Carcinogenesis: Integrative Cancer Research

Instructions to authors

Scope and policy of Carcinogenesis

Carcinogenesis is a multi-disciplinary journal bringing together all the varied aspects of research relevant to the prevention of cancer or the state. The journal will publish papers that represent important advances in the fields of cancer biology (including the molecular mechanisms, prevention, signaling transduction, genomics, immunity, growth factors, cell and molecular biology, migration, DNA repair, genetics etc.), Molecular Epidemiology and Cancer Prevention (including molecular metadisequilibrium, epidemiology, genetic predisposition to cancer, chemotherapy, nutrition and cancer), and Carcinogenesis, including viral, chemical and physical carcinogenesis, metastasis, angiogenesis, chemoprevention, and the molecular and molecular biological basis of the micro-environmental carcinogenesis. The Editors may, from time to time, issue short notices, such as the submission of controversies or leave one of the Editors before submission.

Submission of manuscripts

Submission of a paper implies that it is reports unpublished work and that it is not under consideration for publication elsewhere. If previously published, information or ~200 words must be included, that the copyright holder's written permission must be obtained. If you refer to your own paper in the table.

Proofs

Authors will be sent pdf proofs, it is important to include a current email address for this purpose. To avoid delays in publication, proofs should be checked immediately for typographical errors and returned to the publisher by express delivery post or fax. Errors other than typographical should be noted with the overall dimensions of the drawing. Ideally, line drawings should be submitted in the desired final size to avoid reduction (maximum dimensions 248 mm x 351 mm). For line drawings which are formatted to this size, please provide a running title of no more than 50 characters (including spaces). In the journal, the line drawings and labels will be printed in smaller size than the original artwork. Wherever possible, these must be submitted at the desired final size so that the final publication resembles the original draft. The best way to ensure that this occurs is to submit electronic files in the correct format.

Abstracts

The second page of every manuscript must contain only the Abstract, which should be a brief summary of the content of the paper.

Illustrations

All illustrations (line drawings and photographs) should be referred to in the text as Figure 1 etc., abbreviated to 'Fig. 1.' only in the figure legend. Alternatively, corrections may be sent via fax +44 (0) 1865 353773. For line drawings which are formatted to this size, please provide a running title of no more than 50 characters (including spaces). In the journal, the line drawings and labels will be printed in smaller size than the original artwork. Wherever possible, these must be submitted at the desired final size so that the final publication resembles the original draft. The best way to ensure that this occurs is to submit electronic files in the correct format.

Tables

Tables should be numbered consecutively with Roman numerals, they should be self explanatory and should have a brief descriptive title. Entries to tables indicated for In Web pages must be referenced first. Use italics for emphasis. Authors are required to submit the table sources and a brief explanation of the table's content.

Cancer Prevention

Web pages should be numbered consecutively with Roman numerals; they should be self- explanatory and should have a brief descriptive title. Entries to tables indicated for In Web pages must be referenced first. Use italics for emphasis. Authors are required to submit the table sources and a brief explanation of the table's content.
