Information for Subscribers and Advertisers

The American Journal of Epidemiology is published twice monthly, two volumes of twelve issues appearing each year. Subscriptions are on an annual basis and are entered to begin with the January 1 issue. Renewals are billed in advance of the calendar year. 1994 institutional subscription rates: US, $225.00 (single issues $11.00); foreign, $233.00 (single issues $12.00). These regular, full rate subscriptions and all other subscriptions include Epidemiologic Reviews, our reviews in the field of epidemiology, presently published in two issues a year (single issues $20.00). All subscriptions must be paid in advance in checks in US dollars drawn on a US bank. Payment by VISA and MasterCard available; include account number, expiration date, and signature.

Personal subscriptions through membership in the Society for Epidemiologic Research (SER). The Journal is sponsored by the SER, and SER dues include a one-year subscription to the Journal and Epidemiologic Reviews. Annual dues for the Society are $100.00 US or $105.00 foreign. Full-time graduate students are eligible for student membership at $75.00 US or $80.00 foreign. SER dues should be sent to the Journal office. All SER subscriptions are for personal use only and may not replace regular institutional subscriptions. For further information on the SER write to Dr. Joseph Lyon, University of Utah School of Medicine, DIPM, 50 N. Medical Drive 1C26, Salt Lake City, UT 84132, USA.

Other personal subscriptions. These subscriptions are available for 1994 at the special rates of $112.50 US or $116.50 foreign. As with SER subscriptions, these subscriptions are for personal use only and may not replace regular institutional subscriptions.

Back issues of Epidemiologic Reviews. Starting with Volume 15, published in two issues, each issue is $20.00. Other earlier (annual) issues still available include Volumes 3-14 ($20.00 per copy); Volumes 1 and 2 are out of print. All orders should be sent to the Journal office.

Microfilms. Microfilms of the Journal and Epidemiologic Reviews are available from Princeton Microfilm Corporation, P. O. Box 2073, Princeton, NJ 08543, USA.

Change of address. If you change your address, or if you need to write to us about your subscription for some other reason, please enclose a mailing label from an old issue or provide in full both your old and new addresses and name.

Missing issues. If you are missing an issue, please allow three months from publication date before requesting a replacement. Claims are honored up to one year after publication of an issue.

Requests for permission to reproduce. Requests for permission to reproduce Journal articles or portions of articles (including tables and figures) should be sent to the editorial office at the address below. A stamped addressed envelope should be included with the request.

Advertising. The Journal accepts advertising from medical publishers, manufacturers of drugs and laboratory equipment, and institutions seeking personnel in epidemiology and related fields. Notices of meetings of interest to epidemiologists and information about degree programs are also published as paid advertisements. Deadlines are the 1st and the 15th of the preceding month (i.e., the deadline for the January 1 issue is December 1). Rates for commercial advertisements (products, books, services, etc.): $900.00 full page and $600.00 half page. Advertisements for employment positions, traineeships, or meetings (courses): $500.00 full page and $375.00 half page. Note: As of January 1, 1993, a fee of $100 was added for typesetting. Advertisements submitted for more than one issue of the Journal will be given a lower rate per advertisement. Cash discounts available to advertising agencies. Typed copy should be double-spaced and in duplicate, one original and one clear copy. Camera ready copy should be mailed flat to the Journal street address, with ads prepared on a laser printer, preferably boxed (full page ads, 5-1/2 inches wide by 8-1/2 inches high; half page ads, 5-1/2 inches wide by 4-1/8 inches high). Send all ads to Christopher T. George, Advertising Manager, American Journal of Epidemiology, 2007 E. Monument St., Baltimore, MD 21205, USA (Telephone: 410-955-3441; fax: 410-955-0344).

