An Assessment of the Relation Between Analysts’ Earnings Forecast Accuracy, Motivational Incentives and Cognitive Information Search Strategy

James E. Hunton
University of South Florida

Ruth Ann McEwen
Virginia Commonwealth University

This article was originally published in 1997 in *The Accounting Review* 72 (4): 497–515.

Based on the pattern of misconduct identified in the investigation summary, "Report of Judith A. Malone, Bentley University Ethics Officer, Concerning Dr. James E. Hunton (2014)," the October 2014 supplement to that report, and the co-author’s inability to produce data or other information supporting the existence of primary data or confirming how the study was conducted, the American Accounting Association, as publisher, is retracting this article. There were no findings or evidence that Dr. Hunton’s co-authors were aware of or complicit in Dr. Hunton’s misconduct.

Supplemental Material

The supplemental materials include:

- Report of Judith A. Malone, Bentley University Ethics Officer, concerning Dr. James E. Hunton and the October 2014 supplement to that report
- Original article “An Assessment of the Relation Between Analysts’ Earnings Forecast Accuracy, Motivational Incentives and Cognitive Information Search Strategy”
