

Subject and Author index

Numbers refer to the page where a definition or explanation of, and/or a *figure* or a **table** for, a given subject is found. Author names are given with the number of the first page of the paper in which they are involved.

A

Abiotic systems, lime addition and limestone drains, 366
 Acero, P., 273
 Activation barriers in mineral redox reactions, 67
 Adsorption mechanisms of As(III) on 6 nm maghemite, 9
 Aeration process for water treatment, 417
 Ag-Cu ionization system for control of *Legionella* in hospitals, 431
 Ahmed, I.A.M., 1, 273
 Anaerobic compost reactors, 370
 Anionic species, inserted into pores, 386
 Anthracene, reacted with magnetite, 345
 Anthraquinone, reacted with magnetite, 345
 Archaeological artefacts, Mössbauer and Raman spectroscopy, 47
 Arsenic removal from water, 414, **415**
 Arsenic(V), reduction by Fe, 210
 Arsenopyrite oxidation, 108
 Auqué, L.F., 273

B

Bacteria, Fe(III) reduction, 200, formation of manganese oxide minerals by, 173, removal, redox-reactive compounds used for water disinfection, 431
 Bacteriogenic Mn oxides, 184
 Band gap, 10
 Banded iron formations (BIF), 130, trace element enrichment and isotope records, 153
 Bioconversion of Fe(III), 197
 Biogenic Mn oxides, 187
 Biogeochemical, evolution, iron minerals as archives of Earth's, 121, modelling of redox processes in low-*T* natural systems, 273, redox processes of sulfide minerals, 95
 Biological processes, formation of sulfide minerals through, 99, in redox reactions, 292
 Biomedical applications, magnetic nanoparticles, 217
 Biominerals, applications of magnetic, 207

Bioreduction, 25
 Black shales, trace-element concentrations, 156
 Bogush, A.A., 405
 Bromophenoxy radicals, oxidative coupling of, 339
 Buffer material, waste package and buffer material, interface between, 238

C

Campos, L.C., 405
 Catalysis of redox reactions, 23
 Catalysts, MOFs as, 393
 Chalcopyrite oxidation, 109
 Chanéac, C., 5
 Chemical, information, iron minerals as archives of, 122, kinetics analysis, of mineral redox reactions, 65, precipitation process for water treatment, 416
 Chlorinated-solvent source-zone remediation, 430
 Chromium(VI), reductive transformation by Fe(II)-bearing phases, 208
 Chromium, 144
 Clarke, C.E., 313
 Clean technologies, application in, 113, redox-reactive minerals in, 1
 Coker, V.S., 95, 197
 Compost bioreactors, 368
 Conduction band, 10
 Contaminant-magnetite interactions, 208
 Corrosion behaviour of Fe-bearing waste canisters, 236
 Crystal structure, influence of particle size of iron oxides on, 8
 Cultural heritage, characterization of iron-bearing minerals, 33

D

Degradation of organic matter, simulation, 291
 Devic, T., 379
 Dissolution of sulfide minerals, 104
 DOC, impact of, on oxidation and hydrolysis of contaminants by Mn oxide, 326

E

- Earth's biogeochemical evolution, 121
 Eh-pH, diagram for the Mn-H₂-CO₂ system, 323, stability diagrams, 278
 Electrochemical, characterization of MOFs, 382, methods for removing nitrate from drinking water, 425, methods, time-resolved, 83
 Electrodes for Li-ion batteries, MOFs as, 390
 Electronic conductivity, coordination polymers, 392
 Electronic structure of a solid, 10
 Elements in soils, reduction potentials of half-reactions of, 322
 Enzymatic and non-enzymatic oxidation, 184
 Equilibrium, calculations, 284, redox potentials, 273
 EXAFS, study of bacteriogenic Mn oxides, 185

F

- Fe phases, radionuclide interaction with, 234
 Fe(II) adsorption, redox transformations induced by, 18
 Fe(II) oxidation, 201
 Fe(III) reduction, 198
 Fe-based MOF, 381
 Fe-bearing, minerals, in candidate far-field lithologies, 242, minerals in GDF host rocks, 244, minerals in the removal of nitrate from drinking water, 421, waste canisters, corrosion behaviour of, 236
 Felmy, A.R., 229
 Ferromanganese crusts, 131, 155
 Fractionation theory, stable isotope, 134, 138
 Free energy diagrams for thermally activated chemical reaction processes, 68
 Free energy relationships, 73
 Free enthalpy of transformation of iron oxides, 7
 FTIR, study of bacteriogenic Mn oxides, 185

G

- Galena oxidation, 107
 Gas sorption isotherm, 388
 Gas storage or capture (enhanced), 387
 Gázquez, F., 33
 Geochemical modelling of redox transformations, 295
 Geochemical reaction kinetics, 58
 Geological disposal facility (GDF), 231
 Gibbs free energy variation, for different respiratory pathways, 293
 Gilbert, B., 55

