INVITED COMMENTARY
The role of gastrointestinal factors in alcohol metabolism  
H. K. Seitz and G. Pöschl  

RAPID COMMUNICATION
Nitric oxide is not increased in alcoholic brain  
J. Neiman and G. Benthin  

ORIGINAL ARTICLES
Use of a five-compartment closed model to describe the effects of ethanol inhalation on the transport and elimination of injected pyruvate in the rat  
G. Wu  

Impaired mouse fertilization by low chronic alcohol treatment  
E. Cebral, A. Lasserre, V. Rettori and M. A. F. De Gimeno  

Mortality of treated alcoholics after eight years in relation to short-term outcome  
A. Gerdner and M. Berglund  

Preliminary study of how alcohol consumption during pregnancy affects immune components in breast milk and blood of postpartum women  
H. R. Na, L. C. Daniels and L. L. Seelig, Jr  

Sex hormones during alcohol withdrawal: a longitudinal study of 29 male alcoholics during detoxification  
J. Ruusa, B. Bergman and M.-L. Sundell  

Osteopenia in alcoholics after tibia shaft fractures  

Flumazenil in alcohol withdrawal: a double-blind placebo-controlled study  

Meta-analysis of the effects of alcohol dehydrogenase genotype on alcohol dependence and alcoholic liver disease  
J. B. Whitfield  

Sober-state cortisol as a predictor of drunken violence  
R. E. Lindman, A. S. Aromäki and C. J. P. Eriksson  

LETTERS TO THE EDITORS
Training general practitioners  
M. M. Glatt  

Reply: Training general practitioners: response  
B. R. McAvoy  

Accelerated metabolism of ethanol in patients with burn injury  
A. W. Jones, H. J. Zdolsek, F. Sjöberg and B. Lisander
