Society books reviewing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of Book Editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society books are included in the ISI Index of Scientific Book Contents, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Society Publication can be found on the Society's web site: www.geolsoc.org.uk.

It is recommended that reference to all or part of this book should be made in one of the following ways:

GEE, D. G. & PEASE, V. (eds) 2004. *The Neoproterozoic Timanide Orogen of Eastern Baltica*. Geological Society, London, *Memoirs*, **30**.

BECKHOLMEN, M. & GLODNY, J. 2004. Timanian blueschist-facies metamorphism in the Kvarqush metamorphic basement, Northern Urals, Russia. In: GEE, D. G. & PEASE, V. (eds) *The Neoproterozoic Timanide Orogen of Eastern Baltica*. Geological Society, London, *Memoirs*, **30**, 125–134.

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG; Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk.

Index	249

Acknowledgments

Much of the research reported in this Memoir began during the IUGS-IUGG Inter-Union Commission on the Lithosphere's EUROPROBE programme in the context of the URALIDES and TIMPEBAR (Timan–Pechora–Barents Sea) projects. For ten years (1992–2001) EUROPROBE received much appreciated sponsorship from the European Science Foundation member organizations. Our Timanide research has been promoted by the Brussels-based INTAS programme and two INTAS projects—HALE 96-1941 (High Arctic Lithosphere of Europe) and NEMLOR 01-0762 (Northern European Margin and Lomonosov Ridge) have provided support for Russian colleagues and joint fieldwork. Grants from the Swedish Royal Academy of Sciences and financing of expeditions by the Swedish Polar Research Secretariat have, likewise, promoted our international collaboration. It is a pleasure to acknowledge the importance of these contributions to this synthesis of eastern European geodynamics.

During our work on the Timanides, we have only had access via translation to a small part of the relevant Soviet literature. However, our Russian colleagues have participated and, in many cases, guided EUROPROBE studies and drawn our attention to the main controversies. We particularly appreciate their collaboration and friendship.

In addition, we would like to express our appreciation for help with production of the Memoir, particularly to Dr Olga K. Bogolepova in Uppsala, the staff of the Geological Society Publishing House in Bath, and the many reviewers (below) who have improved the quality of the various chapters with thorough evaluations of scientific merit and, often, with help improving the linguistics.

Reviewers: P. G. Andreasson, A. Andresen, H. Austrhiem, S. Bogdanova, D. Brown, F. Corfu, I. Dalziel, P. F. Friend, R. Gabrielsen, R. Gorbatshev, P. Gromet, N. Henriksen, A. K. Higgins, R. Ingersoll, F. Kalsbeek, M. Lindstrom, K. Ludwig, M. Moczydlowska-Vidal, A. Maslov, V. Melezhik, V. Puchkov, D. Roberts, J. Scarrow, F. Schaffer, R. Scott, A. Siedlecka, S. Sintern, R. Strachan, M. Tichomirova, A. Willner, M. Whitehouse.
