Special Publication reviewing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of Book Editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Index of Scientific Book Contents, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Special Publication can be found on the Society's web site: www.geolsoc.org.uk.

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk.

HEEREMANS, M., FALEIDE, J.I & LARSEN, B.T. 2004. Late Carboniferous-Permian of NW Europe: an introduction to a new regional map. *In*: WILSON, M., NEUMANN, E.-R., DAVIES, G.R., TIMMERMAN, M.J., HEEREMANS, M. & LARSEN, B.T. (eds) *Permo-Carboniferous Magmatism and Rifting in Europe*. Geological Society, London, Special Publications, **223**, 75–88.

Preface

The chapters in this volume summarize the results of an international research project, PCR ('Permo-Carboniferous Rifting in Europe'), which focused on the geodynamic setting of Permo-Carboniferous rifting and associated magmatism in the northern foreland of the Variscan orogenic belt. For comparative purposes, the project also included a detailed study of Permo-Carboniferous rifting in the Iberian peninsula, within the Variscan Orogen. This project was funded as a Training and Mobility of Researchers (TMR) network (ERB FMRXCT96 0093) by the European Commission from 1997 to 2001. The PCR Project Team* included researchers from the UK, Norway, the Netherlands, Germany, Spain, Italy, France and Switzerland. Also included in the volume are a number of chapters from research groups in Germany, Poland and Spain, who were not formally affiliated to the PCR project at the outset, but who made important contributions to our understanding of Permo-Carboniferous magmatic activity in Europe. Preliminary results of the PCR project were presented at a special *Geoscience 2000* symposium at the University of Manchester, UK, in April 2000.

We are particularly indebted to Norsk Hydro ASA, Statoil and the Norwegian Petroleum Directorate (NPD) for their logistical support with this project.

The following organizations helped us tremendously in the provision of samples, well and seismic data: Amerada Hess UK Ltd; the German North Sea Consortium (including BEB Erdgas und Erdöl GmbH, Wintershall AG and RWE-DEA AG); TGS NOPEC; the Geological Surveys of Denmark and Greenland (GEUS), Ireland and Great Britain (BGS); the Netherlands Institute of Applied Geoscience (NITG-TNO); Niedersächsisches Landesamt für Bodenforschung (NLFb); Bundesanstalt für Geowissenschaften und Rohstoffe (BGR), and GFZ Potsdam.

John Winchester and Tim Pharaoh of the PACE project provided extremely useful advice about the Palaeozoic amalgamation of the various basement terranes within Europe.

The editors would like to thank the following people for their assistance with the reviewing of manuscripts submitted for publication in this Special Publication: D. Barfod, B. Bonin, C. Breikreuz, M. Brown, J.-M. Cèbria, J.-P. Derooin, M. Faure, P. Floyd, H.-J. Förster, M. Fowler, R. Gabrielsen, S. Gibson, M. Henderson, A. Henk, V. Janousek, W. Kramer, M. Lago, H. Lippolt, J. López-Ruiz, V. Lorenz, R. Macdonald, A. Monaghan, R. Oberhansli, K. Obst, S. Pallesen, T. Pedersen, T. Pharaoh, D. Praeg, D. Quirk, A. Saunders, M. Steltenpohl, L. Stemmerik, I. Tolstikhin, B. Upton, O. Vejbaek, C. Villaseca, J. Winchester and P. Ziegler.

Finally, we would like to thank the staff at the Geological Society Publishing House, in particular Angharad Hills and Ruth Harwood, for their patience and support in the production of this volume.

Marjorie Wilson, Else-Ragnhild Neumann, Gareth Davies, Martin Timmerman,
Michael Heeremans & Bjorn Larsen

*The PCR Project Team: University of Leeds, UK – Marjorie Wilson (Project Leader) & Martin Timmerman; University of Oslo, Norway – Else-Ragnhild Neumann, Jan-Inge Faleide, Michel Heeremans, Elizabeth Ann Spencer (née Dunworth), Tom Andersen, Bjorn Sundvoll & Annik Myhre; Vrije University, Amsterdam, the Netherlands – Gareth Davies, Sierd Cloetingh, Christoph Pascal, Linda Kirstein, Jan Wijbrans & Tibor Dunai; University of Kiel (GEOMAR), Germany – Ernst Flueh, Tim Reston & Stephane Rouzo; Norsk Hydro ASA Norway – Bjorn T. Larsen & Arnd

Wilhelms; Museo Nacional de Ciencias Naturales (MNCN), Madrid, Spain – Giulia Perini, Jose-Maria Cebria, Pepe Lopez-Ruiz & Miguel Doblas; and Affiliated Partners – Chris Breitreutz (GFZ, Potsdam), Marcus Schumacher (University of Basel, Switzerland) & Karsten Obst (University of Greifswald, Germany).
