Acknowledgments

Challenging Cases in Pediatric Infectious Diseases could not have been written without support, motivation, encouragement, and help. William Considine, president and CEO of Akron Children's Hospital, supported my efforts and made it possible for me to work off campus where I could write with little interruption. Lori Lothian, a special person in my life, provided encouragement and companionship while I was writing in Vancouver. My children, Lindsey and Thomas, encouraged me to pass on some of what I have learned "for the children." Martha Cook, my editor, promised to help and came through in spades. I thank George Nankervis, MD, PhD; Blaise Congeni, MD; and John Bower, MD, for permission to use their wonderful picture collection. Finally, I deeply appreciate Owen Hendley, MD; John Bower, MD; and Blaise Congeni, MD, for their critical review and keeping me honest and more importantly, accurate. My gratitude to all.
