numerical modelling, salt tectonics (Continued)

salt displacement 510
set-up 508–510
stringer breaking 510–512
results 512–515
results discussed 515–518
summary 328–329
8180, La Popa weld veins 112–113, 115, 117

Oladdie Diapir counter-regional weld 34
Oman see South Oman Salt Basin
Onion Creek Diapir (Utah) 18
Orpheus Graben 332
overburden effects on salt flow 207, 208, 209, 229, 245, 250, 303

palaeohydrology see hydrology and palaeohydrology
Paradox Basin (Utah) 18, 34, 59, 163, 261
Parana Basin 35–60
Parentis Basin
basement structures 374
bathymetry 365, 366
cross-section 365
geological setting 362–365
history of exploration 361
map 362
Pyrenean orogen effects 374–375
salt diapir growth 370–372
salt-related structures 365–366
eastern 367–368
western 368–369
seismic dataset 365, 367, 368, 369, 370, 371
stratigraphy 366
summary history 373, 375–376
Parentis Field 361
Parras Basin 35, 60
Parras Formation 9, 12, 23, 35, 36, 41, 42, 62, 110
fracture abundance 113
particle image velocimetry (PIV) 5
passive downbuilding diapirs 246
passive margins
salt flow 207, 245, 265
see also Angola; Brazil; North African salt province
Patawarta Diapir 82, 84, 85, 87
depositional sequence stratigraphy 96–97
halokinetic sequences 97–99
stratigraphy
Bonney Sandstone 94–96
Wonoka Formation 88–94
summary of data 99–100
depositional environment 100–102
structural analysis 102
unroofing sequence 96
Patawarta salt sheet 26
Pelotas Basin 209
Penarth Group 533, 534
Perdido fold belt 266, 270
Persian Gulf, petroleum prospectivity and salt tectonics 131
petroleum prospectivity and salt tectonics 131, 133, 135–138
modelling 149–153, 155
physical modelling see analogue modelling
Piqarras Formation 160
pinned inflation model 99–100, 101
Poiseuille flow 169, 303, 465, 466
Poland, flip-flop structures 261
Polish Basin 410, 412
geological setting 382–384, 395–397
Klodawa Structure
analogue modelling
methods 397–399

operation 399–400
scaling parameters 398
results
post extension 400–401
post inversion 402
evolution 397
map 396
numerical modelling
methods 402–404
results 405
results compared 405–407
shape 396, 397
salt tectonics of mid-Polish Trough
axial 389–392
flank, NE 384, 386–387
flank, SW 387–389
summary 392–393
potash resource 1
Potrerrillos Formation 9, 10, 11, 12, 15, 16, 23, 35, 36, 40, 41, 42, 44, 62, 109, 110
fracture abundance 113
Pound Subgroup 84
Poza de la Sal Diapir
default fault 525
geological setting 522
joint patterns 522–523, 524, 525
map 523
modelling stress field 525
results 527
results discussed 527–530
seismic section 523
Pricaspian Basin (Kazakhstan) 18
Puffin Diapir 373
Pyrenean orogen 363–364, 374–375
radial gravitational flow 207
radioactive waste repository 1
rafting and raft tectonics 1, 207, 278
ramp, defined 81
reactive diapir, defined 245
Reconcavo Basin (Brazil) 136
Red Sea, salt flow 170
Riyadh Group 131
Rolla salt pillow 287, 388
roller see salt roller
rolling hinge models 609
rollovers 265
Russia, oilfields 132
Sabina Basin 35, 60
Sable Basin 332, 335
salt, defined 1, 209
salt deflation, defined 278
salt diapirs 18, 19, 34, 39, 60, 261, 262, 373, 392
analogue model 551, 552
Bristol Channel Coast 539, 543
El Gordo Diapir 9, 10, 35, 61, 109
El Puplote Diapir 9, 10, 12, 15, 22, 23, 35, 61, 109
formation 245, 246–248, 265, 271
Hänigsen diapir 611
Parentis Basin 370–372
Polish Basin 387, 389, 390, 391, 392
see also Klodawa Salt Structure; Patawarta Diapir; Poza de la Sal Diapir
salt drainage 168–170, 209
see also drainage
salt flow 107
see also analogue modelling
salt glaciers (namakiers) 5, 172, 234
model for North African salt province 579
see also Medjez-El-Bab
salt loading 170
INDEX