Send payments only to:
American Journal of Epidemiology
P.O. Box 64655
Baltimore, MD 21264-4655, USA

Address all other correspondence to:
American Journal of Epidemiology
2007 E. Monument St.
Baltimore, MD 21205, USA
Instructions to Authors

Correspondence and Mailing Information

Address correspondence to Editor, American Journal of Epidemiology, Candler Building, Suite 840, 111 Market Place, Baltimore, MD 21202, U.S.A. All manuscripts should be sent to this address for recording and routing to an editor. Do not specify editor in addressing envelope.

The cover letter should include the name and address to which page-galley proof and other correspondence should be sent, as well as the author's telephone number and fax number, if available. Do not submit articles or letters by fax. All authors listed on the cover page must sign a statement indicating that they have read and approve of the contents of the submitted manuscript. Upon acceptance of the final revision of the manuscript, all authors must sign a Publication Agreement form (see "Copyright") and a statement accepting responsibility for publication charges.

Page-galley proof should be carefully read, corrected if necessary, signed by the senior author or designated coauthor, and returned with the edited manuscript and reprint order form within 48 hours after receipt. Important: When returning the reprint order form, please do not prepaid. We will invoice for the correct publication charges after the article has been published. (See "Page charges" for excess page charge schedule.)

Manuscripts

The American Journal of Epidemiology considers manuscripts that have not been previously published, do not essentially duplicate already published material, and are not being simultaneously considered for publication elsewhere. If the submitted manuscript is based on the findings of an article in press or such an article is cited in support of current findings, a copy of the article should accompany the submitted manuscript.

Reports of original research are published in the form of Original Contributions and Brief Original Contributions, both of which may comprise field and laboratory studies on infectious diseases and noninfectious acute and chronic diseases or studies on statistical or methodological issues. The Reviews and Commentary section contains signed editorials, reviews, and comments on various aspects of epidemiologic research.

Letters to the Editor should refer to articles previously published in the Journal. A letter should convey the author's views as concisely as possible and contain a reasonable number of references. The letter is usually sent to the first author of the original paper for a response, if the authors wish to give one, in the same issue in which the letter is published. The responding author(s) should reference the critique before citing any other references.

Copyright

In accordance with the copyright law effective January 1, 1978, authors of manuscripts accepted for publication in the Journal will be asked to sign a Publication Agreement for the assignment of copyright to The Johns Hopkins University School of Hygiene and Public Health. The published manuscript becomes the sole property of the Journal and may not be submitted elsewhere for later publication without written permission from the Journal. Previously published data will not be accepted for publication. Questions regarding copyright and requests to reproduce published data should be directed to the Journal office.

Use of copyrighted material. If a manuscript contains tables or figures fully reproduced or closely adapted from a previously published book or paper (including the author's own previously published work), the author must supply the Journal with written permission from the original copyright holder. As a matter of courtesy, written permission from the author of the previous work is also requested.

Typescript Requirements and Number of Copies

Please use these guidelines for maximum length of the article, exclusive of tables, figures, references, and abstract: Original Contribution, 4,000 words; Brief Original Contribution, 1,500 words; Review or Commentary, 4,000 words; Letter to the Editor, 500–600 words. Authors are encouraged not to include lengthy, encyclopedic tables but to incorporate creative synthesis.

The manuscript should be typed double-spaced, with 1/4-inch margins at top, bottom, and sides of page, on one side of 8 1/2 × 11-inch paper. The author's name and page number should appear at the top right of each page. Print should be letter quality.

The original typewritten manuscript, with duplicate 4 × 6-inch copies of figures, and three complete nonreturnable copies are required. Each manuscript copy should include a photocopy of each figure and table. The cover letter should be submitted in duplicate and must include the author's phone number and a mailing address for correspondence and galleys. If the manuscript is subsequently revised, the original and three complete copies of the revision should likewise be sent.

Please address each point raised by the reviewers in any revision of the manuscript. On two copies of the revised manuscript, indicate where changes were made (a highlighter is a good method). In your letter accompanying the revised manuscript, indicate your reasons for not accepting any particular suggestions by the reviewers and the editor. A DOS diskette is a requirement with the final revision of the paper. Please specify what software was used. Note that we can handle either 5½- or 3½-inch diskettes.