- Glyphosate, possible reaction mechanism between Mn oxide and, 338
 Goethite, 13, nanorods, dissolution of, 17
 Green rust removal, 367
 Greigite, oxidation of Fe, 204
 Groundwater systems, redox zones in, 296

H

- Health effects of silver ionization, 432
 Hematite, 13, electronic structure, 21
 Heme peroxidases, animal, Mn(II) oxidation mediated by Ca²⁺-binding, 182
 Historical and cultural heritage, 46
 Hollandite, Mn oxide with tunnel structure, 185
 Hudson-Edwards, K.A., 1, 357
 Hydrolysis of contaminants by Mn oxide, 326
 Hydrus ferric oxides, properties of, 305
 Hydroxides, free energies of transformation of, 57

I

- In situ* treatment technologies, 421
 Industrial reuse of mine wastes, 360
 Interfacial, electron transfer, 73, electron transfer process, 20
 Iodides, inserted into MOFs, 385
 Iron isotope composition of natural materials, 141
 Iron minerals, as archives of Earth's redox and biogeochemical evolution, 121, cycling, pathways of, 142
 Iron oxide structure, influence on redox activity, 5
 Iron oxides, free energies of transformation of, 57
 Iron oxyhydroxides, 124
 Iron redox chemistry, impact on nuclear waste disposal, 229
 Iron sulfide formation, 102, 126
 Iron-based records of Earth's redox and biogeochemical evolution, 145

J

- Jaroso Ravine, Mars analogue site, 41
 Johnson, K.L., 313
 Jolivet, J.-P., 5
 Jones, M., 173

K

- Kim, J.K., 405
 Kinetic assumption, vs. redox equilibria, 295
 Kinetic oxidation of ferrous iron, 301
 Klingelhöfer, G., 33
 Konhauser, K., 121
 Kossoff, D., 357

L

- Lalonde, S.V., 121
Lee, S.-W., 173
Lithium ions inserted into MOFs, 385
Lloyd, J.R., 197

M

- Mackinawite, uptake by, 111
Maghemite, oxidation of magnetite to, 16
Magnetic minerals, tailoring, 206
Magnetic nanoparticles, bioconversion of Fe(III) to, 197
Magnetite, 13, adsorption onto, size-dependent reduction, 24, nanoparticles, 79, oxidation of, 16, oxidation of Fe, 204
Manganese oxide minerals, formation of, by bacteria, 173, 176
McCann, C.M., 313
MCO (multi-copper oxidase), 178
Mechanistic descriptions of mineral redox reactions, 61
Medina, J., 33
Mercury(II), reduction by Fe, 210
Metal reduction, microbial, 101
Metal–organic framework (MOF) structures, redox-active, 379
Microbes, pathogenic, removal from water, 405
Microbial activity, effect of, on Fe-bearing phases in the near field, 241
Microbial metal reduction, 101
Microbial sulfate reduction, 100
MIMOS II, Mössbauer instrument, 38
Mine wastes, redox-reactive minerals, in the reuse and remediation of, 357
Mineral redox reactions, logarithmic timescale, 59
Mineral-reaction intermediates, chemical dynamics methods for, 80
Mn cycle, 323
Mn oxide, possible reaction mechanism between glyphosate and, 338
Mn oxides and natural organic matter, 321
Mn tailings, oxidation of AO7 by, 343
Mnx protein complex, Mn(II) binding and oxidation by, 179
Mo isotope compositions of diverse Precambrian formations, 145
Mo isotope compositions of marine sediments, 143
Mo isotopes in shales, 158
Molecular modelling, radionuclide interaction with redox-active Fe components, 258
Molybdenum, the most abundant transition metal in seawater, 128

- Morphologies of iron oxides, 13
Mössbauer spectra of maghemite, 19
Mössbauer spectroscopy, characterization of iron-bearing minerals in Mars, 33
Multi-copper oxidase (MCO), 178
Multi-electron redox reactions, 76

N

- Nanoparticles, magnetic, bioconversion of Fe(III) to, 197
Natural organic matter, soil contaminant, 325
Natural systems, redox-reactive minerals in, 1
N-containing, aromatic compounds, soil contaminants, 319, compounds, reacting with birnesite, 340, species, log-transformed activities of, 278
Near field, redox-active components in the, 236
Neptunium(V), reduction by Fe, 214
Neutral species, inserted into pores, 386
Nitrate removal from water, 423
Non-traditional stable isotope systems, 140
Nuclear waste disposal, impact of iron redox chemistry on, 229

O

- Opalinus clay, 247
Opportunity, Mars Rover, 34
Organic compounds, reduction by Fe, 215
Organic contaminants, breakdown of, in soil, by Mn oxides, 313
Organic pollutants, persistent, removal from water, 427
Organically contaminated land, 316
Oxidants used in water treatment, 417
Oxidases, Mn(II), 177
Oxidation and adsorption, in the treatment of polluted water, 418, for persistent organic pollutants, 428
Oxidation of contaminants by Mn oxide, 326, 330
Oxidation of magnetite, to maghemite, 16
Oxidized, iron nanoparticles, 78, polypyrrole inserted into MOFs, 385
Oxyhydroxides, free energies of transformation of, 57

