SUBSCRIPTIONS
A subscription to Bioinformatics comprises 24 issues. All prices include postage, and for subscribers outside the UK delivery is by Standard Air. Bioinformatics Advantage Access contains papers that have recently been accepted but have not yet been included within an issue. Advantage Access is shipped twice a week.

Annual subscription rates (Volumes 25, 24, 23, 22, 21, 20, 19, 18, 17, 16, 15, 14, 13, 12, 11, 10, 9, 8, 7, 6, 5, 4, 3, 2, 1)

Institutional

Print and online subscription only: £2554 (–2019) £3831.00 (–2021)

Print and online access: £2554.00 ($3831.00) (–2020)

Print only: £1637.00 ($2554.00) (–2019)

Available at

Print and electronic only online access: £1637.00 ($2554.00) (–2021)

Print access online only: £1328.00 ($2062.00) (–2021)

Europe

Print and online: £1637.00 ($2554.00) (–2019)

Print only: £1328.00 ($2062.00) (–2019)

Worldwide

Print and online: £1637.00 ($2554.00) (–2019)

Print only: £1328.00 ($2062.00) (–2019)

There may by other subscription rates available, for a complete listing please visit https://academic.oup.com/bioinformatics/pages/Fees.

Full prepayment, in the correct currency, is required for all orders. Orders are entered on a complete volume basis. Claims cannot be considered more than FOUR months after publication or date of order, whichever is later. All subscriptions in Europe (–2017) are regarded as firm and payments are not refundable. Subscriptions are accepted and distributed in the USA by Central Mailing Services c/o UKP Worldwide, 1637 South Road B2, Piscataway, NJ 08854. Annual subscription price is £2554.00 ($3831.00). (iii) Credit card (American Express, Visa, MasterCard, Diner’s Club, Discover, JCB, Visa Electron, Maestro).

US Postmaster: send address changes to Bioinformatics, Oxford University Press, 2001 Evans Road, Cary, NC 27513. USA. Email: jnlorders@oup.com. Tel (and answerphone outside office hours): +1 (518) 537 4700.

Advertising, inserts and artwork enquiries should be addressed to Advertising and Subscriptions, Oxford University Press, 2001 Evans Road, Cary, NC 27513. USA. Email: jnlorders@oup.com. Tel (+1) 518 537 4700. Fax: (+1) 518 537 5088.

For further information, please contact: Journals Customer Service Department, Oxford University Press, Great Clarendon Street, Oxford OX2 6DP, UK. Email: ojournals@oup.com. Tel (+44) 1865 354354. In the US, please contact: Journals Customer Service Department, Oxford University Press, 2001 Evans Road, Cary, NC 27513. USA. Email: jnlorders@oup.com. Tel (+1) 518 537 4700. Fax: (+1) 518 537 5088.

METHODS OF PAYMENT

(i) Cheque (payable to Oxford University Press, to Oxford University Press, Great Clarendon Street, Oxford OX2 6DP, UK) in GB£ Sterling drawn on a UK bank; US$ Dollars (drawn on a US bank); or SWIFTPay (ii) Bank transfer to Bioinformatics UK, Oxford University Press, Great Clarendon Street, Oxford OX2 6DP, UK. EUR Euros to account no. 78923655, IBAN GB16BARC20651878923655. (iii) Credit card (American Express, Visa, MasterCard, Diner’s Club, Discover, JCB, Visa Electron, Maestro). Subscriptions in the EU may be subject to European VAT. Personal rate subscriptions are only available if payment is made by personal cheque or credit card and delivery is to a private address.

PERMISSIONS

For information on how to request permissions to reproduce articles information from this journal, please visit https://academic.oup.com/journals/pages/policies/permissions/rights_and_permissions.

DISCLAIMER

Statements of fact and opinion in the articles in Bioinformatics are those of the respective authors and do not necessarily represent the views of Oxford University Press. Neither Oxford University Press nor the Editors make any representation, express or implied, in respect of the accuracy of the information contained in the journal and cannot accept any legal responsibility or liability for any errors or omissions that may be made. The reader should make his/her own evaluation as to the appropriateness or otherwise of any experimental technique described.

Gluton: a tool for generating structural ensembles of partly disordered proteins from chemical shifts

Y.H. Wang, S. Nagapi, M. Sadgui, Ede Alba and V. Muñoz

PlayMovie BlindScope: large scale CNN-based virtual screening on the web

M. Skaqic, G. Martinez-Rosell, J. Jimenez and D.L. Fabbrini

HiPitkV2: a web server to predict targets of chemical compounds

NanoShape-VMD interface: computing and visualizing surfaces, pockets and channels in molecular systems

S. Decherchi, A. Alpfater, J. Stone and W. Rocchia

Genetics and population analysis

HLA-IMPUTER: an easy to use web application for HLA imputation and association analysis using population-specific reference panels

Systems biology

Drug Gene Badger (DGB): an application for ranking drugs to modulate a specific gene based on transcriptional signatures

Z. Wang, W. He, K. San, M. Jagodnik, M. Silverstein and A. M'ayani

Contents continued from outside back cover
Genome analysis
De novo construction of polyploid linkage maps using discrete graphical models
P.Behrouzi and E.C.Wit

Differential methylation values in differential methylation analysis
C.Xie, Y.-K.Leung, A.Chen, D.-X.Long, C.Hoyo and S.-M.Ho

Sequence analysis
A generic deep convolutional neural network framework for prediction of receptor–ligand interactions—NetPhosPan: application to kinase phosphorylation prediction
E.Fenoy, J.M.G.Izarzugaza, V.Jurtz, S.Brunak and M.Nielsen

Improving protein function prediction using protein sequence and GO-term similarities
S.Makrodimitris, R.C.H.J.van Ham and M.J.T.Reinders

DeepGSR: an optimized deep-learning structure for the recognition of genomic signals and regions
M.Kalkatawi, A.Magana-Mora, B.Jankovic and V.B.Bajic

SCOP: a novel scaffolding algorithm based on contig classification and optimization
M.Li, L.Tang, F.-X.Wu, Y.Pan and J.Wang

Phylogenetics
Methods for automatic reference trees and multilevel phylogenetic placement
L.Czech, P.Barbera and A.Stamatakis

Phylogenetic approaches to identifying fragments of the same gene, with application to the wheat genome
J.Peters, C.-M.Tsen, A.Altenhoff, H.Redestig and C.Dessimoz

Decomconvoluting essential gene signatures for cancer growth from genomic expression in compound-treated cells
J.Jung, Y.Kang, H.Pale, M.Kwon, H.Yu and D.Lee

Genetics and population analysis
novoCaller: a Bayesian network approach for de novo variant calling from pedigree and population sequence data
A.Kohanty, B.Vuran, M.L.Franckowiak, C.Gasso, Brigham Genomic Medicine, Undiagnosed Diseases Network, Brigham and Women’s Hospital ExomeBase Project, A.Tats-Patricky and S.Sunyaev

Precision Lasso: accounting for correlations and linear dependencies in high-dimensional genomic data
H.Wang, B.L.Lengenich, B.Ahamad and E.P.Xing

Systems biology
Robust prediction of clinical outcomes using cytometry data
Z.Hu, B.S.Glicksberg and A.J.Butte

Mixed graphical models for integrative causal analysis with application to chronic lung disease diagnosis and prognosis

Data and text mining
Understanding and predicting disease relationships through similarity fusion
E.Oerton, I.Roberts, P.S.H.Lewis, T.Guilliams and A.Bender

Bioimage informatics
When a single lineage is not enough: Uncertainty-Aware Tracking for spatio-temporal live-cell image analysis
A.Theorell, J.Seiffarth, A.Grünberger and K.Nöh

APPLICATIONS NOTES
Phylolink: phylogenetically-based profiling, visualisations and metrics for biodiversity
J.Miller, N.Perel, D.Rossauer, G.Jobey-Rogers and T.Vargo

Structural bioinformatics
cpPredictor: a web server for template-based prediction of RNA secondary structure
J.Jelinsek and J.Panek
