

# Addendum to “Clearing, grazing and reservation: assessing regional impacts of vegetation management on the fauna of south western New South Wales”: the species assemblages.

**Murray Ellis**

Population Analysis and Modelling Unit, Biodiversity Conservation Science Section, Office of Environment and Heritage, PO Box 1967, Hurstville BC NSW 1481.

Ellis *et al.* (2007) classified the fauna of south western New South Wales into a management related structure of specialised and generalist species assemblages. The broad description of this system was presented in the paper but the detailed assignment of species to the various groups and the relationships between the groups was not published when supplementary material was not produced with the book. To prevent the loss of this information, which is important for applying the results of this study to other situations, the assignment of species to broad management groups and assemblages is now published

as Table 1 (below). The relationship between specialist assemblages, which would be actively conserved through appropriate vegetation and/or water management, and their relation to vegetation types was presented in the original publication. The relationship between vegetation types and generalist assemblages, which would accrue benefits from actions for specialist assemblages in the same vegetation type, is given in Table 2 (below). Habitat mapping through broad vegetation types was thought not to adequately reflect the requirements of shorebirds and no analysis of their distribution was attempted.

**Table 1.** The species considered in this project were classified into four main groups regarding their likelihood to response to agriculture (Ag), vegetation (Veg) and water (Water) management, or whether additional species specific management (Manage) was required; and into assemblages based on their habitat needs and mobility.

<i>Furina diadema</i>	Red-naped Snake	Veg	Litter reptiles heavier soils
<i>Notechis scutatus</i>	Eastern Tiger Snake	Veg	Floodplain debris
<i>Pseudechis australis</i>	Mulga Snake	Veg	Native vegetation generalist
<i>Pseudechis porphyriacus</i>	Red-bellied Black Snake	Veg	Floodplain debris
<i>Pseudonaja modesta</i>	Ringed Brown Snake	Veg	More mobile reptiles
<i>Pseudonaja nuchalis</i>	Western Brown Snake	Veg	Native vegetation generalist
<i>Pseudonaja textilis</i>	Eastern Brown Snake	Ag	Agriculture tolerant
<i>Lerista emmotti</i>		Veg	Burrowing/fossorial sandy soil reptiles
<i>Simoselaps australis</i>	Coral Snake	Veg	Litter reptiles
<i>Suta suta</i>	Curl Snake	Veg	Litter reptiles heavier soils
<i>Suta nigriceps</i>	Short-tailed Snake	Veg	Burrowing/fossorial sandy soil reptiles
<i>Vermicella annulata</i>	Bandy Bandy	Man	Litter reptiles
<i>Suta spectabilis</i>	Suta spectabilis	Veg	Burrowing/fossorial sandy soil reptiles
<b>Amphibians</b>			
<i>Cyclorana platycephala</i>	Water-holding Frog	Veg	Native vegetation generalist
<i>Limnodynastes dumerilii</i>	Eastern Banjo Frog	Veg	Native vegetation generalist
<i>Limnodynastes fletcheri</i>	Long-thumbed Frog	Veg	Flood system generalists
<i>Limnodynastes tasmaniensis</i>	Spotted Grass Frog	Ag	Agriculture tolerant
<i>Neobatrachus centralis</i>	Trilling Frog	Ag	Agriculture tolerant
<i>Neobatrachus pictus</i>	Mallee Spadefoot Toad	Veg	Mallee generalists
<i>Neobatrachus sudelli</i>	Common Spadefoot Toad	Veg	Native vegetation generalist
<i>Notaden bennettii</i>	Crucifix Frog	Veg	Flood system generalists
<i>Limnodynastes ornatus</i>	Ornate Burrowing Frog	Veg	Flood system generalists
<i>Crinia parinsignifera</i>	Plains Froglet	Veg	Flood system generalists
<i>Crinia signifera</i>	Common Eastern Froglet	Veg	Flood system generalists
<i>Litoria caerulea</i>	Green Tree Frog	Ag	Agriculture tolerant
<i>Litoria latopalmata</i>	Broad-palmed Frog	Ag	Agriculture tolerant
<i>Litoria peronii</i>	Peron's Tree Frog	Veg	Flood system generalists
<i>Litoria raniformis</i>	Southern Bell Frog	Man	Floodplain debris
<i>Litoria rubella</i>	Desert Tree Frog	Ag	Agriculture tolerant
