European Journal of Public Health
Official journal of the European Public Health Association

AIMS AND SCOPE
The European Journal of Public Health (EJPH) is a multidisciplinary journal aimed at attracting contributions from epidemiology, health services research, health economics, social sciences, management sciences, ethics and law, environmental health sciences and other disciplines of relevance to public health. The journal provides a forum for discussion and debate of current international public health issues with a focus on the European Region. Aims and scope issues contain peer-reviewed original articles, editorials, commentaries, book reviews, news, letters to the editor, announcements of events and various other features.

The EJPH is owned by the European Public Health Association, which has more than 4000 individual members throughout Europe. All members are entitled to receive the electronic version of the journal, which ensures an exceptionally large readership consisting of public health researchers, policy-makers and practitioners in all European countries.

The EJPH style and editorial policies conform to the ‘Uniform requirements for manuscripts submitted to biomedical journals’, as specified by the statements of the International Committee of Medical Journal Editors (www.icmje.org).
