3 COMMENTS: First complete paragraph on this page ("checked s2") should read "In this article, the various types of vaccine safety assessments are explored by means..." and hyphenation of post-licensure should come as given here if possible. Lastly, should read "... the implications for study design and analysis are discussed." rather than "... is discussed."
Q4. Figures 2 and 3 are reversed. Figure 2 is the smaller one with caption "...Delayed fever..." Figure 3 should have caption "Hospitalization for acute..." In this caption, "Pneumo" is an abbreviation of Pneumococcal Vaccine. "Mening" is an abbreviation for Meningococcal vaccine.

Q5. aPDT is an abbreviation for acellular pertussis, diphtheria and tetanus vaccine. wPDT is an abbreviation for whole-cell pertussis, diphtheria and tetanus vaccine.

Q6. DMSB should actually be written as DSMB. This is an abbreviation for "Data Safety Monitoring Board."
