

Hallek M. Signaling the end of chronic lymphocytic leukemia: new frontline treatment strategies. *Hematology Am Soc Hematol Educ Program*. 2013;2013:138-150.

On page 139 in the *Hematology 2013 American Society of Hematology Education Program*, there is a typographical error. In the “Chemoimmunotherapy” section, the last sentence of the second paragraph reads: “Similar results were obtained in a trial comparing FCR *without* FC in relapsed CLL without demonstrating a benefit for OS.⁴⁰” The sentence should have read, “Similar results were obtained in a trial comparing FCR *with* FC in relapsed CLL without demonstrating a benefit for OS.⁴⁰”