If your document has been created using WordPerfect, please do not use the End Notes feature for references. References created in this manner will be lost when your document is converted to ASCII during our editing process. Please type references in our style at the end of the document.
Code of Ethics

The Journal subscribes to the code of ethics for authorship discussed in various articles in the Annals of Internal Medicine (e.g., see Ann Intern Med 1984;100: 592–4, 1986;104:257–62, 266–7, etc.).

Format and Style

A current copy of the Journal will show the correct format and style. It should be used in conjunction with the CBE Style Manual, available from the Council of Biology Editors, Inc., 11 S. LaSalle Street, Suite 1400, Chicago, IL 60603 (telephone: (312) 201-0101; fax: (312) 201-0214).

If you have additional questions about Journal style after reading the following instructions, please contact the Journal office and a Technical Editor will assist you.

Cover page. Provide cover page with title and authors only (without degrees or affiliations). Superior footnote numbers are used to indicate affiliations, which go on a separate page.

Footnotes page. A separate page should give (in this order) an alphabetical list of approved abbreviations (see section on acronyms below), authors’ affiliations, and complete address for reprints. Use US Postal Service abbreviations for states. Provide a running head below, a short title of not more than 50 letters and spaces.

Grants and acknowledgments. The grants or agencies supporting work and the acknowledgments should be given in this order after the text and before the references. Give no degrees in the acknowledgment; however, “Dr.” should precede the name of each person with a medical and/or doctoral degree. Do not thank reviewers or study subjects.

Abstract. The abstract should not exceed 200 words for an Original Contribution or 100 words for a Brief Original Contribution. An abstract usually eliminates the need for a summary. Type body of abstract as a single, double-spaced paragraph. Include study year(s), location, and population studied, if applicable. Use impersonal “the author(s).”

Keywords. For all submissions, give a list of not more than eight keywords in alphabetical order, below the abstract. Keywords should be selected from a current copy of Medical Subject Headings of Index Medicus (published by the National Library of Medicine). In submissions which do not require an abstract (including letters to the editor), list keywords on a separate page.

Headings. The main headings used in Original Contributions and Brief Original Contributions are MATERIALS AND METHODS, RESULTS, and DISCUSSION. (These headings may not apply to statistical papers.) Place flush left on page in capital letters; do not underline or use bold lettering. Do not use “Introduction” as a heading.

Second-level headings are flush left with only the first letter of the first word in upper case. Do not underline.

Third-level headings are underlined and begin the paragraph (with only the first letter of the first word in upper case), followed by a period.

Do not number the sections of the paper.

Acronyms. To improve clarity and readability, the Journal strictly limits the use of acronyms. Only acronyms and abbreviations needed to stand for long, involved terms, such as hepatitis B surface antigen (HBsAg), will be allowed. The acronyms CI, RR, OR, and SMR may be used in parentheses after being defined the first time used. Acronyms and abbreviations may be used in tables and figures if defined in the table legends or footnotes and in the figure legends.

An acronym must be defined in parentheses in the text at its first appearance, as well as in the abbreviations footnote. Please contact the Journal office if you have a question about the use of an acronym.

Disclaimers. The Journal does not print disclaimers, such as a statement that a government agency does not support the findings or does not endorse the use of products mentioned in the paper.

Trade names. For products used in experiments (particularly those referred to by a trade name), give manufacturer’s full name and location (in parentheses). When possible, use generic names of drugs.

Use of “percent” in text. Express percentage in text as percent (one word). Use % symbol in abstract, tables, and figures (including legends). Use mg/100 ml rather than mg%.

Footnotes to text. Avoid footnotes to text. Incorporate such material into the text (e.g., in parentheses).

