**BIOINFORMATICS**
Subscription to Bioinformatics comprises 24 issues. All prices include postage, and for subscribers outside the UK delivery is by Standard Air. Bioinformatics-Ashe Ascot contains papers that have recently been accepted but have not yet been included within an issue. Ascot Access is updated twice a week.

**Annual subscription rates** (Volume 34, 24 Issues, 2018)

- Institutional: Print edition only: £3363.00/$6725.00/3649.00 Online access only: £1508.00/$3017.00/1714.00
- Personal: Print edition (includes free online access): £684.00/$1377.00/777.1714.00 Online access only: £336.00/$672.00/364.90

**ADVERTISING**
Adverts and advertorials should be addressed to Advertising and Special Sales, Oxford Journals, Oxford University Press, Great Clarendon Street, Oxford OX2 6DP, UK. Tel: +44 (0)1865 354767; Email: jnlsadvertising@oup.com.

**PERMISSIONS**
For information on how to request permissions to reproduce articles/information from this journal, please visit https://academic.oup.com/journals/pages/policies/rights_and_permissions.

**APPLICATIONS NOTES**

**Genome analysis**

- **SVM**: accurate structural variation genotyping and de novo mutation detection from whole genomes
- **D.Antaki, W.M.Brandtler and J.Sebat**

**Personal Cancer Genome Reporter**: variant interpretation report for precision oncology
- **N.Jakob, F.Gournous, D.Vodak, L.B.Aasheim, O.Myklebost and E.Hovig**

**Enrichment analysis with EpiAnnotator**
- **Y.Pagoud, C.Pias and Y.Assenov**

**Structural bioinformatics**

**PyChimera**: use UCSF Chimera modules in any Python 2.7 project
- **J.Rodriguez-Guerra Pedregal and J.-D.Maréchal**

**Genetics and population analysis**

**PGA**: post-GWAS analysis for disease gene identification

Please visit the journal’s website https://academic.oup.com/bioinformatics.
A high-resolution map of the human small non-coding transcriptome
Genome U-Plot: a whole genome visualization
A.Gaitatzes, S.H.Johnson, J.B.Smadbeck and G.Vasmatzis
Tumor purity quantification by clonal DNA methylation signatures
M.Benelli, D.Romagnoli and F.Demichelis
CALQ: compression of quality values of aligned sequencing data
J.Voges, J.Ostermann and M.Hernaez
Mapping-free variant calling using haplotype reconstruction from k-mer frequencies
P.Audano, S.Ravishankar and F.O.Vannberg
Machine learning for classifying tuberculosis drug-resistance from DNA sequencing data
Computational identification of micro-structural variations and their proteogenomic consequences in cancer
K2 and K*2: efficient alignment-free sequence similarity measurement based on Kendall statistics
J.Lin, D.A.Adjeroh, B.-H.Jiang and Y.Jiang
DeepSig: deep learning improves signal peptide detection in proteins
C.Savojardo, P.L.Martelli, P.Fariselli and R.Casadio
ChopStitch: exon annotation and splice graph construction using transcriptome assembly and whole genome sequencing data
H.Khan, H.Mohamadi, B.P.Vandervelk, K.L.Warren, J.Chu and I.Bril
LeNup: learning nucleosome positioning from DNA sequences with improved convolutional neural networks
J.Zhang, W.Peng and L.Wang
Sensitive and specific post-call filtering of genetic variants in xenograft and primary tumors
A benchmark study of scoring methods for non-coding mutations
D.Drubay, D.Gautheret and S.Michiels
Tumor purity quantification by clonal DNA methylation signatures
M.Benelli, D.Romagnoli and F.Demichelis
mTM-align: an algorithm for fast and accurate multiple protein structure alignment
R.Dong, Z.Peng, Y.Zhang and J.Yang
Multiple hot-deck imputation for network inference from RNA sequencing data
A.Emert, A.Valdesio, C.Le Gall, C.Armesine, G.Lefebvre, P.A.Gournad, M.Viguere and N.Villa-Vialaneix
CRNET: an efficient sampling approach to infer functional regulatory networks by integrating large-scale ChIP-seq and time-course RNA-seq data
X.Chen, J.Gu, X.Wang, J.-L.Jung, T.-L.Wang, L.Hilakivi-Clarke, R.Clarke and J.Xuan
A network approach to exploring the functional basis of gene-gene epistatic interactions in disease susceptibility
Ontological function annotation of long non-coding RNAs through hierarchical multi-label classification
J.Zhang, Z.Zhang, Z.Wang, Y.Jiu and L.Ding
Data and text mining
Algorithmic identification of discrepancies between published ratios and their reported confidence intervals and P-values
C.Georgescu and J.D.Wren
Bioimage informatics
A benchmark for comparing precision medicine methods in thyroid cancer diagnosis using tissue microarrays
