Intensive care unit staff will not go back to restricted visiting hours

British Journal of Anaesthesia, 2015; 115(2): 319–20,
DOI 10.1093/bja/aev240

The letter to the Editor referenced as ‘Challan-Belval A et al. Ann Fr Anesth Reanim 2013; 32: 123–4’ should have been quoted in the correspondence. Although these two studies are distinct with two different aims, the authors acknowledge that it is important to mention the first work in the latest correspondence since some of the data are shared by the two studies.
