Special Publication reviewing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of Book Editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Index of Scientific Book Contents, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Special Publication can be found on the Society's web site: www.geolsoc.org.uk.

It is recommended that reference to all or part of this book should be made in one of the following ways:

GROCOTT, J., MCCAFFREY, K. J. W., TAYLOR, G. & TIKOFF, B. (eds) 2004. *Vertical Coupling and Decoupling in the Lithosphere*. Geological Society, London, Special Publications, **227**.

GIORGIS, S., MARKLEY, M. & TIKOFF, B. 2004. Vertical-axis rotation of rigid crustal blocks driven by mantle flow. In: GROCOTT, J., MCCAFFREY, K. J. W., TAYLOR, G. & TIKOFF, B. (eds) *Vertical Coupling and Decoupling in the Lithosphere*. Geological Society, London, Special Publications, **227**, 83–99.

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk.

TIKOFF, B., RUSSO, R., TEYSSIER, C. & TOMMASI, A. Mantle-driven deformation of orogenic zones and clutch tectonics	41
Vertical axis block rotations in the upper crust, horizontal and vertical partitioning and implications for vertical coupling-decoupling in the lithosphere	
LEGG, M. R., KAMERLING, M. J. & FRANCIS, R. D. Termination of strike-slip faults at convergence zones within continental transform boundaries: examples from the California Continental Borderland	65
GIORGIS, S., MARKLEY, M. & TIKOFF, B. Vertical-axis rotation of rigid crustal blocks driven by mantle flow	83
TEYSSIER, C. & CRUZ, L. Strain gradients in transpressional to transtensional attachment zones	101
CERCA, M., FERRARI, L., BONINI, M., CORTI, G. & MANETTI, P. The role of crustal heterogeneity in controlling vertical coupling during Laramide shortening and the development of the Caribbean–North America transform boundary in southern Mexico: insights from analogue models	117
FABBRI, O., IWAMURA, K., MATSUNAGA, S., COROMINA, G. & KANAORI, Y. Distributed strike-slip faulting, block rotation, and possible intracrustal vertical decoupling in the convergent zone of SW Japan	141
Lower crustal flow and topography	
WHITNEY, D. L., PATERSON, S. R., SCHMIDT, K. L., GLAZNER, A. F. & KOPF, C. F. Growth and demise of continental arcs and orogenic plateaux in the North American Cordillera: from Baja to British Columbia	167
Orogenic examples	
MCCLELLAND, W. C. & OLDOW, J. S. Displacement transfer between thick- and thin-skinned décollement systems in the central North American Cordillera	177
KLEPEIS, K. A. & CLARKE, G. L. The evolution of an exposed mid-lower crustal attachment zone in Fiordland, New Zealand	197

MCCAFFREY, K. J. W., GROCOTT, J., GARDE, A. A. & HAMILTON, M. A. Attachment formation during partitioning of oblique convergence in the Ketilidian orogen, South Greenland	231
FERNÁNDEZ-FERNÁNDEZ, E., JABALOY, A. & GONZÁLEZ-LODEIRO, F. Lower Miocene deformation in the hanging wall of the Internal-External Zone boundary of the Betic Cordillera: deformation at the edges of vertical-axis rotation domains in oblique convergent margins	249
Subduction examples – island arcs and marginal basins	
TAKESHITA, T. & YAGI, K. Flow patterns during exhumation of the Sambagawa metamorphic rocks, SW Japan, caused by brittle–ductile, arc-parallel extension	279
FABBRI, O., MONIÉ, P. & FOURNIER, M. Transtensional deformation at the junction between the Okinawa trough back-arc basin and the SW Japan island arc	297
Melts and crustal rheology	
WHITNEY, D. L., TEYSSIER, C. & FAYON, A. K. Isothermal decompression, partial melting and exhumation of deep continental crust	313
VIGNERESSE, J. L. & BURG, J. P. Strain-rate-dependent rheology of partially molten rocks	327
Index	337

Acknowledgements

This special publication developed out of two symposia: 'Deformation at Convergent Margins', convened at the European Union of Geosciences meeting (EUG XI) at Strasbourg in April 2001; and 'Vertical Coupling and Decoupling at Convergent Margins' convened at the AGU Fall Meeting in San Francisco in December 2001. We are grateful to all the authors for submitting their work and supporting the volume and we are indebted to our expert panel of reviewers who, through their conscientious work, have ensured the high quality of the volume. We are especially grateful to Dr Stella Bignold (Kingston University) who assisted us in the compilation of this volume.

The panel of reviewers for this volume was:
