Using tree-based methods for detection of gene–gene interactions in the presence of a polygenic signal: simulation study with application to educational attainment in the Generation Scotland Cohort Study

J.J.Meijsen, A.Rammos, A.Campbell, C.Hayward, D.J.Porteous, I.J.Deary, R.E.Marioni and K.K.Nicodemus

ncDetect2: improved models of the site-specific mutation rate in cancer and driver detection with robust significance evaluation

M.Juul, T.Madsen, Q.Guo, J.Bertl, A.Hobolth, M.Kelts, S.L.Schroeder

Statistical tests for detecting variance effects in quantitative trait studies

B.Dumitrascu, G.Darnell, J.Ayroles and B.E.Engelhardt

CoMSA: compression of protein multiple sequence alignment files

S.Deorowicz, J.Walczyszyn and A.Debudaj-Grabysz

Chemical shift-based identification of monosaccharide spin-systems with NMR spectroscopy to complement untargeted glycomics

P.Klukowski and M.Schubert

Reverse-engineering flow-cytometry gating strategies for phenotypic labelling and high-performance cell sorting

E.Becht, Y.Simoni, E.Coustan-Smith, M.Evrard, Y.Cheng, L.G.Ng, D.Campana and E.W.Newell

Compound–protein interaction prediction with end-to-end learning of neural networks for graphs and sequences

M.Tsubaki, K.Tomii and J.Sese

AuTom-dualx: a toolkit for fully automatic fiducial marker-based alignment of dual-axis tilt series with simultaneous reconstruction

R.Han, X.Wan, L.Li, A.Lawrence, P.Tang, Y.Y.Li, S.Mang, F.Sun, Z.Liu, X.Gao and F.Zhang

GeneSpy, a user-friendly and flexible genomic context visualizer

P.S.Garcia, F.Jauffrit, C.Grangeasse and C.Brochier-Armant