Numbers. Write out numbers under 10, except for decimals, percentages, measurements, and units of time; express numbers 10 and over in arabic numerals. (Use numerals for case 1, subject 2, etc.) Please insert commas in numbers with four or more digits.

Metric system. We strongly request that authors use the metric system for all measurements. Where US measurements must be used, metric equivalents must be given in parentheses.

Decimal fractions. For decimal fractions less than 1.00, use zero in the whole-number position, e.g., 0.001. Note style for probability: \( p < 0.01 \), with a lower case \( p \). Use spaces before and after any mathematical symbol.

Confidence intervals. All confidence intervals are expressed without an equal sign and with the use of a dash (rather than a comma) between values (e.g., 95 percent confidence interval 1.20–1.90). When a confidence interval includes a minus value, use “to” instead of the dash, i.e., 95 percent confidence interval \(-0.01 \) to 0.05.

Equations. Whenever possible, mathematical equations should be written for typesetting on a single line, as \( al(a + b) \) and \( \exp(-x) \). With proper use of braces, brackets, parentheses, and exponents, even fairly complicated expressions can be put in this form.

When referring to an equation in the text, use “equation 6” or “expression 6.”

Regression analyses. Regression coefficients are not suitable for final results of regression analyses and should be converted into more generally meaningful terms (e.g., rates, means, relative risks, odds ratios). Note that because regression coefficients are unit dependent for continuous variables and category dependent for discrete or ordinal variables, the Journal requires statements specifying the units or categories, i.e., as paren-
thetical statements in the text or in table footnotes or figure legends.

**Tables.** Each table should be typed on a separate page. An original typed version of each table rather than a reduced photocopy is necessary for ease in editing and typesetting.

Tables should be numbered (arabic numerals) in the sequence in which they are mentioned in the text. They should be concisely constructed and self-explanatory, with adequate headings and footnotes. Use single top rule, single rule below boxhead, and single bottom rule. Do not use rules within the table body. Column headings should be clearly delineated, with straddle rules over pertinent columns to indicate subcategories.

Table titles should give details on place of study, time of study, and study population (if applicable). TABLE 1 should be typed flush left, followed by a period and the title; capitalize only the first word and proper nouns. (In text, use lower case beginning letter for the words table and figure.) Leave blank spaces for no entry. For footnotes, use symbols in this order: *
† § II * 

Use asterisks (*, **, ***) for p values, if necessary. If p values repeat in successive tables, they should be defined in a footnote to each table in which they appear.

**Figures.** Preferably, figures should be submitted in duplicate as 4 × 6-inch laser-jet or glossy prints, with the name of the author, the figure number, and top marked lightly on the back of each print (use a label if possible, or mark in pencil; do not use ink). Letters, numbers, decimal points, and symbols should be large enough and sharp enough to be readable when figures are reduced. All figures will be reduced either to fit in one column or to fit within the two-column width of a journal page. In maps, add scale (in kilometers or miles) and direction north. Figures should be professionally designed, clear, and (together with caption) self-explanatory. Graphs should be drafted so that they will be legible if reduced in size for printing. Photographs should be high-quality prints, but should be typed double-spaced together on one page. Each leged should be a separate paragraph and should include details on place of study, time of study, and study population (if applicable). Define any acronyms used in a figure in the legend. Include photocopies of figures with each manuscript copy.

Graphs should be professionally designed, clear, and (together with caption) self-explanatory. Graphs should be drafted so that they will be legible if reduced in size for printing. Photographs should be high-quality prints, suitable for reduction to page size.

**References**

Number references consecutively in the order in which they are mentioned in the text. Reference numbers in text are full-sized arabic numerals and should be placed in parentheses within the sentence. For three or more consecutive references cited all at once, give as (1–4). Give other references as (4, 5, 12), with spaces between the reference numbers.

When directly quoting material in the text, give the reference number followed by the page number(s) of the quotation, e.g., (24, p. 65).

