THE MOST IMPACTFUL TITLES IN NUTRITION RESEARCH

Leading the field in citations, influence, and value
The American Society for Nutrition (ASN) proudly offers the most important sources of nutrition research and reviews in the world, including the first and the most prominent journals in our field. Together they make up the Nutrition Science Collection, publishing an array of research that reflects the direction and shapes the future of global nutrition.

The Nutrition Science Collection includes:

- The Journal of Nutrition, the first scientific journal created solely for publication of nutrition research, with a reputation for rigorous peer review and a decades-long legacy of publishing highly original research whose findings directly influence health and nutrition policy worldwide
- The American Journal of Clinical Nutrition, the highest-ranked peer review journal in the field, named one of the most influential publications in biology and medicine over the past century by the Special Libraries Association, featuring basic and clinical studies regarding human nutrition from researchers in more than 90 countries
- Advances in Nutrition, delivering reviews of the most current, reliable evidence on all facets of nutrition, with a diverse, global point of view and a rapid submission-to-publication schedule to keep pace with the accelerating demand for the latest breakthroughs in nutrition science
- Current Developments in Nutrition, new in 2017, an open-access journal publishing a broad scope of nutrition research to extend knowledge through basic, multidisciplinary, and clinical research to improve public health and clinical practice worldwide

Researchers, policy makers, and practitioners rely on ASN’s Nutrition Science Collection to keep up with:

- Cutting-edge research in the rapidly evolving field of nutrition science and its clinical implications
- The latest findings linking nutrition to optimal health and well-being
- The role of nutrition in the prevention of diseases and health disorders

STATEMENT

THE AMERICAN JOURNAL OF CLINICAL NUTRITION

HIGH IMPACT

The most highly rated peer-reviewed, primary research journal in the Thomson Reuters Journal of Citation Reports (JCR) nutrition and dietetics category, The American Journal of Clinical Nutrition (AJCN) publishes the latest research on topics in nutrition, such as obesity, vitamins and minerals, nutrition and disease, and energy metabolism. The AJCN was selected by the Special Libraries Association (SLA) as one of the top 100 most influential journals in Biology and Medicine over the last 100 years—the only nutrition journal to be so recognized.

Every year, the award-winning AJCN is at the top of important rankings of journals in the field, including those for best value, most influence, and highest Impact Factor among primary research journals. Articles published in AJCN are read by researchers, government leaders, and other decision makers in the public health industry and are used by health professionals around the world in the formulation of health policies, guidelines, and recommendations.

Making A Difference. Findings published in AJCN regularly provide vital supporting evidence for guidelines, reports, and recommendations issued by governments, foundations, and professional organizations. For example, information in AJCN underpins:

- the new US Department of Agriculture’s Dietary Guidelines for Americans.
- World Health Organization (WHO) recommendations in the areas of chronic diseases, child health, HIV/AIDS, women’s health, and more.
- UNICEF reports on global efforts to eliminate malnutrition and nutrient deficiencies.
- Pan American Health Organization reports on pressing health issues.
- systematic reviews of healthcare and health policy of The Cochrane Collaboration.
- position and consensus statements of professional and scientific societies such as the Academy of Nutrition and Dietetics; NAASO, The Obesity Society, and the American Diabetes Association.

American Society for Nutrition
Excellence in Nutrition Research and Practice
www.nutrition.org
The American Society for Nutrition (ASN) is a dynamic home for physicians who are interested in nutrition and related medical disciplines. ASN has nearly 5,000 members, joined together to increase the role of nutrition in medical education, practice and research. One way ASN accomplishes this goal is by providing a unique combination of experiences to physician members.

MEMBERSHIP BENEFITS FOR PHYSICIANS

- 12 months of membership for only $190
- Access ASN’s three leading journals that focus on preventive, therapeutic, international and community-based nutrition science and translational models
- Reduced registration rates for ASN’s Scientific Sessions and the Advances & Controversies in Clinical Nutrition conference
- Medical Nutrition News e-newsletter
- Breaking news and information on employment, grant, scholarship and internship opportunities
- Multimedia resources including podcasts, author videos, recorded webinars, videotaped lectures, blog entries and more.
- Eligibility for awards like the Samuel J. Fomon Young Physician Award, which is given for outstanding work in the area of pediatric nutrition.

Additional details are available at www.nutrition.org/join or by contacting mem@nutrition.org.

Advantages at-a-Glance

- **Publications**
  Representative of ASN’s strength in serving medical practitioners is the success of the association’s The American Journal of Clinical Nutrition (AJCN).
  AJCN, published since 1952, is currently the highest ranked peer-reviewed journal in the ISI nutrition and dietetics category. ASN’s international review journal, Advances in Nutrition, assists in understanding human growth and development and the role nutrition plays in the pathophysiology of disease and disorders. Members of ASN receive free online access to AJCN, Advances in Nutrition (AN) as well as the Society’s experimental nutrition journal, The Journal of Nutrition (JN). ASN members are also eligible to receive Nutrition Today at a 58% discount of the regular subscription rate.

- **Communities**
  An emphasis on medical applications for nutrition research runs throughout ASN’s member communities. The Medical Nutrition Council (MNC) is one of ASN’s three Scientific Councils. The MNC serves as the Society’s primary mechanism for disseminating clinical nutrition knowledge; promoting policies to prevent and treat nutrition-related diseases; training health professionals; and monitoring national dietary and disease trends. MNC members, including medical students, receive an exclusive monthly newsletter tracking clinical nutrition and research news. Many of ASN’s fifteen Research Interest Sections also feature a translational approach that reinforces the work of the MNC. Through Sections such as Aging and Chronic Disease, Obesity, Diet and Cancer and Nutritional Immunology, ASN promotes knowledge exchange and the advancement and application of nutrition science in patient settings.

Several of ASN’s committees also focus on issues relevant to physicians, such as the Nutrition Education in Professional Schools Subcommittee.
