AIMS AND SCOPE

The European Journal of Public Health (EJPH) is a multidisciplinary journal aimed at attracting contributions from epidemiology, health services research, health economics, social sciences, management sciences, ethics and law, environmental health sciences and other disciplines of relevance to public health. The journal provides a forum for discussion and debate of current international public health issues with a focus on the European Region. Regularly issues contain peer-reviewed original articles, editorials, commentaries, book reviews, news, letters to the editor, announcements and various other features.

The EJPH is owned by the European Public Health Association, which has more than 4000 individual members throughout Europe. All members are entitled to receive the electronic version of the journal, which ensures an exceptionally large readership consisting of public health researchers, policy-makers and practitioners in all European countries.

The EJPH style and editorial policies conform to the ‘Uniform requirements for manuscripts submitted to biomedical journals’, as specified by the statements of the International Committee of Medical Journal Editors (www.icmje.org).

EDITOR-IN-CHIEF

Peter Albeeck, Stockholm County Council and Karolinska Institute, Stockholm, Sweden

EDITORS

Diana Dobos, Academic Research Centre for Health and Social Care, Tilburg University, Tilburg, Dutch Centre for Consumer Experience in Health Care, Utrecht, The Netherlands
