III International Symposium of Infectious Diseases

Metabolic Aspects of Critically Ill Patients

Symposium, Metabolic Aspects of Critically Ill Patients, November 17 to 18, 1977, Hilton Palacio del Rio, San Antonio, Texas. The Symposium, cosponsored by the Department of Foods and Nutrition with its Nutrition Advisory Group, American Medical Association, and the University of Texas Health Science Center at Houston, is open to all interested individuals. The registration fee is $30.00, and pre-registration is limited. Credit: 13 credit hours in Category 1, AMA Physician’s Recognition Award, and by the American Dietetic Association. Additional information is available from: Mrs. M. Nagy, AMA Department of Foods and Nutrition, 535 N. Dearborn St., Chicago, IL 60610, (312) 751-6516.

Fifth International Meeting of Endocrinology of Marseille

The Fifth International Meeting of Endocrinology of Marseille is scheduled to be held in Marseille, France, June 8-11, 1978. The program will be devoted to the relationships between diabetes and obesity. During 6 half days, sessions will comprise invited lectures and 10-minute communications.

Those interested in presenting a communication should send an Abstract in three copies of no more than 200 words before February 1, 1978.

All correspondence relating to the registration or to the program should be addressed to: Dr. Phillippe Vague, Secretaire General, Clinique Endocrinologique, C.H.U. de la Timone, 13385 Marseille Cedex 4, France.

50th Scientific Sessions of the American Heart Association

November 28-December 1, 1977, 50th Scientific Sessions, American Heart Association, and 31st Annual Meeting, Council on Arteriosclerosis, American Society for the Study of Arteriosclerosis, Miami Beach Convention Center, Florida. For information, contact the American Heart Association, 7320 Greenville Avenue, Dallas, Texas 75231.

American Public Health Association Annual Meeting

The American Public Health Association will hold its 105th Annual Meeting, October 30-November 3, 1977, in Washington, D.C. The theme is Toward A National Health Policy. For information contact Dr. Myron Allukian, Community Dental Programs, 818 Harrison Avenue, Boston, Massachusetts 02118.
Information for Authors
THE AMERICAN JOURNAL OF CLINICAL NUTRITION

Revised January 1976

The Editors of The American Journal of Clinical Nutrition welcome concise articles on new findings in the field of nutrition. Scientific papers of completed original research are preferred and will be given early publication. Invited papers, editorials, and Perspectives in Nutrition and other categories will be utilized as space permits.

Manuscripts and books for review should be sent directly to the Editor, Robert H. Herman, M.D., Department of Medicine, Letterman Army Institute of Research, San Francisco, California 94129. Phone: (415) 561-4147.

As is customary in professional publications, statements in articles are the responsibility of the authors. Articles must be contributed solely to The American Journal of Clinical Nutrition; material is copyrighted and may not be reproduced without permission, which may be obtained by writing to the Journal at 9650 Rockville Pike, Bethesda, Maryland 20014.

Preparation of manuscripts

Authors are requested to follow these instructions carefully in preparing manuscripts: Please double space all material, including tables and references, using wide margins; type on one side of the sheet only; make a carbon copy for yourself and send the original and two carbon or Xerox copies to the Editor; include full name, schools, degrees, staff position, and affiliation; indicate with an asterisk to whom reprint requests should be sent. Use superscript numerals for footnotes, and type footnotes on a separate page.

List bibliographic references numerically and in serial order as referred to in the article. Place the reference numbers in the text between parentheses, as (5). Please make certain each reference contains name of author with initials; title of article; name of periodical, with volume, page, and year. For example: PAIGE, D. M., T. M. BAYLESS and G. G. GRAHAM. Pregnancy and lactose intolerance. Am. J. Clin. Nutr. 26: 238, 1973. For titles of journals, follow the abbreviations given in the Chemical Abstracts “List of Periodicals,” 1961 and supplements. In references to book titles, the following should appear in sequence: name of author(s), title, place of publication, publisher’s name, year of publication, and page number. Example: SIEGEL, S. Non-parametric Statistics for the Behavioral Sciences. New York: McGraw-Hill, 1956, p. 83. Authors must be responsible for the accuracy and completeness of their references as these will not be rechecked by the Editors.

Unpublished work should not be included in the list of references unless the paper has been accepted for publication. It may be recognized by such parenthetical credits as “(unpublished observations)” or “(personal communication)” in the text.

Abstract. An abstract should accompany each manuscript of a communication. For a brief communication, include a 100-word abstract, for an original communication a 200-word abstract. The abstract should be an abbreviated, accurate representation of the article. It should be written in a single paragraph, double-spaced, using complete, connected sentences, active verbs, and the third person.
Preparation of illustrations

So that your article will be presented most effectively, illustrations must be glossy prints or professional drawings in black ink (never in blue; it will not produce well). All printing on illustrations should be done professionally and be large enough to be legible if reduction is necessary. Reference to all illustrations should be inserted in the text in consecutive order. Please follow these identification instructions: With a soft pencil write the figure number and the author's name on the back of each illustration and indicate the top. Do not use paper clips on glossy prints. Type legends for illustrations double-spaced on a separate sheet with numbers corresponding to those on the photographs or drawings. Please do not attach legends to the pictures.