P

- Particle reactivity, influence of particle size of iron oxides on, 6
Partitioning coefficients of phosphates, 152
Pathogenic microbes, removal from water, 405
Patrick, R.A.D., 229

Peacock, C., 121
Pearce, C.I., 229
Permeable reactive barrier system, 368, 369, 407
Phenolic monomers, oxidative transformation of, 337
Phenols, as soil contaminants, 318, oxidation of by Mn oxides, 335
Photocatalysis and redox reactions, 429
Photo-induced redox activity, 395
Photostabilization of mine waste, 363
pH-pe diagram showing approximate positions of some natural environments, 280
Phylogenetic tree of domain bacteria, 175
Plant nutrients, mine wastes as a source of, 362
Plutonium(V) and (VI), reduction by Fe, 214
Polychlorinated biphenyls (PCBs), soil contaminants, 319
Polycyclic aromatic hydrocarbons (PAH), soils contaminated with, 320, 321, 342
Primary and secondary mineral phases, 203
Proton adsorption, reactivity towards, 15
Pump probe method for studying reactions, 80
Pyrite, oxidation, 105, uptake by, 110

R

Radiation damage, effect of, on Fe-bearing phases in the near field, 241
Radical species, formation of, 76
Radionuclide interaction with redox-active Fe components, 251
Radionuclides relevant to geological disposal of high-activity wastes, half-lives of, 233
Raman spectrometer, ExoMars 2018 mission, 39
Raman spectroscopy, characterization of iron-bearing minerals in Mars, 33
Ramsdellite, Mn oxide with tunnel structure, 185
Rates of multistep reactions, 75
Reaction balance, 19
Reactions from the main respiratory pathways of organic matter, 288
Recommended reading, 3
Redox, catalysis, 22, conditions in a GDF, post-closure, 234, cycling, 198, evolution, iron minerals as archives of, 121, iron mineralogy as a function of, 122, potentials in natural systems, 278, processes, biogeochemical modelling of, in low-*T* natural systems, 273, reactions, timescales of, 55
Redox-active, Fe components, radionuclide interaction with, 251, ligands, 382, minerals, 1, minerals, in the reuse and remediation of mine-wastes, 357, minerals, removal of As, organic

pollutants and pathogenic microbes from water, 405, minerals, properties of, 407, 408, porous metal–organic framework structures, 379,
Reduction potentials for iron redox phases, 60
Reductive dissolution of 6-line ferrihydrite nanoparticles, 70
Remediation, of mine wastes, 357, mechanisms facilitated by biogenic magnetite, 208
Río Tinto, Mars analogue site, 41
Rock paintings in the field, Mössbauer spectroscopy, 48
Romano, C., 173
Rosso, K.M., 229
Rull, F., 33

S

Schematic adsorption mechanisms of As(III) on 6 nm maghemite, 9
Sedimentary porewater redox profile, 323
Sedimentary sulfide minerals, iron isotope compositions of, 145
Serre, C., 379
Silicate glass alteration enhanced by iron, 238
Silver nanoparticles inserted into MOFs, 385
Soil contamination, 313
Spain, Altamira Cave, rock paintings, 48
Stable isotope, fractionation, of trace elements, 133, nomenclature and conventions, 134
Structural defects, influence of particle size of iron oxides on, 6
Structures and compositions, of sulfide minerals, 95, 97, 98
STXM, study of bacteriogenic Mn oxides, 185
Sulfidic bioreactors, 368
Sulfur cycle, under biomining conditions, 114
Supercapacitors, MOFs as, 392
Synthesis, of MOFs, 382
Synthetic analogues, radionuclide interaction with redox-active Fe components, 251

T

Tebo, B.M., 173
Technetium(VII), reduction by Fe, 213
Thermodynamic, basis for mineral redox reactions, 60, modelling, radionuclide interaction with redox-active Fe components, 258, stability, influence of particle size of iron oxides on, 6
Timescales, of redox reactions, 55
Todorokite, Mn oxide with tunnel structure, 185
Toxic metals bound to sulfide, 109
Trace elements, uptake of, by iron minerals, 124

U

Uranium(VI), reduction by Fe, 211

V

Valence band, 10

Vaughan, D.J., 95

Venegas, G., 33

W

Waste (nuclear) package, 232

Waste package and buffer material, interface

between, 238

Water purification, tailings as a possible contaminant absorbent filter, 363

Water treatment, oxidants used in, 417

Watts, M.P., 197

Waychunas, G.A., 55

X

XANES spectra from freeze-dried plant roots, 364

XANES, study of bacteriogenic Mn oxides, 185

XAS, study of bacteriogenic Mn oxides, 185
