coals, 82
Banff, 159
Bannatyne, 167
Bannatyne dome, 703
Bannatyne field, 710

Bevan, Arthur, cited, 697
Beverly Hills field, 750
Beyer, W. S., cited, 1012
Beyerinck, M. W., cited, 914

Bibliography, a study of the evidences for lateral and vertical migration of oil, footnotes, 400-411, 413, 415, 418, 419
accumulation of oil and gas in limestone, footnotes 366-374
an interpretation of local structural development in Mid-Continent areas associated with deposits of petroleum, footnotes, 585, 591, 614-616, 618, 619
California oil-field waters, footnotes, 934, 956
compaction and its effect on local structure, footnotes, 811-90
compensation of oil-field waters of the Appalachian region, footnotes, 841, 844, 845, 850, 851
eastern interior coal basin, 568
gologic occurrence of oil and gas in Montana, footnotes, 697, 700, 702, 704
geologic characteristics of producing oil and gas fields in Wyoming, Colorado, and northwestern New Mexico, footnotes, 722, 723, 725, 727, 728, 730
gology of Gulf Coast salt domes, 677; footnotes, 630, 634, 635-637, 639, 646, 648, 650, 651, 654, 656-659, 675, 666, 668, 669, 676
historical development of structural theory, 21; footnotes, 9, 12, 17-19
hydrogenation and origin of oil, footnotes, 235, 237, 239, 240, 242, 243
importance of unconformities to oil production in the San Joaquin Valley, California, footnotes, 790, 792
limestone reservoir rocks in the Mexican oil fields, footnotes, 377, 380, 382, 383-386, 390, 391, 393-395
natural history of Gulf Coast crude oil, footnotes, 199-211, 220, 234, 240, 142-146, 148
oil gravities in Rocky Mountain states, footnotes, 158, 162, 163
oil-field waters, footnotes, 834, 836, 837
oil-field waters of the Gulf Coastal Plain, footnotes, 891, 893, 894
organic matter in sediments, 33; footnotes, 27, 29
origin and accumulation of oil, footnotes, 310-317, 322, 324, 326, 328-330, 332, 334
origin of petroleum, footnote, 25
origin, migration, and accumulation of petroleum and natural gas in Pennsylvania, footnotes, 448-453, 462, 465, 466, 469, 475
origin, migration, and accumulation of petroleum in limestone reservoirs in the western United States and Canada, footnotes, 348-356, 358-363
origin of the oil and gas reservoirs of the eastern interior coal basin in relation to the accumulation of oil and gas, footnotes, 568
physical properties of petroleum in California, 230; footnote, 182
porosity, permeability, compaction, footnote, 808
present status of carbon-ratio theory, 91
problems of origin, migration, and accumulation of oil, footnotes, 337-341, 345
proposed classification of oil and gas reservoirs, footnotes, 435-438, 444, 445
relation of micro-organisms to generation of petroleum, 46; footnote, 40
relation of water analyses to structure and porosity in West Texas Permian basin, 889
relation of oil and gas pools to unconformities in the Mid-Continent region, footnotes, 761-767, 769-782
relationship of accumulation of oil to structure and porosity in the Lima-Indiana field, footnotes, 521, 526
some physical and chemical properties of reservoir rocks bearing on the accumulation and discharge of oil, footnote, 826
source beds for petroleum, 64
structural history and its relation to the accumulation of oil and gas in the Rocky Mountain district, footnotes, 679, 680, 682-685, 687, 689, 692, 693
structural influence on the accumulation of petroleum in California, footnotes, 736, 746-752, 758
structural theory for oil and gas migration and accumulation, footnotes, 234, 235, 256, 278, 260-267, 269, 270, 276-
INDEX

278, 280, 281, 283, 285, 288, 295, 296

structure and accumulation in the Michigan "basin" and its relation to the Cincinnati arch, footnotes, 538–544, 546–554, 553

subsurface temperature gradients, footnotes, 991–999, 1003, 1005, 1006, 1008, 1012, 1013, 1016, 1020

subsurface water characteristics in Oklahoma and Kansas, footnotes, 856, 868

sulphate reduction in deep subsurface waters, footnotes, 908–917, 919–921, 923, 925

waters of the oil- and gas-bearing formations of the Rocky Mountains, footnotes, 928, 932, 935