**Important:** All statements of scientific fact should be referenced. Failure to do so may cause considerable delay in processing the manuscript and may necessitate renumbering references throughout the paper after it has been edited.

References to personal, written communications should be inserted in parentheses in the text rather than in the reference list. Give name, institutional affiliation, "personal communication," and year (in that order). Verbal communications may not be cited as supporting documentation.

Information from a manuscript submitted for publication but not yet accepted may be referenced in parentheses in the text. Give name, institutional affiliation, and "unpublished manuscript." Unpublished data may also be cited in the text. However, authors should not refer to "forthcoming" papers or promise future publication of results.

References must be verified by the author(s) against the original documents and must be exact as to authors' names, initials, and article title. Please supply inclusive pages; if only one page number is given, indicate whether the reference is a letter or an abstract in parentheses after the title. Include in the reference list manuscripts accepted but not yet published; designate the journal followed by "(in press)." For references to papers presented at conferences, give location, month, and year of the conference.

For articles printed in a language other than English, indicate the language in parentheses after the article title.

Examples of correct forms of references are given below. Type double-spaced. The titles of journals should be abbreviated according to List of Journals Indexed in Index Medicus (published by the National Library of Medicine). If there are more than three authors, list only three and add "et al." Telescope page numbers, e.g., 132–6.

**Examples of Reference Style**

**Standard journal article**

**Committee or corporate author**

**Book**

**Chapter in book**

**Agency publication**

**Conference presentation**

Pourier MC. DNA adduct determination in human tissues and blood cell DNA samples. Presented at the Mary
Lasker Conference of the American Cancer Society,

Charges

**Author's alterations in page galleys.** Authors will only be charged for alteration costs incurred. According to the nature of the alterations, changes will be charged at a **minimum** of $3.00 per change in page galleys. Changes made beyond the page galley stage will be charged at a higher rate. To expedite purchase orders, all authors are requested to allow $75.00 for author's alterations in their purchase orders.

**Page charges.** There is no page charge for papers of four printed pages or less. (This will include many Brief Original Contributions.) For papers longer than four pages, charges are as follows: Original Contributions, $75 per page for the fifth and sixth printed pages and $90 per page for the seventh and succeeding pages (multi-part papers in a single issue are considered a single contribution in computing page changes); Reviews and Commentaries, $60 per page for all pages in excess of four.

**Reprints.** Authors are urged to order sufficient reprints to cover anticipated needs, since reordering after the issue is published is considerably more expensive. Reprints may be ordered in increments of 100 by filling out the reprint order form, which is returned to the Journal office with page-galley proof. **Note: Do not prepay.** We will invoice for the publication charges after publication of the article.

If the supply of reprints is exhausted, the author should contact the Journal office either to reorder the quantity desired or for special permission to reproduce this quantity. A royalty fee will be charged by the Journal in cases in which the author makes his or her own arrangements to have an article reproduced. Published manuscripts are the sole property of the Journal and cannot be reproduced without written permission.

---

**Associate Professor of Epidemiology**

Henry Ford Health Sciences Center, Detroit campus of Case Western Reserve University (HFHSC-CWRU) is seeking two candidates for faculty research positions. The successful candidates will develop and collaborate on both clinical and community-based research studies. One of the positions is for an epidemiologist specifically interested in pediatric epidemiology.

HFHSC-CWRU has a growing team of epidemiologists, biostatisticians, clinical researchers, computer programmers, data managers, interviewers and record abstractors. Current epidemiologic research includes studies of colon cancer, Alzheimer’s and Parkinson’s disease, minority health, primary care and health service utilization, AIDS, Paget’s disease, childhood allergy and asthma, and cancer screening studies, among others. Our researchers have access to the sixth largest HMO population in the nation. Research is funded by NIH, AHCPR, private foundations and industry contracts, as well as by institutional funds. We enjoy collaborative relationships with the nearby University of Michigan and Wayne State University.

