Briefings in Bioinformatics
MAY 2008 VOLUME 9 NUMBER 3

CONTENTS

PAPERS
189 Gene-set approach for expression pattern analysis
Dougu Nam and Seon-Young Kim

198 ROC analysis: applications to the classification of biological sequences and 3D structures
Paolo Sonego, András Kocsor and Sándor Pongor

207 Pfam 10 years on: 10,000 families and still growing
Stephen John Sammut, Robert D. Finn and Alex Bateman

210 Interoperability with Moby 1.0—it’s better than sharing your toothbrush!
The BioMoby Consortium

220 Two interactive Bioinformatics courses at the Bielefeld University Bioinformatics Server
Alexander Sczyrba, Susanne Konermann and Robert Giegerich

232 A review of bioinformatics education in Germany
Ina Koch and Georg Fuellen

243 The BREW workshop series: a stimulating experience in PhD education
Robert Giegerich, Alvis Brazma, Inge Jonassen, Eike Ukkonen and Martin Vingron

BOOK REVIEWS
254 Cardiac Gene Expression: Methods and Protocols (ed. Jun Zhang and Gregg Rokosh)
Narayanan Perumal

256 Bioinformatics Basics: Applications in Biological Science and Medicine (ed. Lukas K. Buehler and Hooman H. Rashidi)
Zhen Lin

Zhaohui Steve Qin
