Founded in 1928, the American Society for Nutrition (ASN) is the preeminent professional organization of nutrition research scientists throughout the world. ASN members are active researchers and key policy makers from major academic, government and corporate settings. ASN, a constituent society of the Federation of American Societies for Experimental Biology (FASEB) and a sponsor of Experimental Biology, is the authoritative voice on nutrition.

EDITORIALS

Variations in energy intake: it is more complicated than we think.
YY Lam and E Ravussin
See corresponding article on page 1206.

When to eat!
NV Dhurandhar and M Binks
See corresponding article on page 1213.

Salt substitution is a promising but unproven intervention for stroke management. B Neal and JHY Wu
See corresponding article on page 1267.

PERSPECTIVE

Surrogate disease markers as substitutes for chronic disease outcomes in studies of diet and chronic disease relations. EA Yetley et al

ORIGINAL RESEARCH COMMUNICATIONS

Obesity and eating disorders
Within-day protein distribution does not influence body composition responses during weight loss in resistance-training adults who are overweight. JL Hudson et al

No metabolic effects of mustard allyl-isothiocyanate compared with placebo in men. M Langeveld et al

Nutritional status, dietary intake, and body composition
Investigating predictors of eating: is resting metabolic rate really the strongest proxy of energy intake? J McNeill et al

Later circadian timing of food intake is associated with the composition and function of the human gastrointestinal microbiota. JL Kazemzadeh et al

Comparison of midupper arm circumference and weight-for-height z score for assessing acute malnutrition in Bangladesh children aged 6–60 mo: an analytical study. MM Hossein et al

Carbohydrate metabolism and diabetes
Plasma glucose and insulin responses after consumption of breakfasts with different sources of soluble fiber in type 2 diabetes patients: a randomized crossover clinical trial. CM de Carvalho et al

Effect of prior meal macronutrient composition on postprandial glycemic responses and glycemic index and glycemic load value determinations. H Meng et al

Energy and protein metabolism
In the elderly, meat protein assimilation from rare meat is lower than that from meat that is well done. C Buffiere et al

Vitamins, minerals, and phytochemicals
Intake of potassium- and magnesium-enriched salt improves functional outcome after stroke: a randomized, multicenter, double-blind controlled trial. WH Pan et al

Growth, development, and pediatrics
Randomized controlled trial on the impact of early-life intervention with bifidobacteria on the healthy infant fecal microbiota and metabolism. M Bazanella et al

Cancer
Inflammatory potential of the diet and colorectal tumor risk in persons with Lynch syndrome. JGM Brouwer et al

Nutritional epidemiology and public health
Trajectories of maternal weight from before pregnancy through postpartum and associations with childhood obesity. SA Leonard et al

Biomarkers of food intake and nutrient status are associated with glucose tolerance status and development of type 2 diabetes in older Swedish women. O Sarolainen et al

Cluster randomized controlled trial of a consumer behavior intervention to improve healthy food purchases from online canteens. T Delaney et al

Gene-nutrient interactions
Genetic variation of habitual coffee consumption and glycemic changes in response to weight-loss diet intervention: the Preventing Overweight Using Novel Dietary Strategies (POUNDES LOST) trial. J Han et al

ERRATA

Effect of prior meal macronutrient composition on postprandial glycemic responses and glycemic index and glycemic load value determinations. H Meng et al

The Highest Commitment to Nutrition

Industry organizations with the highest level of commitment to the nutrition profession are recognized as ASN Sustaining Partners. ASN is proud to partner with these companies to advance excellence in nutrition research and practice.

SUSTAINING PARTNERS
American Society for Nutrition

Abbott Nutrition
Alliance for Potato Research & Education
Almond Board of California
Biofortis Clinical Research
Cargill, Inc.
The Coca-Cola Company
Council for Responsible Nutrition
The Dannon Company
DSM Nutritional Products, LLC
DuPont Nutrition and Health
Egg Nutrition Center
General Mills Bell Institute of Health & Nutrition
Herbalife Nutrition Institute
The Hillshire Brands Company
Kellogg Company
Kraft Foods Group
Mars Chocolate North America
McCormick Science Institute
Mondelez International, Inc.
Monsanto Company
National Cattlemen’s Beef Association
National Dairy Council
Nestlé Nutrition Institute
PepsiCo
Pfizer, Inc.
Pharmavite, LLC
The Sugar Association
Tate & Lyle
Unilever North America

Ideas for ASN’s Sustaining Partners?
The Sustaining Partners are represented in the Society by a Sustaining Partner Roundtable. The members of this roundtable help to provide visibility within ASN to matters of interest to industry.

Interested in Adding Your Support to the Society?
Your unrestricted contribution is used to support programs and awards that help the association fulfill its mission: to be the leading nutrition research society dedicated to improving the health of individuals and populations worldwide.