Qualifications include a doctoral degree in epidemiology and three to five years postdoctoral research experience. Salary and rank are commensurate with experience. We offer a generous benefits package and a flexible working schedule.

Send curriculum vitae and the names of three references to Christine Cole Johnson, Ph.D., Epidemiology Section Head, Division of Biostatistics and Research Epidemiology, 23725 Northwestern Highway, Southfield, MI 48075. Phone (810) 354-4064, fax (810) 354-4812.

An Equal Opportunity Employer
The Health Care Organization and Administration Track of the NJGPPH is seeking doctoral prepared candidates for a full-time faculty position. Requirements include strong interest and preparation in health services or related research. Please send curriculum vitae and names of three references to:

Dr. George Rhoads  
Director  
New Jersey Graduate Program in Public Health  
Environmental and Occupational Health Sciences Institute  
681 Frelinghuysen Road  
P.O. Box 1179  
Piscataway, New Jersey 08855-1179  
The University of Medicine and Dentistry of New Jersey is an affirmative action/equal opportunity employer m/f/d/v.

The Parke-Davis Pharmaceutical Research Division of Warner-Lambert Company, located in Ann Arbor, Michigan, has the following positions available in the Department of Epidemiology. Qualified individuals must have demonstrated research ability and experience in collaborative research and project management; pharmaceutical industry experience is desirable.

**HEALTH ECONOMIST**  
Economics, Health Services Research or equivalent.  
Individual will be responsible for  
Pharmacoeconomics Research and providing economics expertise in clinical research planning and data analysis. Must have a Ph.D. in Economics, Health Services Research or equivalent.

**EPIDEMIOLOGIST**  
Candidates for both positions will be responsible for the following:  
- Participating in drug development teams.  
- Leading outcomes research strategic planning.  
- Initiating, managing, analyzing, and reporting independent and collaborative research.

Parke-Davis offers competitive compensation and benefit packages and a professional, congenial work environment. For confidential consideration, send resume, indicating the position of interest (Epidemiologist code: CP94046; Health Economist code: CP94045), to: Chrissy Porterfield, Parke-Davis Pharmaceutical Research, Human Resources, 2800 Plymouth Road, Ann Arbor, MI 48105.

Equal Opportunity Employer
1995 CDC and ATSDR Symposium on Statistical Methods
Small Area Statistics in Public Health: Design, Analysis, Graphic & Spatial Methods

The Centers for Disease Control and Prevention (CDC) and the Agency for Toxic Substances and Disease Registry (ATSDR) will sponsor a statistical methods symposium on Small Area Statistics in Public Health: Design, Analysis, Graphic and Spatial methods, January 25-26, 1995 in Atlanta, Georgia. A short course on Geographic Information Systems, taught by Robert Marx, Bureau of the Census, will be offered January 24, 1995 in conjunction with the Symposium. The Symposium and course are open to the public.

Scientists are encouraged to submit abstracts related to small area statistics. The following areas are suggested: "borrowed strength" methods for small area estimation, "contextual approaches" to the analysis of small areas, small area statistics and ethnic subpopulations, estimation and forecasting from small samples, detection of temporal and spatial trends in disease patterns, Geographic Information Systems, and Mapping and graphical methods for public health research. Abstracts will be considered for either oral or poster presentation.

Abstracts should be postmarked no later than August 1, 1994. To request registration and abstract information or for additional information regarding scientific content of the Symposium, please contact S. Jay Smith, MIS, MS, Chair, 1995 CDC and ATSDR Symposium on Statistical Methods, (404-488-4300, internet: SJS@CEHEHL1.EM.CDC.GOV).