Charges to authors

Excess illustrative material. Authors are encouraged to limit illustrations and tables to the necessary minimum for lucid and precise presentation. The cost of material in excess of 1 1/2 Journal pages for figures, tables, and legends will be charged to the author. Special arrangements must be made in advance with the publishers for any reproduction in color.

Reprints. Orders for reprints should be sent on the form the author receives with galley proof. The American Journal of Clinical Nutrition does not request payment of page charges from authors. The cost of the first 100 reprints will cover a portion of the publication costs of the article.

Every author should make sure he has funds available for all charges on his article. Since these charges will be computed by the publisher from bills submitted by the printer, it might be several months after publication before an author receives his bill.

Correcting proof

Two sets of galley proofs and one set of engravers proofs together with the original manuscript are sent to the author. Galleys should be carefully checked and any necessary changes or printer's errors (to be marked in red) should be clearly indicated in the margins. Except for correction of typographic errors, the cost of author alterations of subject matter in type will be charged to authors if these charges exceed the Journal's allowance of $10. Authors should consider this when financial arrangements are made with their institutions for payment. Proof should be returned to the Redactory, The Williams & Wilkins Company, 428 East Preston St., Baltimore, Maryland 21202.

Auxiliary publication

Additional detailed tables, appendixes, mathematical derivations, extra figures, and other supplementary matter too costly to be included in the Journal article may be submitted for deposition without charge with the National Auxiliary Publications Service of the American Society for Information Science. Material is deposited by the Editor with the consent of the author, and a footnote is carried in the published article to the effect that photostat or microfilm copies are available at moderate cost.

In Search of the Facts

Human Health and Disease

is the one book that makes available to professionals in the fields of biology and medicine the facts and figures they need—all in clear, concise and readily retrievable format. It is the latest of FASEB's Biological Handbooks, and contains 186 tables of data, each completely referenced to the literature.

At a glance, the reader can tell what is known about the biological manifestation and diagnostic significance of factors causing disease, about drugs and compounds of biological interest in disease prophylaxis, and about the "normal" biological state which is crucial to the understanding of the abnormal. HUMAN HEALTH AND DISEASE is a unique reference volume which provides immediate access to a formidable body of knowledge. It belongs in the working library of every scientist concerned with better understanding man's function as a biological entity.

Contents by Section: Infectious Diseases — Immunological Factors — Metabolic Disorders — Organ System Diseases — Neurologic Diseases — Endocrinology and Endocrinopathies — Radiation and Radiobiology

Advisory Committee: Thomas J. Gill III, Committee Chairman — Julio H. Garcia — Richard Hong — Edward J. Huth — Gerald S. Johnston — A. Martin Lerner — John T. Potts, Jr. — John B. Stanbury

Compiled and edited by: Philip L. Altman and Dorothy Dittmer Katz

ISBN: 0-913822-11-6. LC#76-53166

300 contributors and reviewers — 400 pages — 186 tables of data — 7½ x 10¼ size. Price, postpaid to any part of the world: $45.00.

CRC FORUM ON OBESITY

Chaired by: JOHN R. K. ROBSON, M.D., D.P.H., Professor of Nutrition, Medical University of South Carolina.

Participants: HENRY A. JORDAN, M.D., Behavioral Weight Control Program, University of Pennsylvania, GEORGE V. MANN, Sc.D., M.D., Professor of Nutrition, School of Medicine, Vanderbilt University, and DEREK MILLER, Ph.D., Senior Lecturer, Department of Nutrition, Queen Elizabeth College, University of London (England).

Not prepared lectures with scripts, but live discussion, analysis, and exchange of ideas among four of the world’s experts on obesity. Recorded March 18, 1977, just days after the FDA’s proposal to ban saccharin, this Forum offers the latest developments to all involved with the treatment and care of the obese patient.

OUTLINE

SIDE 1. Introduction and participants statements
(30 mins.) Prevalence of obesity.

SIDE 2. Genetics
(30 mins.) Thermogenisis, gene, cellular.

SIDE 3. Environment
(30 mins.) Early feeding, glandular, cultural, and social effects.

SIDE 4. Implications
(30 mins.) Diabetes, cardio-vascular disease, hypertension, wear and tear, psychology, minor irritations, menarche growth.

SIDE 5. Treatment
(30 mins.) Diet, weight control, total fast, protein modified fast, quality, slimming groups, bizarre treatments.

SIDE 6. Treatment (cont.)

SIDE 7. Behavior modification
(30 mins.) Life modification, material and personnel needs. Prognosis for treatment.

SIDE 8. Management

Now Available. Includes four one-hour audio tapes (C-60 Cassettes), and a bound copy of the research papers. Sold only in complete sets.

CAT. NO. F111MS $87.50 OUTSIDE U.S.A. $99.50 *