National Cancer Institute • National Institutes of Health • Public Health Service

Cancer Prevention Fellowship Program

The Division of Cancer Prevention and Control (DCPC), NCI, is accepting applications for the Cancer Prevention Fellowship Program (CPFP). The purpose of this program is to train individuals from a multiplicity of health science disciplines in the field of cancer prevention and control. The program provides: Master of Public Health training (at accredited university programs); Participation in the DCPC Cancer Prevention and Control Academic Summer Course (open to all physicians and scientists interested in learning the principles and practice of cancer prevention and control); Working at DCPC directly with individual preceptors on cancer prevention and control projects; Brief field assignments in cancer prevention and control programs at other institutions. Funding permitting, as many as ten Fellows will be accepted for up to three years of training, beginning July 1, 1995. Benefits include selected relocation and travel expenses, paid federal holidays, and participatory health insurance.

Eligibility

M.D., D.D.S., or D.O. from a U.S., territorial, or Canadian Medical School. Foreign medical graduates must have current ECFMG/FMGEMS or USMLE certification and appropriate experience, e.g., one year residency in a training program approved by the Accreditation Council for Graduate Medical Education.

Or

Ph.D., Dr.P.H. or other doctoral degree in a related discipline (epidemiology, biostatistics, and the biomedical, nutritional, public health or behavioral sciences). Foreign education must be comparable to that received in accredited U.S., territorial, or Canadian institutions.

PLUS

U.S. citizenship or resident alien eligible for citizenship within four years.

For details and an application catalog either call, fax or send a postcard or letter with your name and home address to:

Douglas L. Weed, M.D., M.P.H., Ph.D.
Director
Cancer Prevention Fellowship Program
Division of Cancer Prevention and Control
National Cancer Institute
Executive Plaza South, T-41
Bethesda, MD 20892

Further Inquiries: Mrs. Barbara Redding
TELEPHONE: (301) 496-8640
FAX: (301) 402-4863

Deadline for receipt of applications: September 1, 1994

NIH is an Equal Opportunity Employer
NEW ENGLAND RESEARCH INSTITUTES (NERI), located in the Boston area, is devoted to quality social and epidemiological research. NERI currently employs over 150 staff including physicians, biostatisticians, epidemiologists, statistical programmers, nurses, behavioral scientists, exercise scientists, dentists, and laboratory technicians. Ongoing projects include women’s health, aging, cardiovascular disease, cancer, and AIDS. In order to effectively accommodate our planned expansion of research projects addressing health and social issues of concern we are seeking the following individuals:

DIRECTOR, INSTITUTE FOR MULTI-SITE STUDIES

We have an immediate opening for a senior statistician/biostatistician/epidemiologist to direct this area of rapid expansion. The Director will be responsible for coordinating center projects of which there are currently nine, coordinating new initiatives, enhancing internal organization, promoting other multi-site initiatives, and disseminating institute activities. The successful candidate will be a senior member of our management team and must have a Doctorate and at least 10 years of experience, as well as a national reputation in the successful coordination of multi-site studies, strong leadership skills and a demonstrated ability to secure funding for new initiatives; strong background in clinical trials is preferred.

RESEARCH SCIENTIST IN WOMEN’S HEALTH

In order to address health and social issues of special concern to women, NERI formally launched its “Institute for Women’s Research” in 1992. This Institute and research projects serve as a focal point for new research endeavors and community outreach that positively affect women’s lives.

We are currently seeking an energetic, highly motivated Research Scientist with expertise in women’s health to establish an independent research program as well to collaborate with other NERI scientists on existing research initiatives. Applicants should have publications in peer reviewed journals, experience of ability to obtain research funds. Qualifications: Master’s degree in science or epidemiology, good writing skills, and ability to work as part of a multidisciplinary team of researchers. Qualified applicants please submit curriculum vitae, salary history, and references. NERI offers a productive environment that values quality work and supports professional advancement, an excellent fringe benefits package, including health, dental, life insurance, financial planning and a 401(k) retirement plan. Applicants please submit salary history and resume, New England Research Institutes, Inc., 9 Galen Street, Watertown, MA 02172.

New England Research Institutes, Inc., is an AA/EEO Employer.
